Sharing Lives Bert de Ruiter 2013-10-12 This book argues that the single greatest hindrance to Christian witness amongst Muslims in Europe is fear. Many European Christians fear that Europe will gradually turn into Eurabia, or Islamic domination of Europe, and they ignore the efforts of Muslims to adapt to the European context, a situation pointing to a future scenario of Euro-Islam, or Islam being Europeanized. The author argues that instead of an attitude of fear, which leads to exclusion, Christians should develop an attitude of grace, which leads to embrace. After analyzing books and courses developed to help Christians relate to Muslims, he concludes that these mostly concentrate on providing information and skills, instead of dealing with one's attitude. Because of this the author developed a short course to help Christians overcome their fear of Islam and Muslims and to encourage Christians to share their lives with Muslims and to share the truth of the Gospel with the purpose of attracting them to Christ. Bert de Ruiter (1958) works with OM Europe as Champion Muslim Ministries in Europe. Bert obtained a Master of Arts in World Evangelization and a Doctor of Ministry in Muslim-Christian relations. During the past 25 years Bert has been ministering in almost 50 countries around the world to help Christians share their lives with Muslims. Bert and his wife live in Amsterdam, the Netherlands and have two children and one grandchild.

Intercultural Competence Past, Present and Future María Dolores López-Jiménez 2021-01-08 This book explores the benefits of teaching reflection upon one's own culture to develop intercultural competence and looks into the relationship between the proficiency level of the second language and the target culture. It introduces new debates on the concept of 'critical cultural awareness' in intercultural learning and teaching, for example the indiscriminate use of terminologies related to the idea of 'intercultural encounters'. Also, it provides insight into the relationship between language and culture using a new tool such as the Autobiography of Intercultural Encounters through Visual Media. The presentation of different approaches, tools, barriers, educational and cultural realities, online intercultural exchange projects and concepts such as motivation, attitudes, stereotyping, otherization, and critical cultural awareness makes this book an excellent instrument not only for teachers but also for researchers, policy-makers and private and public institutions that want to explore culture and interculturality and to promote an intercultural competence and global citizenship among its learners / users / clients and / or an interculturality-oriented language education.

DSM-5® Handbook on the Cultural Formulation Interview Edited by Roberto Lewis-Fernández M.D. M.T.S. 2015-05-06 The Cultural Formulation Interview (CFI) is a product of the arduous process that resulted in publication of the DSM-5, and only one book—DSM-5 Handbook of the Cultural Formulation Interview—provides clinicians with the background and guidance they need to implement the CFI. The Handbook teaches the reader how to conduct a cultural assessment using the CFI, which consists of three types of semistructured interviews. Although the CFI was not designed to be the sole basis for making a clinical diagnosis, it can be used in research and clinical settings to enhance clinical understanding and decision making. The volume presents techniques to help providers situate their work within the context of a patient's culture to enhance communication—not only with those of different cultures but across all clinical encounters. Especially instructive are the supplemental videos that demonstrate application of the CFI components through the use of clinical vignettes. Clinicians will, of course, find the DSM-5® Handbook of the Cultural Formulation Interview indispensable, but administrators, policy makers, advocates, and other practitioners who work collaboratively to engage patients in the mental health care process will also value its clarity and comprehensiveness.

Bridging between Research and Practice Sara Hennessy 2014-04-03 This book presents a fresh approach to bridging the perceived gap between academic and classroom cultures. It describes a unique form of research partnership whereby Cambridge University academics and school teachers together grappled with and reformulated theory - through in-depth case studies analysing practice using interactive whiteboards in five subject areas. The inquiry exploited the collaborators' complementary professional knowledge bases. Teachers' voices are particularly audible in co-authored case study chapters. Outcomes included deeper insights into concepts of sociocultural learning theory and classroom dialogue, more analytical mindsets, sustained new practices and ways of working collegially. The book reflects upon the power of lesson video review and details how the co-inquirers negotiated "intermediate theory" - bridging educational theory and specific settings - framed in mutually accessible language and embodied in interactive multimedia resources for teacher development. These include video clips, analytic commentary from multiple perspectives, lesson materials, plus optional prompts for reflection and critique - not models of "best practice".

The resources make pedagogy explicit and vividly illustrate the book's ideas, offering theory-informed yet practical tools designed with and for practitioners. Hennessy and colleagues have tested a model of ongoing, teacher-led development and innovation, professional dialogue and classroom trialing stimulated by discussing selected multimedia resources. The book will interest academic and teacher researchers, initial teacher educators, professional development leaders, mentors, plus practitioners interested in using interactive whiteboards and dialogic teaching. It explores widening approaches to collegial development to reach educators working in other contexts (with and without technology). This could involve intermediate theory building or shortcutting by sharing and adapting the outcomes - springboarding teachers' further critique and professional learning. "I cannot recommend this book too highly ... it weaves a complex developmental story with a range of facets. It emphasises clearly the rigour of the research that was conducted, while demonstrating the complexity of the inter-relationships, practices and issues for both teachers and researchers in developing practical and theoretical knowledge. Its graphic insights through text and associated media provide exemplars for teachers and those who work with teachers as a rich resource. It shows us all what can be achieved and the means of achieving it." Prof. Barbara Jaworski, University of Loughborough

Faith, Life, and Learning Online Brant M. Himes 2022-04-08 Faith, Life, and Learning Online is an invitation for faith-based institutions to take bold steps toward integrating a holistic mission of spiritual formation into the online learning environment. For Christian higher education, faith integration is a matter of mission, not modality. Regardless of whether learning happens in the traditional classroom, through hybrid models, or exclusively online, Christian universities have a missional mandate to continue their long legacy of forming students of competence and character. While traditional campuses continue to provide unique and meaningful opportunities for students to grow in their faith, online learning has opened new avenues for engagement and development of spiritual formation. As such, all Christian higher education institutions are now called to take advantage of this unique technological moment to continue to offer transformative opportunities for the holistic integration of faith, life, and learning in the online environment.

Religion, Belief and Social Work Furness, Sheila 2009-11-18 This book examines how religion and related beliefs have varied impacts on the needs and perceptions of practitioners, service users, and the support networks available to them. The authors argue that social workers need to understand

these phenomena, so that they can become more confident in challenging discriminatory and oppressive practices. The centrality of religion and associated beliefs in the lives of many is emphasised, as are their potentially liberating (and potentially negative) impacts. In line with the Social Work in Practice series style, the book allows readers to explore issues in depth. It focuses on knowledge transmission, and the encouragement of critical reflection on practice. Each chapter is built around 'real-life' case scenarios using a problem-based learning approach. This book is the first to deal with social work and religion so comprehensively and will therefore be essential reading not only for social work students, but also for practitioners in a range of areas, social work academics and researchers in the UK and beyond.

An Analysis of Keith Thomas's Religion and the Decline of Magic Simon Young 2017-07-05 Keith Thomas's classic study of all forms of popular belief has been influential for so long now that it is difficult to remember how revolutionary it seemed when it first appeared. By publishing *Religion and the Decline of Magic*, Thomas became the first serious scholar to attempt to synthesize the full range of popular thought about the occult and the supernatural, studying its influence across Europe over several centuries. At root, his book can be seen as a superb exercise in problem-solving: one that actually established "magic" as a historical problem worthy of investigation. Thomas asked productive questions, not least challenging the prevailing assumption that folk belief was unworthy of serious scholarly attention, and his work usefully reframed the existing debate in much broader terms, allowing for more extensive exploration of correlations, not only between different sorts of popular belief, but also between popular belief and state religion. It was this that allowed Thomas to reach his famous conclusion that the advent of Protestantism - which drove out much of the "superstition" that characterised the Catholicism of the period - created a vacuum filled by other forms of belief; for example, Catholic priests had once blessed their crops, but Protestants refused to do so. That left farmers looking for other ways of ensuring a good harvest. It was this, Thomas argues, that explains the survival of what we now think of as "magic" at a time such beliefs might have been expected to decline - at least until science arose to offer alternative paradigms.

Being Christian in Education Hazel Bryan 2015-10-30 Experienced practitioners, theologians and academics reflect on the Christian voice as it engages in education today. At a time of national uncertainty for RE, questions about faith-based schools and the place of religious belief in the public arena, this volume is a resource for school and university teachers, head teachers, chaplains, governors, diocesan officers, concerned parents educationalists. It offers: • a frank discussion about the tensions in bringing faith into the open in current educational contexts. • theological reflection of Christian engagement in the public place • a creative exploration of the future for Christian engagement in education. It also considers the tensions inherent in practising Christian faith within a secular context and in multi-faith contexts. It aims to generate new confidence that will encourage the practice and contribution of faith-based thinking in schools.

Dialogue Concerning Natural Religion John Donaldson 2017-07-05 David Hume's *Dialogues Concerning Natural Religion* is a philosophical classic that displays a powerful mastery of the critical thinking skills of reasoning and evaluation. Hume's subject, the question of the existence and possible nature of God, was, and still is, a persistent topic of philosophical and theological debate. What makes Hume's text a classic of reasoning, though, is less what he says, than how he says it. As he noted in his preface to the book, the question of 'natural religion' was unanswerable: so 'obscure and uncertain' that 'human reason can reach no fixed determination with regard to it.' Hume chose, as a result, to cast his thoughts on the topic in the form of a dialogue - allowing different points of

view to be reasoned out, evaluated and answered by different characters. Considering and judging different or opposing points of view, as Hume's characters do, is an important part of reasoning, and is vital to building strong persuasive arguments. Even if, as Hume suggests, there can be no final answer to what a god might be like, *Dialogues Concerning Natural Religion* shows high-level reasoning and evaluation at their best.

Evolution Challenges Karl S. Rosengren 2012-04-25 This book goes beyond the science versus religion dispute to ask why evolution is so often rejected as a legitimate scientific fact, focusing on a wide range of cognitive, socio-cultural, and motivational factors that make concepts such as evolution difficult to grasp.

Maunder 2015-12-04 This book brings together the experiences of Anglo-American teachers and discusses some of the challenges which face teachers of nineteenth-century fiction, suggesting practical ways in which these might start to be overcome by considering the constantly changing canon, issues related to course design and the possibilities offered by film and ICT.

Blackstone's Handbook for Policing Students 2013 Sofia Graça 2012-09-06 *Blackstone's Handbook for Policing Students 2013* has been developed from the best-selling *Blackstone's Student Police Officer Handbook* to reflect the multitude of avenues into the police force now open to future police officers, from pre-entry courses to PCSOs and Specials. Designed specifically to meet the new requirements of police training, this book is a must-have for those embarking on a career in the police. Parts of initial police training common to all new entrants are easily identified and there are specific chapters on qualification structures and training and assessment, meeting the needs of students whether you are entering policing through pre-entry schemes or through an alternative qualification route. This new structure means it is possible for students to omit certain Parts of the Handbook whilst still meeting the mandatory requirements of the revised IPLDP Diploma in Policing. Divided into six parts, representing key stages in your progression from pre-entry programmes (where appropriate) in Parts 1 and 2, to initial training and then confirmation, the Handbook leads you through the topics, covering theory, discussion and practice while developing skills of analysis, problem solving and forms of reasoning. Coupled with a comprehensive and accessible style, the book ensures you have the knowledge and understanding necessary to undertake independent patrol in a professional and competent manner. Key topics covered include Stop, Search, and Entry; Alcohol and Drug Offences; Sexual Offences; Interviewing; and Intelligence. *Blackstone's Handbook for Policing Students 2013* is essential reading whether you are taking a pre-entry course or the IPLDP Diploma in Policing, looking to move on from your role as a PCSO or Special, or are involved within the security and law enforcement sector.

Pluralisation of Theologies at European Universities Wolfram Weiße 2020 This publication assumes that the modern context of plurality requires universities and higher education to support studying plural religious traditions in depth, giving due consideration to plural religious and secular perspectives, and providing opportunities for interaction between them. There are various ways to realise these aims. Success may be supported (or hindered) by various structures and concepts prevalent in universities or by different schools of thought on the nature of religions, on their relation to each other, and on their place in society. Religions and theologies can be studied in

parallel, in cooperation, in dialogue, or through integrative approaches. The differing theoretical positions and contextual conditions (institutional, social, political) within which (inter)religious learning takes place are an important focus of this publication, both for the possibilities they open up and the limitations they pose. This publication builds on the presentations and discussions of scholars participating at a conference at the University of Hamburg in December 2018, with some additional contributions from others in the field who were unable to attend in person.
