The Coming Age of Scarcity Michael N. Dobkowski 1998-03-01 Michael Dobkowski and Isidor Walliman have edited a book that, although ominous, is not a fatalistic look at the future. The Coming Age of Scarcity lays out the perils of not recognizing the reality of genocide or of acknowledging the full implications of warfare. Showing how scarcity and surplus populations can lead to disaster, The Coming Age of Scarcity is about evil. It tells of "ethnic cleansing" and excavates the world's expanding killing fields. The writers in this volume are all too aware that the future suggests that present-day population growth, land resources, energy consumption, and per capita consumption cannot be sustained without leading to greater catastrophes. The essays in this volume ask: What is the solution in the face of mass death and genocide? As philosopher John K. Roth says in the Foreword, "The essays can sensitize us against despair and indifference because history shows that human-made mass death and genocide are not inevitable, and no events related to them will ever be."

Environmental Engineering and Safety Sangeeta Raut 2017-04-01 Future scientists, engineers, public health workers face challenges which were predicted, but certainly not expected to emerge this soon and to the magnitude presently occurring. The problems and projected solutions in this book cover a broad spectrum of issues including industrial and domestic solid wastes, air pollution and associated global warming, noise pollution and safety. Many engineering elements go into developing solutions to these problems including the need for additional detailed mapping and surveying, developing improved waste water treatment, including the development of more eco-friendly process and importance on conservation. Issues such as environmental assessments now play a most important role in practically all proposed developments. Old landfills are being mined for fuel, new landfills are designed to prevent waste materials from migrating to groundwater and new approaches to waste incineration focus on energy recovery and conversion of waste materials into usable materials. This text should help engineers and scientists meet the environmental challenges.

Murder at Longbourn Tracy Kiely 2009-09-01 A die-hard fan of Jane Austen novels and the traditional English mystery, Tracy Kiely has combined elements of both for this truly delightful and witty debut. Planning New Year's resolutions to rid her life of all things unhealthy, Elizabeth Parker has dumped fatty foods, processed sugar, and her two-timing boyfriend. Indeed, the invitation to join her Aunt Winnie for a How to Host a Murder Party on New Year's Eve at Winnie's new Cape Cod B and B comes just in time. But when the local wealthy miser ends up the unscripted victim, Elizabeth must unearth old secrets and new motives in order to clear her beloved aunt of suspicion. The suspects include the town gossip, a haughty rich woman, and an antiques business owner much enamored of his benefactress, a Mrs. Kristell Dubois. If that isn't bad enough, Elizabeth must also contend with her childhood nemesis, Peter McGowan---a man she suspects has only matured in chronological years---and her suspicions about his family's interest in Winnie's inn. Yesterday, her only worry was of ever finding her Mr. Darcy. Now she has a murder to solve. Is it any wonder her resolution to achieve inner poise is in tatters? By reimagining characters and themes lifted from the treasured classic *Pride and Prejudice*, and crafting an expert, intricate mystery, Tracy Kiely has brought to life something very special: a new cozy series that is clever, vibrant, and utterly disarming.

Twelve Years A Slave, Illustrated Edition Solomon Northup 2014-04-08 Kidnapped and sold into slavery in the American South, freeman Solomon Northup spent twelve years in bondage before being freed. *Twelve Years a Slave* is Northup's moving memoir, revealing unimaginable details of the horrors he faced as a slave on Southern plantations, and his unshakable belief that he would return home to his family. Mitigation of Greenhouse Gas Emissions in Livestock Production Pierre J. Gerber 2013 The current analysis was conducted to evaluate the potential of nutritional, manure and animal husbandry practices for mitigating methane (CH₄) and nitrous oxide (N₂O) - i.e. non-carbon dioxide (CO₂) - GHG emissions from livestock production. These practices were categorized into enteric CH₄, manure management and animal husbandry mitigation practices. Emphasis was placed on enteric CH₄ mitigation practices for ruminant animals (only in vivo studies were considered) and manure mitigation practices for both ruminant and monogastric species. Over 900 references were reviewed; simulation and life cycle assessment analyses were generally excluded

Environmental Impact Assessment Peter Wathern 2013-02-01 This comprehensive treatment of environmental impact assessment (EIA) provides an authoritative contemporary review of theory and practice over the past ten years. EIA is viewed as both science and art, reflecting the concern both with technical aspects of appraisal and the effects of EIA on the decision-making process. Adopted in many countries, with different degrees of enthusiasm, since its inception in the early 1970's, EIA is established as a major procedure for assessing the environmental implications of legislation, the implementation of policy and plans and the initiation of development projects. EIA is increasingly an essential part of environmental management

Supported Catalysts and Their Applications David C Sherrington 2007-10-31 The need to improve both the efficiency and environmental acceptability of industrial processes is driving the development of heterogeneous catalysts across the chemical industry, including commodity, specialty and fine chemicals and in pharmaceuticals and agrochemicals. Drawing on international research, Supported Catalysts and their Applications discusses aspects of the design, synthesis and application of solid supported reagents and catalysts, including supported reagents for multi-step organic synthesis; selectivity in oxidation catalysis; mesoporous molecular sieve catalysts; and the use of Zeolite Beta in organic reactions. In addition, the two discrete areas of heterogeneous catalysis (inorganic oxide materials and polymer-based catalysts) that were developing in parallel are now shown to be converging, which will be of great benefit to the whole field. Providing a snapshot of the state-of-the-art in this fast-moving field, this book will be welcomed by industrialists and researchers, particularly in the agrochemicals and pharmaceuticals industries.

Life as Politics Asef Bayat 2013-05-01 Prior to 2011, popular imagination perceived the Muslim Middle East as unchanging and unchangeable, frozen in its own traditions and history. In *Life as Politics*, Asef Bayat argues that such presumptions fail to recognize the routine, yet important, ways in which ordinary people make meaningful change through everyday actions. First published just months before the Arab Spring swept across the region, this timely and prophetic book sheds light on the ongoing acts of protest, practice, and direct daily action. The second edition includes three new chapters on the Arab Spring and Iran's Green Movement and is fully updated to reflect recent events. At heart, the book remains a study of agency in times of constraint. In addition to ongoing protests, millions of people across the Middle East are effecting transformation through the discovery and creation of new social spaces within which to make their claims heard. This eye-opening book makes an important contribution to global debates over the meaning of social movements and the dynamics of social change.

applications involving catalyst preparation and the technological advances necessary for continued progress. An ideal companion for scientists exploring the preparation of application-specific catalysts based on desired catalytic properties, *Catalyst Preparation: Science and Engineering* provides a balanced overview of important synthesis parameters to consider for good catalyst design.

Memorylands Sharon Macdonald 2013-07-18 *Memorylands* is an original and fascinating investigation of the nature of heritage, memory and understandings of the past in Europe today. It looks at how Europe has become a 'memoryland' - littered with material reminders of the past, such as museums, heritage sites and memorials; and at how this 'memory phenomenon' is related to the changing nature of identities - especially European, national and cosmopolitan. In doing so, it provides new insights into how memory and the past are being performed and reconfigured in Europe - and with what effects. Drawing especially, though not exclusively, on cases, concepts and arguments from social and cultural anthropology, *Memorylands* argues for a deeper and more nuanced understanding of the cultural assumptions involved in relating to the past. It theorizes the various ways in which 'materializations' of identity work and relates these to different forms of identification within Europe. The book also addresses questions of methodology, including discussion of historical, ethnographic, interdisciplinary and innovative methods. Through a wide-range of case-studies from across Europe, Sharon Macdonald argues that Europe is home to a much greater range of ways of making the past present than is usually realized - and a greater range of forms of 'historical consciousness'. At the same time, however, she seeks to highlight what she calls 'the European memory complex' - a repertoire of prevalent patterns in forms of recollection and 'past presencing'. The examples in *Memorylands* are drawn from both the margins and metropolitan centres, from the relatively small-scale and local, the national and the avant-garde. The book looks at pasts that are potentially identity-disrupting - or 'difficult' - as well as those that affirm identities or offer possibilities for transcending national identities or articulating more cosmopolitan futures. Topics covered include authenticity, temporalities, embodiment, commodification, nostalgia and Ostalgie, the musealization of everyday and folk-life, Holocaust commemoration and tourism, narratives of war, the heritage of Islam, transnationalism, and the future of the past. *Memorylands* is engagingly written and accessible to general readers as well as offering a new synthesis for advanced researchers in memory and heritage studies. It is essential reading for those interested in identities, memory, material culture, Europe, tourism and heritage.

Biology of Wastewater Treatment N. F. Gray 2004 This comprehensive text provides the reader with both a detailed reference and a unified course on wastewater treatment. Aimed at scientists and engineers, it deals with the environmental and biological aspects of wastewater treatment and sludge disposal. The book starts by examining the nature of wastewaters and how they are oxidized in the natural environment. An introductory chapter deals with wastewater treatment systems and examines how natural principles have been harnessed by man to treat his own waste in specialist reactors. The role of organisms is considered by looking at kinetics, metabolism and the different types of micro-organisms involved. All the major biological process groups are examined in detail, in highly referenced chapters; they include fixed film reactors, activated sludge, stabilization ponds, anaerobic systems and vegetative processes. Sludge treatment and disposal is examined with particular reference to the environmental problems associated with the various disposal routes. A comprehensive chapter on public health looks at the important waterborne organisms associated with disease, as well as removal processes within treatment systems. Biotechnology has had an enormous impact on wastewater treatment at every level, and this is explored in terms of resource reuse, biological conversion processes and environmental protection. Finally, there is a short concluding chapter that looks at the sustainability of waste water treatment. The text is fully illustrated and supported by over 3000 references.
