Densità informativa Hanne Jansen 2003 TEXT IN ITALIAN. In a combined functional, cognitive and textual perspective and with focus on the contrastive aspect, the present study defines textual information density by the following three parameters; 1) the relation between explicit and implicit information; 2) the concrete elaboration of explicit and implicit density; 3) the relation between 'proper' information and the quantity of linguist material which codes textual and interpersonal information. This study also presents an analytical model in order to compare the information density of different texts. As empiric material the interlinguistic Mr Bean-corpus is used.

A Political History of National Citizenship and Identity in Italy, 1861-1950 Sabina Donati 2013-06-26 This book examines the fascinating origins and the complex evolution of Italian national citizenship from the unification of Italy in 1861 until just after World War II. It does so by exploring the civic history of Italians in the peninsula, and of Italy's colonial and overseas native populations. Using little-known documentation, Sabina Donati delves into the policies, debates, and formal notions of Italian national citizenship with a view to grasping the multi-faceted, evolving, and often contested vision(s) of italianità. In her study, these disparate visions are brought into conversation with contemporary scholarship pertaining to alienhood, racial thinking, migration, expansionism, and gender. As the first English-language book on the modern history of Italian citizenship, this work highlights often-overlooked precedents, continuities, and discontinuities within and between liberal and fascist Italies. It invites the reader to compare the Italian experiences with other European ones, such as French, British, and German citizenship traditions.

The World of a Renaissance Jew David B. Ruderman 1981-12-31 Within the Italian city states of the fifteenth and sixteenth centuries, a relatively high degree of mutual tolerance and tranquility existed between the enlightened Christian majority and the small Jewish minority. With the prevalence of favorable political, social, and economic circumstances for Jewish life in Italy, a considerable number of Jews participated freely in Renaissance culture while upholding an intense awareness of their own particular identity. This work is a study of the life and thought of one such Jew, Abraham b. Mordecai Farissol (1452-ca. 1528). While born in Avignon, Farissol spent most of his life in Italy close to the cultural centers of Renaissance society, primarily in Ferrara, but also in Mantua, Florence, and other Italian cities. As scribe, educator, cantor, communal leader, polemicist, Biblical exegete, and geographer, Farissol developed variegated interests and associations which provide exciting vantage points from which to view his cultural and social world. As one of the first comprehensive studies of any Italian Jewish figure of the period, this book represents an important contribution to an understanding of Jewish society and culture. But the significance of this study of Farissol's life extends beyond what can be learned about the man and his immediate community of co-religionists. Utilizing the life and thought of one person, it explores and explicates the dialogue between Judaism and the culture of the Italian Renaissance. Despite its intrinsic interest, Jewish intellectual history in the Renaissance has remained an underdeveloped field. Many sources still remain unexamined; monographs on specific themes and figures have yet to be written. David Ruderman's study breaks new ground by making use of extensive, yet previously unpublished sources on Farissol and his society and by integrating

them into the broader context of Jewish and Renaissance culture. The work is of particular interest to historians of the Jews and of Renaissance Italy. It also offers the general reader an excellent case study of the symbiotic relationship between Western culture and its Jewish minority in one of the most fertile periods of European civilization. In dramatic fashion it illustrates how Jews not only survived but creatively flourished in a pluralistic setting by appropriating from the outside new forms and ideas which they integrated into their own vital cultural experience.

Language Creativity Simone Casini 2020-11-03 In Language Creativity: A Semiotic Perspective, Simone Casini aims to frame the concept of creativity within a linguistic dimension by developing a theoretical reflection with constant references to contact languages and to the educational plan. Semiotic creativity abandons the condition of the linguistic property *inter pares* and rises to the rank of theoretical and first principle by which languages define themselves, function and interact in the negotiation of meaning in relation to the social uses. Casini considers creativity as a premise for the rule changing of boundaries of meaning and creation of language and meaning. The work progresses starting from the historical-critical concept of creativity, discussing the most philosophical and linguistic theories in the North American and European context.

In Measure, Number, and Weight Jens Høyrup 1994-01-01 Jens Hoyrup, recognized as the leading authority in social studies of pre-modern mathematics, here provides a social study of the changing mode of mathematical thought through history. His "anthropology" of mathematics is a unique approach to its history, in which he examines its pursuit and development as conditioned by the wider social and cultural context. Hoyrup moves from comparing features of Sumero-Babylonian, Mesopotamian, Ancient Greek, and Latin Medieval mathematics, to examining the character of Islamic practitioners of mathematics. He also looks at the impact of ideologies and philosophy on mathematics from Latin High Middle ages through the late Renaissance. Finally, he examines modern and contemporary mathematics, drawing out recurring themes in mathematical knowledge.

Trilingual Joyce Patrick O'Neill 2018-04-13 Trilingual Joyce is a detailed comparative study of James Joyce's personal involvement in both French and Italian translations of the iconic 1928 text *Anna Livia Plurabelle*, which later became the eighth chapter of *Finnegans Wake*. Considered to be completely untranslatable at the time of its publication, the translation of *Anna Livia Plurabelle* represented a fascinating challenge to Joyce, who collaborated in experimental renderings of the text, first into French and later into Italian. Patrick O'Neill's Trilingual Joyce is the first comparative study of all three of the *Anna Livia Plurabelle* variations, and fills a long-standing gap in Joyce studies. O'Neill, an Irish-born professor who has written widely on texts in translation, also discusses in detail the avant-garde novelist and playwright Samuel Beckett's contribution as a young man to the French rendering of *Anna Livia Plurabelle*.

The Discourse of Italian Cinema and Beyond Roberta Piazza 2010-12-16 Roberta Piazza's book is a linguistic investigation of the dialogue of Italian cinema covering a selection of films from the 1950s to the present day. It looks at how speech is dealt with in studies of the cinema and tackles the lack of engagement with dialogue in film studies. It explores the representation of discourse in cinema -- the way particular manifestations of verbal interaction are reproduced in film. Whereas 'representation' generally refers to the language used in texts to assign meaning to a group and its social practices, here discourse representation more directly refers to the relationship between real-life and cinematic discourse. Piazza analyses how fictional dialogue reinterprets authentic interaction in order to construe particular meanings. Beginning by exploring the relationship between discourse and genre, the second half of the book takes a topic-based approach and reflects on the themes of narrative and identity. The analysis carried out takes on board the multi-semiotic and multimodal components of film discourse. The book uses also uses concepts and methodologies from pragmatics, conversation analysis and discourse analysis.

Voicing the Word Marina Spunta 2004 Drawing on the recent renewal of interest in the debate on orality and literacy this book investigates the varying perceptions and representations of orality in contemporary Italian fiction, providing a fresh perspective on this rich and fast-developing debate and on the study of the Italian literary language. The book brings together a number of complementary approaches to orality from the fields of linguistics, literary and media studies and offers a detailed analysis of a broad variety of authors and texts that appeared over the last three decades - ranging from internationally acclaimed writers such as Celati, Duranti and Tabucchi, through De Luca and Baricco, to the latest generation of writers, such as Campo, Ballestra and Nove. By exploring the complementary facets of Italian orality, and its diachronical developments since the

seventies, this study questions the traditionally dichotomic approach to the study of orality and literacy and posits a more flexible, cross-modal approach that accounts for the increasing hybridisation of text forms and media and for the greater interaction between the spoken and the written as well as their representations.

Interactions between Orality and Writing in Early Modern Italian Culture Luca Degl'Innocenti 2016-03-02 Investigating the interrelationships between orality and writing in elite and popular textual culture in early modern Italy, this volume shows how the spoken or sung word on the one hand, and manuscript or print on the other hand, could have interdependent or complementary roles to play in the creation and circulation of texts. The first part of the book centres on performances, ranging from realizations of written texts to improvisations or semi-improvisations that might draw on written sources and might later be committed to paper. Case studies examine the poems sung in the piazza that narrated contemporary warfare, commedia dell'arte scenarios, and the performative representation of the diverse spoken languages of Italy. The second group of essays studies the influence of speech on the written word and reveals that, as fourteenth-century Tuscan became accepted as a literary standard, contemporary non-standard spoken languages were seen to possess an immediacy that made them an effective resource within certain kinds of written communication. The third part considers the roles of orality in the worlds of the learned and of learning. The book as a whole demonstrates that the borderline between orality and writing was highly permeable and that the culture of the period, with its continued reliance on orality alongside writing, was often hybrid in nature.
