The Creation of Feminist Consciousness Gerda Lerner 1993 "In its emphasis on the force of ideas, the struggle of women for inclusion in the concept of the Divine, the repeated attempts by women to form supportive networks, and its analysis of the preconditions for the formation of political theories of liberation, this brilliant work charts new ground for historical studies, the history of ideas, and feminist theory."--Jacket.

Material Cultures Daniel Miller 1998-02-17 The field of material culture, while historically well established, has recently enjoyed something of a renaissance. Methods once dominated by Marxist- and commodity-oriented analyses and by the study of objects as symbols are giving way to a more ethnographic approach to artifacts. This orientation is the cornerstone of the essays presented in *Material Cultures*. A collection of case studies which move from the domestic sphere to the global arena, the volume includes examinations of the soundscape produced by home radios, catalog shopping, the role of paper in the workplace, and the relationship between the production and consumption of Coca-Cola in Trinidad. The diversity of the essays is mediated by their common commitment to ethnography with a material focus. Rather than examine objects as mirages of media or language, *Material Cultures* emphasizes how the study of objects not only contributes to an understanding of artifacts but is also an effective means for studying social values and contradictions.

The Dare Harley Laroux 2021-01-26 Warning: This erotica contains scenes and elements that may be disturbing to some readers. Please review the full content warning below. Jessica Martin is not a nice girl. As Prom Queen and Captain of the cheer squad, she'd ruled her school mercilessly, looking down her nose at everyone she deemed unworthy. The most unworthy of them all? The "freak," Manson Reed: her favorite victim. But a lot changes after high school. A freak like him never should have ended up at the same Halloween party as her. He never should have been able to beat her at a game of Drink or Dare. He never should have been able to humiliate her in front of everyone. Losing the game means taking the dare: a dare to serve Manson for the entire night as his slave. It's a dare that Jessica's pride - and curiosity - won't allow her to refuse. What ensues is a dark game of pleasure and pain, fear and desire. Is it only a game? Only revenge? Only a dare? Or is it something more? This book contains intense fantasy scenes of hard kinks/edgeplay, graphic sex, and harsh language. It is intended only for an adult audience. Beware: this is a dark, weird, kinky read. The activities depicted therein are dangerous and are not meant to be an example of realistic BDSM. Reader discretion is advised. Kinks/Fetishes within: erotic humiliation, fearplay, painplay, knifeplay, consensual non-consent (CNC), orgasm denial, boot worship, spanking, crying, blowjobs, clowns, group sexual activities, spit, bondage, public play, bloodplay.

On Horseback Through Asia Minor Fred Burnaby 1877 Burnaby was a captain in the British Army who spent his winter leave of absence of 1876 riding 2000 miles through Asiatic Turkey, on the eve of the Russo-Turkish War. Burnaby questioned everyone he met regarding the imminent war; the author believed, from the impressions of his informants, that the Ottoman Empire would probably lose. By the time he published the account the Turkish Army had "gallantly withstood their foe. My reasons for arriving

at the above-mentioned opinion will be found in these volumes. They merely contain a sort of verbal photograph ... of what I saw and heard during the journey."

Chemical Principles of Textile Conservation Agnes Timar-Balazsy 2012-09-10 'Chemical Principles of Textile Conservation' provides must-have knowledge for conservators who do not always have a scientific background. This vital book brings together from many sources the material science necessary to understand the properties, deterioration and investigation of textile artefacts. It also aids understanding of the chemical processes during various treatments, such as: cleaning; humidification; drying; disinfestation; disinfection; and the use of adhesives and consolidants in conservation of historical textiles. Textile conservators will now have ready access to the necessary knowledge to understand the chemistry of the objects they are asked to treat and to make informed decisions about how to preserve textiles. The combination of a chemist and a conservator provides the perfect authorial team. It ensures a unique dual function of the text which provides textile conservators with vital chemical knowledge and gives scientists an understanding of textile conservation necessary to direct their research. The many practical examples and case studies illustrate the utility of the relatively large chemical introduction and the essential chemical information which is included. The case studies, many illustrated in colour, range from the treatment of the Ghandis' clothes, high-altitude flying suits and a Mary Quant raincoat, to the Hungarian Coronation Mantle.

The Culture of Speed John Tomlinson 2007-09-27 "John Tomlinson's book is an invitation to an adventure. It contains a

precious key to unlock the doors into the unmapped and unexplored cultural and ethical condition of 'immediacy'. Without this key concept from now on it will not be possible to make sense of the social existence of our times and its ambivalences." - Ulrich Beck, University of Munich "A most welcome, stimulating and challenging exploration of the cultural impact and significance of speed in advanced modern societies. It successfully interweaves theoretical discourse, historical and contemporary analyses and imaginative use of literary sources, all of which are mobilised in order to provide an original, intellectually rewarding and critical account of the changing significance of speed in our everyday experience." - David Frisby, London School of Economics and Political Science

Is the pace of life accelerating? If so, what are the cultural, social, personal and economic consequences? This stimulating and accessible book examines how speed emerged as a cultural issue during industrial modernity. The rise of capitalist society and the shift to urban settings was rapid and tumultuous and was defined by the belief in 'progress'. The first obstacle faced by societies that were starting to 'speed up' was how to regulate and control the process. The attempt to regulate the acceleration of life created a new set of problems, namely the way in which speed escapes regulation and rebels against controls. This pattern of acceleration and control subsequently defined debates about the cultural effects of acceleration. However, in the 21st century 'immediacy', the combination of fast capitalism and the saturation of the everyday by media technologies, has emerged as the core feature of control. This coming of immediacy will inexorably change how we think about and experience media culture, consumption practices, and the core of our cultural and moral values. Incisive and richly illustrated, this eye-opening account of speed and culture provides an original guide to one of the central features of contemporary culture and everyday life.

But when a wealthy socialite is murdered, Jessie, assigned the case, finds herself back in the world of picture-perfect suburbia, hunting a deranged killer amidst the false facades of normalcy and sociopathic women. Jessie, thriving again in downtown LA, is sure she's moved on from her suburban nightmare. Ready to put her failed marriage behind her, she lands a job with the local police department,

deferring her acceptance to the FBI's Academy. She is assigned a straightforward murder in a wealthy neighborhood, a simple case to start her career. But little do her bosses know, there's more to the case than anyone suspected. Nothing can prepare her for her first case, one that will force her to probe the minds of the wealthy, suburban couples she'd thought she'd left behind. The Language of Things: Understanding the World of Desirable Objects Deyan Sudjic 2009-06-01 A brilliant exposé of the interaction between art, design, and commerce. In *The Language of Things*, the director of London's Design Museum charts our relationship with all things designed. With scintillating wit and an eye for the pleasures and dangers of rampant consumerism, Deyan Sudjic takes us from luxury car commercials to glossy advertisements for seasonal variations of the Prada purse to the hype surrounding the latest version of the iPhone, exploring how we are manipulated and seduced by our possessions. Who would've thought that it's the subtle visual similarity between the Volkswagen Golf GTI and the barrel of an automatic pistol that makes people want to get behind the wheel? And why is it that digital cameras in cell phones "click" even though they don't have a shutter? Sudjic's illuminating argument will resound with anyone who has ever been affected by how things look—lured, in other words, by the powerful siren call of design.

The Perfect House (A Jessie Hunt Psychological Suspense Thriller—Book Three) Blake Pierce 2019-04-30 In *THE PERFECT HOUSE* (Book #3), criminal profiler Jessie Hunt, 29, fresh from the FBI Academy, returns to find herself hunted by her

A fast-paced psychological suspense thriller with unforgettable characters and heart-pounding suspense, *THE PERFECT HOUSE* is book #3 in a riveting new series that will leave you turning pages late into the night. Book #4 in the Jessie Hunt series is also now available!

Style and Ideology in Translation Jeremy Munday 2013-05-24

Adopting an interdisciplinary approach, this book investigates the style, or 'voice,' of English language translations of twentieth-century Latin American writing, including fiction, political speeches, and film. Existing models of stylistic analysis, supported at times by computer-assisted analysis, are developed to examine a range of works and writers, selected for their literary, cultural, and ideological importance. The style of the different translators is subjected to a close linguistic investigation within their cultural and ideological framework.

Perilous Chastity Laurinda S. Dixon 2019-01-24 Bearing such titles as *The Doctor's Visit* or *The Lovesick Maiden*, certain seventeenth-century Dutch paintings are familiar to museum browsers: an attractive young woman—well dressed, but pale and listless—reclines in a chair, languishes in bed, or falls to the floor in a faint. Weathered crones or impish boys leer suggestively in the background. These paintings traditionally have been viewed as commentary on quack doctors or unmarried pregnant women. The first book to examine images of women and illness in the light of medical history, *Perilous Chastity* reveals a surprising new interpretation. In an engaging analysis enhanced by abundant illustrations—including eight pages of color plates—Laurinda S. Dixon shows how paintings reflect changing medical theories concerning women. While she illuminates a tradition stretching from antiquity to the present, she concentrates on art from the

thirteenth through the eighteenth centuries, and particularly on paintings from seventeenth-century Leiden. Dixon suggests how the assumptions of a predominantly male medical establishment have influenced prevailing notions of women's social place. She traces the evolution of the belief that women's illnesses were caused by "hysteria," so named in ancient Greece after the notion that the uterus had a tendency to wander in the body. All women were considered prone to hysteria—strong emotions, idleness, intellectual activity, or unladylike pursuits could cause it—but it was most commonly diagnosed among celibates. Analyzing paintings of women's sickrooms by Jan Steen, Dirck Hals, Gabriel Metsu, Jacob Ochtervelt, Godfried Schalcken, Samuel van Hoogstraten, and Franz van Mieris, Dixon perceives metaphoric identifications of the womb as the source of illness. She also documents changing fashions in cures for hysteria and discusses allusions to the debilitating effects of women's passions not only in paintings, but also in madrigals by John Dowland and Henry Purcell. In conclusion, Dixon argues that her study has strong ramifications of attitudes towards women and illness today. She takes up images in twentieth-century culture as well and calls attention to a resurgence of female "hysteria" after World War II.

Collaboration and Networking in Education Daniel Muijs
2011-01-04 Collaboration and networking have recently come to the fore as major school improvement strategies in a number of countries. A variety of initiatives, from government and other agencies, have encouraged collaboration and led to a lot of practical activity in this area. However, at present there are no texts in education that explore collaboration and networking from both a theoretical and practical perspective. In this book, we aim to provide a theoretical background to educational collaboration, drawing on research and theory in policy studies, psychology and sociology, leading ultimately to a typology of networks. This theoretical base will be tested in the discussion of a number of case studies referring to specific initiatives such as the

Federations programme, multi-agency collaboration and Networked Learning Communities. Lessons for practice will be drawn and presented in terms of factors internal and external to the school. The key issue of network leadership will be addressed here as well.

The Mangle in Practice Andrew Pickering 2009-01-14 In *The Mangle of Practice* (1995), the renowned sociologist of science Andrew Pickering argued for a reconceptualization of research practice as a “mangle,” an open-ended, evolutionary, and performative interplay of human and non-human agency. While Pickering’s ideas originated in science and technology studies, this collection aims to extend the mangle’s reach by exploring its application across a wide range of fields including history, philosophy, sociology, geography, environmental studies, literary theory, biophysics, and software engineering. *The Mangle in Practice* opens with a fresh introduction to the mangle by Pickering. Several contributors then present empirical studies that demonstrate the mangle’s applicability to topics as diverse as pig farming, Chinese medicine, economic theory, and domestic-violence policing. Other contributors offer examples of the mangle in action: real-world practices that implement a self-consciously “mangle-ish” stance in environmental management and software development. Further essays discuss the mangle as

philosophy and social theory. As Pickering argues in the preface, the mangle points to a shift in interpretive sensibilities that makes visible a world of de-centered becoming. This volume demonstrates the viability, coherence, and promise of such a shift, not only in science and technology studies, but in the social sciences and humanities more generally. Transformation Reconstruction 2 Shingo Sato 2014-09-15 The second volume of Shingo Sato's pattern design theories and designs.

Kinetic Garment Construction Rickard Lindqvist 2015-03-27 Fashion designers are presented with a range of methods and concepts for pattern cutting are presented, the main body of

these methods, both traditional and contemporary, is predominately based on a theoretical approximation of the body that is derived from horizontal and vertical measurements of the body in an upright position: the tailoring matrix. As a consequence, there is a lack of interactive and dynamic qualities in methods connected to this paradigm of garment construction, from both expressional and functional perspectives. This work proposes and explores an alternative paradigm for pattern cutting that includes a new theoretical approximation of the body as well as a more kinetic method for garment construction that, unlike the prevalent theory and its related methods, takes as its point of origin the interaction between the anisotropic fabric and the biomechanical structure of the body. As such, the research conducted here is basic research, aiming to identify fundamental principles for garment construction. Based on some key principles found in the works of Geneviève Sevin-Doering and in pre-tailoring methods for constructing garments, the proposed theory for - and method of - garment construction was developed through concrete experiments by cutting and draping fabrics on live models. Instead of a static matrix of a non-moving body, the result is a kinetic construction theory of the body that is comprised of balance directions and key biomechanical points, along with an alternative draping method for dressmaking. This methodology challenges the fundamental relationship between dress, garment construction, and the body, working from the body outward, as opposed to the methods that are based on the prevalent paradigm of the tailoring matrix, which work from the outside toward the body. This alternative theory for understanding the body and the proposed method of working allows for diverse expressions and enhanced functional possibilities in dress.

A History of Reading in the West Guglielmo Cavallo 1999

Literature has not always been written in the same ways, nor has it been received or read in the same ways over the course of

Western civilization. Cavallo (Greek palaeography, U. of Rome La Sapienza), Chartier (Ecole des Hautes Etudes en Sciences Sociales, Paris) and a number of other international contributors, address themes that highlight the transformation of reading methods and materials over the ages, such as the way texts in the Middle Ages were often written with the voice in mind, as they would have been read aloud, or even sung. Articles explore the innovations in the physical evolution of the book, as well as the growth and development of a broad-based reading public.

Rethinking Curating Beryl Graham 2015-08-21 Redefining curatorial practice for those working with new kinds of art. As curator Steve Dietz has observed, new media art is like contemporary art—but different. New media art involves interactivity, networks, and computation and is often about process rather than objects. New media artworks are difficult to classify according to the traditional art museum categories determined by medium, geography, and chronology and present the curator with novel challenges involving interpretation, exhibition, and dissemination. This book views these challenges as opportunities to rethink curatorial practice. It helps curators of new media art develop a set of flexible tools for working in this fast-moving field, and it offers useful lessons from curators and artists for those working in such other areas of art as distributive and participatory systems. The authors, both of whom have extensive experience as curators, offer numerous examples of artworks and exhibitions to illustrate how the roles of curators and audiences can be redefined in light of new media art's characteristics. *Rethinking Curating* offers curators a route through the hype around platforms and autonomous zones by following the lead of current artists' practice.
