**Mashup Patterns** Michael Ogrinz 2009-03-18 Indispensable Patterns and Insights for Putting Mashups to Work in Enterprise Environments Using new mashup tools and technologies, enterprise developers can impose their own APIs on everything from Web sites and RSS feeds to Excel and PDF files—transforming a world of content into their own customized information source. In *Mashup Patterns*, Michael Ogrinz applies the concept of software development patterns to mashups, systematically revealing the right ways to build enterprise mashups and providing useful insights to help organizations avoid the mistakes that cause mashups to fail. Drawing on extensive experience building business-critical mashups, Ogrinz offers patterns and realistic guidance for every stage of the mashup development lifecycle and addresses the key issues developers, architects, and managers will face. Each pattern is documented with a practical description, specific use cases, and crucial insights into the stability of mashups built with it. Ogrinz concludes by presenting twelve start-to-finish case studies demonstrating mashup patterns at work in actual enterprise settings. Coverage includes: Understanding the relationships among mashups, portals, SOA, EAI/EII, and SaaS Exploring core mashup activities such as data management, surveillance, clipping, transformation, enrichment, publication, and promotion Optimizing security, privacy, accessibility, usability, and performance Managing mashup development, from planning and governance through integration, testing, and deployment Enhancing basic mashups with search, language translation, workflow support, and other improvements Performing effective load and regression testing Avoiding “anti-patterns” that cause enterprise mashups to fail Also of interest: The companion book, *Mashups: Strategies for the Modern Enterprise* by J. Jeffrey Hanson (Addison-Wesley), is an indispensable guide to designing, implementing, and debugging an enterprise mashup, offering sample code to illustrate key concepts.

Sistemi Informativi Integrati per la tutela, la conservazione e la valorizzazione del Patrimonio Architettonico Urbano Stefano Brusaporci 2016-01-03T00:00:00+01:00 Il Novecento ci ha consegnato una interessante evoluzione del concetto stesso di bene culturale architettonico e urbano, dalla identificazione selettiva del monumento alla contestualizzazione del monumento, alla monumentalizzazione del contesto (ambiente naturale, manufatti storici, stratificazione storica degli usi antropici del territorio). Tale evoluzione ha arricchito e dilatato in misura significativa il campo di interesse in ordine alle azioni di tutela, conservazione e valorizzazione dei beni. Il progetto di conservazione del bene storico-architettonico, nella accezione attuale, si pone in alternativa all'intervento (straordinario) di restauro classicamente inteso, riferendosi, secondo la impostazione teorico-metodologica del restauro preventivo, piuttosto all'intervento (ordinario) di manutenzione e di conservazione programmata. Tali presupposti implicano una ampia, interdisciplinare e organizzata base conoscitiva, mirata allo specifico architettonico in tutti i suoi aspetti (storici, formali, figurativi, simbolici, costruttivi, funzionali...) e anche nella sua realtà contestuale urbana e ambientale, in grado di selezionare e orientare le scelte operative. Conoscenza finalizzata certamente al progetto, ma anche alla diagnostica, al monitoraggio del cantiere e al check up continuo dell'edificio nel tempo. Si esige dunque la possibilità e la capacità di gestire, in maniera visuale, relazionata e dinamica, una notevole massa di informazioni, peraltro fortemente eterogenea per caratteristiche proprie e per formati. Il programma di ricerca si propone di fornire un contributo innovativo in ordine alla definizione delle modalità organizzative e procedurali mirate alla costruzione di data base integrati, finalizzati alla documentazione, e alle azioni di tutela, conservazione e valorizzazione del patrimonio architettonico e urbano, nonché al loro utilizzo da parte degli Enti pubblici territoriali e di operatori tecnico-professionali. Il campo di indagine è lo specifico architettonico, nella sua relazione contestuale urbana, e la città storicizzata, nel suo insieme, quale risultato del processo storico di formazione e trasformazione sino all'attualità. I casi di studio sono individuati da ciascuna Unità di ricerca in riferimento al proprio territorio di ambito. Un significativo contributo su una tematica di permanente attualità, atteso che la emergenza del terremoto ha drammaticamente riproposto la carenza di conoscenza sistemica, organizzata e finalizzata, dei beni storico-architettonici presenti sul territorio. Il volume è a cura di Mario Centofanti con il coordinamento scientifico di Anna Marotta, Roberto Mingucci, Michela Cigola, Elena Ippoliti.

Speech and Corpora** Heliana Mello 2012 The 7th International Conference of the Gruppo di Studi sulla Comunicazione Parlata, dedicated to the memory of Claire Blanche-Benveniste, chose as its main theme Speech and Corpora. The wide international origin of the 235 authors from 21 countries and 95 institutions led to papers on many different languages. The 89 papers of this volume reflect the themes of the conference: spoken corpora compilation and annotation, with the technological connected fields; the relation between prosody and pragmatics; speech pathologies; and different papers on phonetics, speech and linguistic analysis, pragmatics and sociolinguistics. Many papers are also dedicated to speech and second language studies. The online publication with FUP allows direct access to sound and video linked to papers (when downloaded).

Competences for democratic culture Council of Europe 2016-04-04 A new Council of Europe reference framework of competences for democratic culture! Contemporary societies within Europe face many challenges, including declining levels of voter turnout in elections, increased distrust of politicians, high levels of hate crime, intolerance and prejudice towards minority ethnic and religious groups, and increasing levels of support for violent extremism. These challenges threaten the legitimacy of democratic institutions and peaceful co-existence within Europe. Formal education is a vital tool that can be used to tackle these challenges. Appropriate educational input and practices can boost democratic engagement, reduce intolerance and prejudice, and decrease support for violent extremism. However, to achieve these goals, educationists need a clear understanding of the democratic competences that should be targeted by the curriculum. This book presents a new conceptual model of the competences which citizens require to participate in democratic culture and live peacefully together with others in culturally diverse societies. The model is the product of intensive work over a two-year period, and has been strongly endorsed in an international consultation with leading educational experts. The book describes the competence model in detail, together with the methods used to develop it. The model provides a robust conceptual foundation for the future development of curricula, pedagogies and assessments in democratic citizenship and human rights education. Its application will enable educational systems to be harnessed effectively for the preparation of students for life as engaged and tolerant democratic citizens. The book forms the first component of a new Council of Europe reference framework of competences for democratic culture. It is vital reading for all educational policy makers and practitioners who work in the fields of education for democratic citizenship, human rights education and intercultural education.

**Progettare una base di dati. Dalle specifiche informali alle tabelle** Linda Martorini 2020-06-01 Questo libro si rivolge a coloro che si accostano

per la prima volta alle basi di dati, ed ha lo scopo di aiutare ad affrontare i problemi pratici che devono essere affrontati da tutti coloro che hanno a che fare con un database. Il materiale presente nel libro prende spunto dalle esercitazioni effettuate nell'ambito del modulo di Basi di dati all'interno del corso di Algoritmi e basi di dati (Corso di Studio in Ingegneria Informatica) e viene qui affrontato in forma ampliata, riveduta e corretta al fine di facilitare la progettazione e l'interrogazione di basi di dati. Nel capitolo finale viene presentato anche un esempio di progettazione di base di dati completamente svolto, a partire dalle specifiche a parole del progetto fino allo schema logico della base di dati stessa.

*World Development Report 2019* World Bank 2018-10-31 Work is constantly reshaped by technological progress. New ways of production are adopted, markets expand, and societies evolve. But some changes provoke more attention than others, in part due to the vast uncertainty involved in making predictions about the future. The 2019 World Development Report will study how the nature of work is changing as a result of advances in technology today. Technological progress disrupts existing systems. A new social contract is needed to smooth the transition and guard against rising inequality. Significant investments in human capital throughout a person's lifecycle are vital to this effort. If workers are to stay competitive against machines they need to train or retool existing skills. A social protection system that includes a minimum basic level of protection for workers and citizens can complement new forms of employment. Improved private sector policies to encourage startup activity and competition can help countries compete in the digital age. Governments also need to ensure that firms pay their fair share of taxes, in part to fund this new social contract. The 2019 World Development Report presents an analysis of these issues based upon the available evidence.

**Use Case Driven Object Modeling with UML Theory and Practice** Don Rosenberg 2008-06-28 Diagramming and process are important topics in today's software development world, as the UML diagramming language has come to be almost universally accepted. Yet process is necessary; by themselves, diagrams are of little use. Use Case Driven Object Modeling with UML - Theory and Practice combines the notation of UML with a lightweight but effective process - the ICONIX process - for designing and developing software systems. ICONIX has developed a growing following over the years. Sitting between the free-for-all of Extreme Programming and overly rigid processes such as RUP, ICONIX offers just enough structure to be successful.

**Computer Systems Experiences of Users with and Without Disabilities** Simone Borsci 2013-11-18 This book provides the necessary tools for the evaluation of the interaction between the user who is disabled and the computer system that was designed to assist that person. The book creates an evaluation process that is able to assess the user's satisfaction with a developed system. Presenting a new theoretical perspective in the human computer interaction evaluation of disabled persons, it takes into account all of the individuals involved in the evaluation process.

**Guide to the Software Engineering Body of Knowledge (Swebok(r))** IEEE Computer Society 2014 In the Guide to the Software Engineering Body of Knowledge (SWEBOK(R) Guide), the IEEE Computer Society establishes a baseline for the body of knowledge for the field of software engineering, and the work supports the Society's responsibility to promote the advancement of both theory and practice in this field. It should be noted that the Guide does not purport to define the body of knowledge but rather to serve as a compendium and guide to the knowledge that has been developing and evolving over the past four decades. Now in Version 3.0, the Guide's 15 knowledge areas summarize generally accepted topics and list references for detailed information. The editors for Version 3.0 of the SWEBOK(R) Guide are Pierre Bourque (Ecole de technologie superieure (ETS), Universite du Quebec) and Richard E. (Dick) Fairley (Software and Systems Engineering Associates (S2EA)).

**Computer Science** National Research Council 2004-10-06 Computer Science: Reflections on the Field, Reflections from the Field provides a concise characterization of key ideas that lie at the core of computer science (CS) research. The book offers a description of CS research recognizing the richness and diversity of the field. It brings together two dozen essays on diverse aspects of CS research, their motivation and results. By describing in accessible form computer science's intellectual character, and by conveying a sense of its vibrancy through a set of examples, the book aims to prepare readers for what the future might hold and help to inspire CS researchers in its creation.

**Reinventing Giants** Bill Fischer 2013-03-07 A compelling profile of an emerging Chinese competitor Chinese firms are reinventing their business models, their corporate cultures, and themselves, becoming global competitors who increasingly offer knowledge rather than cheap labour in their quest to join the ranks of the "world's best" companies. This book offers a compelling profile of the most ambitious of these emerging Chinese competitors, the Haier Corporation (the world's largest manufacturer of home appliances), and shares insights on how one organization has repeatedly reinvented its business model and corporate culture in an effort to sustain its success. Reinventing Giants provides an exclusive look within the Haier Corporation and shows how managerial accountability and responsibility have been repositioned at every level of the organization, with the core value of market-centricity, while aligning strategy on each level of management. It includes actual work reports that show this process in detail from the ground up. The authors emphasize how a belief in the liberation of employee talent has consistently been the driving force underlying Haier's success. Includes the remarkable story of Haier's turnaround and how these lessons can be applied to other organizations Contains information for any company grappling with competition in the global marketplace Shows how to liberate employees' talent to drive business success Written by Bill Fischer, Professor of Innovation Management at IMD in Switzerland, Umberto Lago, Professor of Management at Bologna University, Italy, and Fang Liu, Research Associate of IMD Reinventing Giants helps global managers rethink their own business models and accompanying corporate cultures in order to be able to apply Haier's lessons directly to their own organizations.

*The Startup Owner's Manual* Steve Blank 2020-03-17 More than 100,000 entrepreneurs rely on this book. The National Science Foundation pays hundreds of startup teams each year to follow the process outlined in the book, and it's taught at Stanford, Berkeley, Columbia and more than 100 other leading universities worldwide. Why? The Startup Owner's Manual guides you, step-by-step, as you put the Customer Development process to work. This method was created by renowned Silicon Valley startup expert Steve Blank, co-creator with Eric Ries of the "Lean Startup" movement and tested and refined by him for more than a decade. This 608-page how-to guide includes over 100 charts, graphs, and diagrams, plus 77 valuable checklists that guide you as you drive your company toward profitability. It will help you: Avoid the 9 deadly sins that destroy startups' chances for success Use the Customer Development method to bring your business idea to life Incorporate the Business Model Canvas as the organizing principle for startup hypotheses Identify your customers and determine how to "get, keep and grow" customers profitably Compute how you'll drive your startup to repeatable, scalable profits. The Startup Owners Manual was originally published by K&S Ranch Publishing Inc. and is now available from Wiley. The cover, design, and content are the same as the prior release and should not be considered a new or updated product.

*Beginning PHP, Apache, MySQL Web Development* Michael K. Glass 2004-03-01 What is this book about? PHP, Apache, and MySQL are the three key open source technologies that form the basis for most active Web servers. This book takes you step-by-step through understanding each — using it and combining it with the other two on both Linux and Windows servers. This book guides you through creating your own sites using the open source AMP model. You discover how to install PHP, Apache, and MySQL. Then you create PHP Web pages, including database management and security. Finally, you discover how to integrate your work with e-commerce and other technologies. By building different types of Web sites, you progress from setting up simple database tables to tapping the full potential of PHP, Apache, and MySQL. When you're finished, you will be able to create well-designed, dynamic Web sites using open source tools. What does this book cover? Here's what you will learn from this book: How PHP server-side scripting language works for connecting HTML-based Web pages to a backend database Syntax, functions, and commands for PHP, Apache, and MySQL Methods and techniques for building user-friendly forms How to easily store, update, and access information using MySQL Ways to allow the user to edit a database E-commerce applications using these three technologies How to set up user logins, profiles, and personalizations Proper protocols for error handling Who is this book for? This book is for beginners who are new to PHP and who need to learn quickly how to create Web sites using open source tools. Some basic HTML knowledge is helpful but not essential.

*Assessment in Early Childhood Settings* Margaret Carr 2001-06-05 `This is an invigorating and very thought-provoking text, that I would recommend to all early years professionals, parents and citizens interested in developing their understanding of early years philosophy in action, which is directly linked to a compelling research paradigm and deep reflection alongside a sound theoretical base' - Early Years `I would recommend this book to practitioners interested in reflecting on their own practice and approach to assessment. The insights provided are thought-provoking and promote a practical and positive approach to early years assessment' - Early Talk `This thoughtful book challenges the standard assessment process that is commonly employed within the context of early years provision. For any practitioners working in early years setting this is a powerful and exciting book that helps to remind us that the child must be placed centrally within the assessment process, not as a recipient but as a proactive contributor to the situation'- Child Language Teaching and Therapy `This is a highly relevant text as some UK early childhood educators become engulfed with avalanches of tick sheets! A most useful book which contributes to the current vital debate about when, what and how we should assess young children's progress' - T.A.C.T.Y.C Newsletter `I found Margaret Carr's book fascinating... the ideas and arguments put forward are well worth mulling over' - Early Years Educator `This is an inspiring book from bilingual, bicultural New Zealand about revolutionizing the assessment of young children's learning and progress.... I hope this book inspires United Kingdom practitioners to set out on learning story journeys' - Nursery World `This book manages to blend recognized theory and recent research with practice. I found it easy, and sometimes enjoyable, to read; it provided plenty of "food for thought" as well as references on "how to". I would recommend it to all early childhood practitioners, not just those considering their current assessment procedures, as the chapters focusing on the child as a learner are of value on their own' - Julia Browne, Goldsmiths Association for Early Childhood This book shows that an early childhood setting can be described as a learning place in which children develop learning dispositions such as resilience in the face of uncertainty, confidence to express their ideas, and collaborative and thoughtful approaches to problem-solving. These dispositions provide the starting point for life-long learning. The author asks: How can we assess and track children's learning in the early years in a way that includes learning dispositions and avoids the pitfalls of over-formal methods, whilst being helpful for practitioners, interesting for families, and supportive for learners? The book - describes a way of assessment that stays close to the children's real experiences and provides an alternative to mechanistic and fragmented approaches, - shows how practitioners can assess what really matters: those learning dispositions (interest, involvement and perseverance for example) that provide a foundation for life-long learning. The book is about weaving theory and practice: theorizing development and learning as reflected in assessment practice. The author also argues that unless we find ways to assess complex outcomes in early childhood they will be excluded from the teaching and the learning. Simple and low level outcomes and goals will take their place. The theoretical ideas and arguments are illustrated throughout by transcripts and stories of children in a range of early childhood settings. At every turn in the journey it asks: How is this reflected in a real life context? It documents the voices of children, practitioners and parents as the learning story develops.
