Phoenix Fled Attia Hosain 2021-08-19 'There is so much to love and admire in these stories - their understanding of heartbreak, their attention to affection and love across many divides' KAMILA SHAMSIE 'Listen to me, child. You will be a woman soon and must behave well and with modesty. The Kazi will ask you three times whether you will marry Kallou Mian. Now don't you be shameless, like these modern girls, and shout gleefully "Yes". Be modest and cry softly and say "Hoon".' A marriage is arranged between a little servant girl and a middle-aged cook with an opium habit; an idealistic political worker faces disillusionment; a man returns from years studying in England to a wife he scarcely knows; a conventional bride has her first encounter with her husband's 'emancipated' friends. Telling of the lives of servants and children, of conflict between the old traditions and new ways, and exploring the human repercussions of the Muslim/Hindu divide, these twelve stories present a moving and vivid picture of life in India in the mid-twentieth century. To each episode Attia Hosain brings a superb imaginative understanding and a sense of the poignancy of the smallest of human dramas. Attia Hosain published only two books, but her writing has influenced generations of writers. Discover Sunlight on a Broken Column, Hosain's acclaimed only novel - a coming-of-age story set against the turbulent background of Partition, also published in Virago Modern Classics.

The Image and the Figure Anna Niedźwiedź 2010 The image of Our Lady of Czestochowa is the most famous and the most venerated holy image in Poland. In contemporary Poland the image is a kind of a cultural icon, instantly recognizable and connected with popular symbolic and mythological meanings. Presented in this book is an analysis of beliefs, narratives (great and small stories), myths, and rituals. This analysis reveals that for its devotees the image is not merely a material object and a picture--it is perceived, lived, and experienced as a real person--figure of Mary--Queen and Mother.

Textbook of Interventional Neurology Adnan I. Qureshi 2011-04-14 Endovascular intervention - using medication and devices introduced through catheters or microcatheters placed into the blood vessels through a percutaneous approach - has emerged as a relatively new minimally invasive approach to treat cerebrovascular disease and possibly intracranial neoplasms. This textbook provides a comprehensive review of principles pertinent to endovascular treatment of cerebrovascular diseases and intracranial tumors, with a detailed description of techniques for these procedures and periprocedural management strategies. Particular emphasis is placed on expert interpretation of the quality of evidence provided and implications for practice related to endovascular procedures. This will be essential reading for clinicians working in interventional neurology and cardiology, endovascular neurosurgery, vascular surgery and neuroradiology.

Distant Traveller Attia Hosain 2015-09-02 The accidental discovery of chapters from an unfinished novel and of unpublished stories, made the publication of this anthology of Attia Hosain's new and selected fiction an inevitability. Attia's two worlds - the Lucknow she grew up in and the London she later lived and worked in - intersect and mesh in the stories and novel excerpts presented here, reflecting her deep and abiding concern with those caught in the cleft stick of history, and how they come to terms with it. The distinctive quality of her prose - subtle, elegant, with an uncanny ear for dialogue and sharp, yet sympathetic observation - is displayed to stunning effect as she delineates the tension and pathos of lives and societies in transition. Attia Hosain (1913-1998) was born in Lucknow and educated at La Martiniere and Isabella Thoburn College, blending an English liberal education with that of a traditional Muslim household where she was taught Persian, Urdu and Arabic. Influenced in the 1930s by the nationalist movement and the Progressive Writers' Group in India, she became a journalist, broadcaster and writer. In 1947 she moved to England and presented her own women's programme on the BBC Eastern Service for many years, and appeared on television and the West End stage. She is the author of Phoenix Fled, a collection of short stories, and Sunlight on a Broken Column, a novel.

Goldstein-Sabbah 2021-05-25 Baghdadi Jewish Networks in the Age of Nationalism explores different components of Baghdadi participation in global Jewish networks through the modernization of communal leadership, satellite communities, transnational Jewish philanthropy and secular education during the Hashemite period (1920-1951).

Hebrew Manuscripts Ilana Tahan 2007 "Highlighting the vibrant interplay between work and image, Tahan traces the development of Sephardi and Ashkenazi scripts, as well as the increased use of images, such as micrographic motifs, created out of minute script. By close analysis of individual folios, Tahan shows how scribes emphasized sacred words and phrases, enhancing and adorning the script. Illustrates with over 145 colour examples - some shown here for the first time - Hebrew Manuscripts will appeal to all art lovers."--BOOK JACKET.

From Bulk to Structural Failure: Fracture of Hyperelastic Materials Philipp Laurens Rosendahl 2020-12-01 This thesis investigates the fracture of nearly incompressible hyperelastic media. It covers the different characteristics of bulk material failure under dilatational or distortional loads and develops a unified description of the corresponding failure surface. It proposes a coupled strain and energy failure criterion for the assessment of notch-induced crack nucleation and presents a weak-interface-model that allows for efficient stress, strain and failure analyses of hyperelastic adhesive lap joints. Theoretical concepts for the measurement of fracture properties of nonlinear elastic materials are provided. The methodology is developed using two exemplary hyperelastic silicones, DOWSIL 993 Structural Glazing Sealant and DOWSIL Transparent Structural Silicone Adhesive, and is validated using large sets of experiments of different loading conditions.

Inviting Transformation Sonja K. Foss 2019-01-03 The fourth edition of *Inviting Transformation* continues to offer an innovative approach to presentational speaking at a very reasonable price. The authors introduce readers to invitational rhetoric, teaching speakers to clarify ideas and to work to achieve understanding for all participants in an interaction. A primary goal of presentational speaking is to create an environment in which growth and change can occur for both the audience and the speaker. The text highlights four external conditions affecting transformational environments: safety, openness, freedom, and value (honoring the intrinsic worth of all individuals). To reflect respect for the diversity of the world, Sonja Foss and Karen Foss include options from many speaking traditions and practices to foster creativity. Discussions of all the processes of presenting— selecting a speaking goal, organizing ideas, elaborating on ideas, and delivering the presentation—emphasize inclusive speaking practices. Sample presentations provide clear and contemporary examples of the best invitational speaking practices. The authors recognize readers as competent communicators and encourage them to think about and systematize their approaches to presentational speaking. The exceptionally accessible writing style is an aid to readers in thinking through strategies for meeting their interactional goals. Readers learn to design and deliver effective presentations for any speaking situation.

The papers are organized in topical sections on adaptive hypermedia, adaptive Web, natural language and dialogue, plan recognition, evaluation, emerging issues of user modeling, group modeling and cooperation, applications, student modeling, learning environments - natural language and paedagogy, and mobile and ubiquitous computing.

Poverty and Joy William J. Short 1999 "Focusing on the importance of the Franciscans' founders, St Francis of Assisi and St Clare, the author offers us an historical introduction to the Order before illuminating their vision. He reflects on the key themes of the Incarnation, poverty as a way to God, suffering and healing, and of creation - humanity and nature in harmony. Along the way we meet key figures, such as Bonaventure, Angela of Foligno and John Duns Scotus, who have helped shape the tradition and bring it to life through the ages."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Functional Neuroradiology Scott H. Faro 2011-09-08 *Functional Neuroradiology: Principles and Clinical Applications*, is a follow-up to Faro and Mohamed's groundbreaking work, *Functional (BOLD)MRI: Basic Principles and Clinical Applications*. This new 49 chapter textbook is comprehensive and offers a complete introduction to the state-of-the-art functional imaging in Neuroradiology, including the physical principles and clinical applications of Diffusion, Perfusion, Permeability, MR spectroscopy, Positron Emission Tomography, BOLD fMRI and Diffusion Tensor Imaging. With chapters written by internationally distinguished neuroradiologists, neurologists, psychiatrists, cognitive neuroscientists, and physicists, *Functional Neuroradiology* is divided into 9 major sections, including: Physical principles of all key functional techniques, Lesion characterization using Diffusion, Perfusion, Permeability, MR spectroscopy, and Positron Emission Tomography, an overview of BOLD fMRI physical principles and key concepts, including scanning methodologies, experimental research design, data analysis, and functional connectivity, Eloquent Cortex and White matter localization using BOLD fMRI and Diffusion Tensor Imaging, Clinical applications of BOLD fMRI in Neurosurgery, Neurology, Psychiatry, Neuropsychology, and Neuropharmacology, Multi-modality functional Neuroradiology, Beyond Proton Imaging, Functional spine and CSF imaging, a full-color Neuroanatomical Brain atlas of eloquent cortex and key white matter tracts and BOLD fMRI paradigms. By offering readers a complete overview of functional imaging modalities and techniques currently used in patient diagnosis and management, as well as emerging technology, *Functional Neuroradiology* is a vital information source for physicians and cognitive neuroscientists involved in daily practice and research.

Jewish Translation - Translating Jewishness Magdalena Waligórska 2018-05-22 This interdisciplinary volume looks at one of the central cultural practices within the Jewish experience: translation. With contributions from literary and cultural scholars, historians, and scholars of religion, the book considers different aspects of Jewish translation, starting from the early translations of the Torah, to the modern Jewish

experience of migration, state-building and life in the Diaspora. The volume addresses the question of how Jews have used translation to pursue different cultural and political agendas, such as Jewish nationalism, the development of Yiddish as a literary language, and the collection of Holocaust testimonies. It also addresses how non-Jews have translated elements of the Judaic tradition to create an image of the Other. Covering a wide span of contexts, including religion, literature, photography, music and folk practices, and featuring an interview section with authors and translators, the volume will be of interest not only to scholars of Jewish studies, translation and cultural studies, but also a wider interested audience.

Computer-Aided Analysis of Rigid and Flexible Mechanical Systems Manuel F.O. Seabra Pereira 2012-12-06 This book contains the edited version of the lectures presented at the NATO ADVANCED STUDY INSTITUTE on "COMPUTER AIDED ANALYSIS OF RIGID AND FLEXIBLE MECHANICAL SYSTEMS". held in Troia, Portugal. from the 27 June to 9 July. 1993. and organized by the Instituto de Engenharia Mecanica. Instituto Superior Tecnico. This ASI addressed the state-of-art in the field of multibody dynamics. which is now a well developed subject with a great variety of formalisms. methods and principles. Ninety five participants. from twenty countries. representing academia. industry. government and research institutions attended this Institute. This contributed greatly to the success of the Institute since it encouraged the interchange of experiences between leading scientists and young scholars and promoted discussions that helped to generate new ideas and to define directions of research and future developments. The full program of the Institute included also contributed presentations made by participants where different topics have been explored. Such topics include: formulations and numerical aspects in rigid and flexible mechanical systems; object-oriented paradigms; optimal design and synthesis; robotics; kinematics; path planning; control; impact dynamics; and several application oriented developments in weapon systems. vehicles and crash worthiness. These papers have been revised and will be published by Kluwer in a special issue of the Journal of Nonlinear Dynamics and in a forthcoming companion book. This book brings together. in a tutorial and review manner. a comprehensive summary of current work and is therefore suitable for a wide range of interests.

Thoughts on Design Paul Rand 2014-08-19 One of the seminal texts of graphic design, Paul Rand's Thoughts on Design is now available for the first time since the 1970s. Writing at the height of his career, Rand articulated in his slender volume the pioneering vision that all design should seamlessly integrate form and function. This facsimile edition preserves Rand's original 1947 essay with the adjustments he made to its text and imagery for a revised printing in 1970, and adds only an informative and inspiring new foreword by design luminary Michael Bierut. As relevant today as it was when first published, this classic treatise is an indispensable addition to the library of every designer.

Personal Information Management William P. Jones 2011-07-01 In an ideal world, everyone would always have the right information, in the right form, with the right context, right when they needed it. Unfortunately, we do not live in an ideal world. This book looks at how people in the real world currently manage to store and process the massive amounts of information that overload their senses and their systems, and discusses how tools can help bring these real information interactions closer to the ideal. Personal information management (PIM) is the study and practice of the activities people perform to acquire, organize, maintain, and retrieve information for everyday use. PIM is a growing area of interest as we all strive for better use of our limited personal resources of time, money, and energy, as well as greater workplace efficiency and productivity. Personal information is currently fragmented across electronic documents, email messages, paper documents, digital photographs, music, videos, instant messages, and so on. Each form of information is organized and used to complete different tasks and to fulfill disparate roles and responsibilities in an individual's life. Existing PIM tools are partly responsible for this fragmentation. They can also be part of the solution that brings information together again. A major contribution of this book is its integrative treatment of PIM-related research. The book grows out of a workshop on PIM sponsored by the National Science Foundation, held in Seattle, Washington, in 2006. Scholars from major universities and researchers from companies such as Microsoft Research, Google, and IBM offer approaches to conceptual problems of information management. In doing so, they provide a framework for thinking about PIM as an area for future research and innovation.
