**Investment Appraisal** Uwe Götze 2007-12-22 This book presents a range of investment appraisal methods and models to help readers make good investment decisions. Each approach is thoroughly described, evaluated, and illustrated using examples, with its assumptions and limitations analyzed in terms of their implications for investment decision-making practice. Getting investment decisions right is crucial but due to a complex and dynamic business environment this remains a challenging management task.

**Capital Budgeting** Don Dayananda 2002-10-17 This book explains the financial appraisal of capital budgeting projects. The coverage extends from the development of basic concepts, principles and techniques to the application of them in increasingly complex and real-world situations. Identification and estimation (including forecasting) of cash flows, project appraisal formulae, and the application of net present value (NPV), internal rate of return (IRR) and other project evaluation criteria are illustrated with a variety of calculation examples. Risk analysis is extensively covered by the use of risk adjusted discount rate, certainty equivalent, sensitivity, simulation and Monte Carlo analysis. The NPV and IRR models are further applied to forestry, property and international investments. Resource constraints are introduced to the capital budgeting decisions with a variety of worked examples using linear programming technique. All calculations are extensively supported by Excel workbooks on the Web, and each chapter is well reviewed by end of chapter questions.

**Investment Appraisal** Uwe Götze 2015-03-18 This book provides an introduction to investment appraisal and presents a range of methods and models, some of which are not widely known, or at least not well covered by other textbooks. Each approach is thoroughly described, evaluated and illustrated using examples, with its assumptions and limitations analyzed in terms of their implications for investment decision-making practice. Investment decisions are of vital importance to all companies. Getting these decisions right is crucial but, due to a complex and dynamic business environment, this remains a challenging management task. Effective appraisal methods are valuable tools in supporting investment decision-making. As organisations continue to seek a competitive edge, it is increasingly important that management accountants and strategic decision-makers have a sound knowledge of these tools.

**Making Sense of Public Sector Investments** Courtney A. Smith 2001-01-01 This work addresses five core components of an investment appraisal: the strategic case; the economic case; commercial case; financial case; and the project management case. It provides a tried and tested decision making tool and supporting guidance to improve capital investment decisions, and includes many medical examples as well as lessons learnt from other public sector areas. The book is illustrated with case studies and contains checklists, templates, best practice tools and techniques. It offers practical, evidence-based guidance with answers to frequently asked questions, clear summaries and pointers to accessing further information.

**Fundamentals of Investment Appraisal** Stephen Lumby 2001 This new short text by the authors of Investment Appraisal and Financial Decisions

focuses on investment appraisal decisions. *Fundamentals of Investment Appraisal* examines the internal workings of a company rather than covering the much broader subject of financial management. Theory is illustrated with numerous worked examples, followed by a chapter summary, quick questions - all answered at the end of the book - and more detailed practice questions.

**Capital Budgeting** Sandeep Goel 2015-01-26 Capital budgeting is an important part of the financial management of a business organization. It is a process that business houses use to evaluate an investment project. The decision of whether to accept or deny an investment project is capital budgeting decision. Capital budgeting is important because it determines the long-term economic and financial profitability of any investment project. It lays down the future success of a business. Capital Budgeting aims to develop not only an understanding of the concepts of capital budgeting but also to provide its practical application to help students learn both theory and practice of capital budgeting used in the financial management of a business organization. It analyzes the capital budgeting practices of corporate enterprises in India in diverse sectors, on comparative basis, in order to provide the reader a better insight into the various issues and challenges regarding capital budgeting management.

*Investment Appraisal and Financial Decisions* Stephen Lumby 1999 This bestseller offers a complete introduction to financial management and corporate finance modules for a one-year university course. It is a relatively non-mathematical text and its simple explanations of a complex area have made it extremely popular with students. The author's educational and training expertise is reflected at every stage of the book: worked examples are given after each explanation, followed by a chapter summary, 'quickie' questions and more detailed practice questions. The 'quickie' are all answered at the back of the book and the accompanying teacher's manual contains answers to all the remaining questions.

**Investment Appraisal** Rob Dixon 1994-01-01 Investment decisions are important to the future of organizations. It is therefore crucial that, if managers are to make the right decisions, they should be knowledgeable about the techniques of investment appraisal and the consequences of its use. This updated edition converts theory into practice and shows managers how to increase the speed of their decision-making while gaining the best results. It includes discussion of traditional approaches, discounted cash flows, capital rationing and decision-making in conditions of risk and uncertainty.

*Capital Investment & Financing* Chris f Agar 2005-05-06 The requirement to maximise value for shareholders is at the core of any corporate investment or financing decision. The intrinsic value of proposed investments should be assessed before deciding how much capital to allocate; the benefits and risks associated with each available source of finance should be considered when capital is being raised; and capital, and any associated financial risks, should be managed in a way that continues to maximise value. At every stage, an analysis should be carried out to ensure the decision is optimal for shareholders and other capital providers. This book provides practical guidance on the application of financial evaluation techniques and methods (mainly covered in Appendices), as well as comprehensive coverage of traditional corporate finance topics, discussed in the context of capital investment, raising and management and financial risk management (using derivatives). Models, formulae and other quantitative techniques are illustrated in over 100 examples (using only basic mathematics). Topics discussed include the following: \* business appraisal using financial ratios \* corporate valuation (mainly discounted cash flow and real options) \* investment appraisal techniques \* acquisition structuring and evaluation \* the nature of loans and loan agreements \* features and pricing of bonds (straight and convertible) \* leasing (including leveraged leasing) \* equity raising (Initial Public Offerings) \* long and short term capital management \* basic pricing of derivatives (forwards, futures, options, swaps) \* interest rate and currency risk management using derivatives *Capital Investment & Financing* provides a comprehensive, in-depth coverage of concepts, methods and techniques involved when evaluating acquisitions and other investments, assessing financing opportunities, and managing capital. The core chapters provide practical guidance on key corporate finance topics; the Appendices contain more quantitative material, focusing on pricing techniques. Examples are used throughout, and an integrated case study (fictional) in the final Appendix uses many of the techniques discussed. \*Discusses all key areas of corporate investing and financing, focusing on key financial issues \*Concise, thorough and technical, it enables the reader to acquire knowledge effectively \*Can be used in everyday analysis and decision making

*Capital Budgeting and Long-term Financing Decisions* Neil Seitz 2005 This book was written primarily as a textbook in capital budgeting and long-term financing decisions and is appropriate for ... : a business school course dealing with long-term financial decisions, including both capital investments and long-term financing; a business school course focusing on capital investment decisions; an engineering school course focusing on capital investment decisions; desk reference for a manager involved in long-term financial decisions ... The students taking this course often will not have had a prior finance course. The first four chapters, which will serve primarily as a needed review for business students, will serve engineering students as the introduction to finance, strategy, and valuation principles that provide the foundation for optimal capital budgeting.-Pref.

**Valuation and Investment Appraisal** Ross Geddes 2002 · Highlights key elements of financial statements · Uses worked examples throughout A unique practitioner's insight into key aspects of corporate finance and treasury management. Focuses on the evaluation of investment decisions, by highlighting the key elements of financial statements and the ratios therein and their relevance to the financial analyst in the valuation of companies. This book uses worked examples to show just how financial statements and ratios can be interpreted, and different valuation methods can be employed, to assess the company's strategic position within its industry and evaluate its business and marketing plans to produce accurate financial forecasting. It also examines the main sources of finance available to companies and the impact of the type of finance raised on the valuation of investment.

*Fundamentals of Investment Appraisal* Martina Röhrich 2014-09-09 How to make sound investment decisions: *Fundamentals of Investment Appraisal*, 2nd edition, is based on long-term experience with students and is written in an easily understood style. A case study has been constructed to illustrate all methods discussed. The goal of the book is to pace a sure way through the variety of methods in investment appraisal. Mathematical basics are specifically explained in detail. The book shows clearly why there are different methods in investment appraisal and on where to focus in a given situation. As all methods are introduced by the same case study, it is easy to compare and evaluate the results. The statements in the text are further consolidated by abstracts and evaluations of each of the methods. Exercises with extensive solutions will lead to the confidence which is necessary for an ease of handling the investment appraisal techniques and for a good preparation for students' exams. German and international students at universities and other institutions of higher education will find this book an excellent systematic preparation for their exams.

**Mastering Corporate Finance Essentials** Stuart A. McCrary 2010-01-06 An essential guide to corporate finance Understanding corporate finance is a necessity for financial practitioners who struggle every day to find the right balance between maximizing corporate value and reducing a firm's financial risk. Divided into two comprehensive parts, *Mastering Corporate Finance Essentials* presents the material by example, using an extended scenario involving a new business formation. In Part One, present and future value mathematics are introduced followed by a number of applications using the tools. In Part Two, statistics as applied to finance are examined, with detailed discussions of standard deviations, correlations, and how they impact diversification. Through theory and real-world examples this book provides a solid grounding in corporate finance Other titles by Stuart McCrary include: *Mastering Financial Accounting Essentials*, *How to Create and Manage a Hedge Fund*, and *Hedge Fund Course* Covers the essential elements of this field, from traditional capital budgeting concepts and methods of valuing investment projects under uncertainty to the importance of "real-options" in the decision-making process This reliable resource offers a hands-on approach to corporate finance that will allow you to gain a solid understanding of this discipline.

Investment Appraisal and Financing Decisions Stephen Lumby 1988

*Managerial Judgement and Strategic Investment Decisions* Elaine Harris 2009-08-13 This book presents the findings from a cross-sectional survey funded by CIMA. The project aimed to survey senior management accountants working across a range of organisations and industries with a unique focus on the behavioural side of decision making, the use of managerial judgement. Previous capital budgeting surveys have tended to focus on the quantitative evaluation tools and techniques used for project appraisal. This study was broader in that it asked about every stage of the strategic investment decision (SID) process, from initiation to post implementation review, and how different managers were involved at different stages of the process. The focus is on how decision judgements are reached. • Explains Strategic Investment Decisions (SIDs) clearly to management accountants who are expected to be involved in decision making processes • Covers all stages of the SID process, the types of SID and how multiple managers participate in the process • Will help organisations benchmark their own SID practice

**Fundamentals Of Investment Appraisal** Stephen Lumby 2001

*Investment Decisions and the Logic of Valuation* Carlo Alberto Magni 2020-02-11 This book presents a new approach to the valuation of capital asset investments and investment decision-making. Starting from simple premises and working logically through three basic elements (capital, income, and cash flow), it guides readers on an interdisciplinary journey through the subtleties of accounting and finance, explaining how to correctly measure a project's economic profitability and efficiency, how to assess the impact of investment policy and financing policy on shareholder value creation, and how to design reliable, transparent, and logically consistent financial models. The book adopts an innovative pedagogical approach, based on a newly developed accounting-and-finance-engineering system, to help readers gain a deeper understanding of the accounting and financial magnitudes, learn about new analytical tools, and develop the necessary skills to practically implement them. This diverse approach to capital budgeting allows a sophisticated economic analysis in both absolute terms (values) and relative terms (rates of return), and is applicable to a wide range of economic entities, including real assets and financial assets, engineering designs and manufacturing schemes, corporate-financed and project-financed transactions, privately-owned projects and public investments, individual projects and firms. As such, this book is a valuable resource for a broad audience, including scholars and researchers, industry practitioners, executives, and managers, as well as students of corporate finance, managerial finance, engineering economics, financial management, management accounting, operations research, and financial mathematics. It features more than 180 guided examples, 50 charts and figures and over 160 explanatory tables that help readers grasp the new concepts and tools. Each chapter starts with an abstract and a list of the skills readers can expect to gain, and concludes with a list of key points summarizing the content.

Investment Appraisal Phil Holmes 1998 This text provides a focused introduction to the main elements of investment appraisal and decision making. Written in a style appropriate for the non-specialist, the main emphasis of the book is practical relevance using a variety of examples and questions to reinforce the principles. It should prove useful for anyone in business who faces any type of financial or financial-related decision making.
