Multinational Maids Anju Mary Paul 2017-09-28 Explores how global markets, middlemen and destination aspirations drive the 'stepwise migrations' of Filipino and Indonesian migrant domestic workers.

Sojourners and Settlers Clarence E. Glick 2017-04-30 Among the many groups of Chinese who migrated from their ancestral homeland in the nineteenth century, none found a more favorable situation than those who came to Hawaii. Coming from South China, largely as laborers for sugar plantations and Chinese rice plantations but also as independent merchants and craftsmen, they arrived at a time when the tiny Polynesian kingdom was being drawn into an international economic, political, and cultural world. *Sojourners and Settlers* traces the waves of Chinese immigration, the plantation experience, and movement into urban occupations. Important for the migrants were their close ties with indigenous Hawaiians, hundreds establishing families with

Hawaiian wives. Other migrants brought Chinese wives to the islands. Though many early Chinese families lived in the section of Honolulu called "Chinatown," this was never an exclusively Chinese place of residence, and under Hawaii's relatively open pattern of ethnic relations Chinese families rapidly became dispersed throughout Honolulu. Chinatown was, however, a nucleus for Chinese business, cultural, and organizational activities. More than two hundred organizations were formed by the migrants to provide mutual aid, to respond to discrimination under the monarchy and later under American laws, and to establish their status among other Chinese and Hawaii's multiethnic community. Professor Glick skillfully describes the organizational network in all its subtlety. He also examines the social apparatus of migrant existence: families, celebrations, newspapers, schools--in short, the way of life. Using a sociological framework, the author provides a fascinating account of the migrant settlers' transformation from villagers bound by ancestral clan and tradition into participants in a mobile, largely Westernized social order.

Newtown Alive Rosalyn Howard Ph D 2017-03-15 This book chronicles the history of Sarasota, Florida's African American community - Newtown - that celebrated its 100-year anniversary in 2014. It answers questions about many aspects of community life: why the earliest African Americans who came to Sarasota, then a tiny fishing village, first settled in areas near downtown called -Black Bottom- and -over town;- their transition from there to Newtown; how they developed Newtown from swamp land into a self-contained community to ensure their own survival during the Jim Crow era; the ways they earned a living, what self-help organizations they formed; their religious and educational traditions; residents' military service, the strong emphasis placed

on education; how they succeeded in gaining political representation after filing a federal lawsuit; and much more. Newtown residents fought for civil rights, endured and triumphed over Jim Crow segregation, suffered KKK intimidation and violence, and currently are resisting the stealthy gentrification of their community. Whether you are new to the area, a frequent visitor, an educator, historian or a longtime resident trying to connect the dots in your family tree, you will find these stories of courage, dignity and determination enlightening and empowering!

Incarceration Nations Baz Dreisinger 2016-02-09 Baz

Dreisinger travels behind bars in nine countries to rethink the state of justice in a global context Beginning in Africa and ending in Europe, Incarceration Nations is a first-person odyssey through the prison systems of the world. Professor, journalist, and founder of the Prison-to-College-Pipeline, Dreisinger looks into the human stories of incarcerated men and women and those who imprison them, creating a jarring, poignant view of a world to which most are denied access, and a rethinking of one of America’s most far-reaching global exports: the modern prison complex. From serving as a restorative justice facilitator in a notorious South African prison and working with genocide survivors in Rwanda, to launching a creative writing class in an overcrowded Ugandan prison and coordinating a drama workshop for women prisoners in Thailand, Dreisinger examines the world behind bars with equal parts empathy and intellect. She journeys to Jamaica to visit a prison music program, to Singapore to learn about approaches to prisoner reentry, to Australia to grapple with the bottom line of private prisons, to a federal supermax in Brazil to confront the horrors of solitary confinement, and finally to the so-called model prisons of Norway. Incarceration Nations concludes with climactic lessons about the past, present, and future of justice.

The Encyclopedia of Country Living, 40th Anniversary Edition

Carla Emery 2012-12-18 From craft culture to survivalists, preppers, homesteaders, urban farmers, and everyone in between there is a desire for a simpler way of life—a healthier, greener, more self-sustaining and holistic approach to modern life. The knowledge you need to survive and thrive off the grid is at your fingertips in *The Encyclopedia of Country Living*, the best-selling resource for the homesteading movement. With its origins in the back-to-the-land effort of the late 1960s, Carla Emery's landmark book has grown into a comprehensive guide to building your sustainable country escape haven, while lowering your carbon footprint in the process. The 40th anniversary edition offers up-to-date and detailed information on the fundamentals of topics like homegrown food; raising chickens, goats, and pigs; beekeeping; food preservation; mail-order supply sourcing; foraging; and much, much more (even how to deliver a baby)—everything you need to lead a self-sufficient lifestyle in the 21st century. Basic, thorough, and reliable, this book deserves a place in urban and rural homes alike.

Best Kitchen Basics Mark Best 2016-03-15 Best Kitchen Basics beats the revolutionary drum in the domestic kitchen - no longer are high-end techniques or recipes the sole domain of award-winning restaurants. Here, Mark Best breaks it down, putting the individual elements of each recipe into the home cook's hands

and empowering them to think differently. It includes 100 original recipes built around 30 accessible ingredients - from eggplant to pumpkin to chocolate and eggs. Best Kitchen Basics ups the ante on the familiar. Best insists that it is not a question of luxurious ingredients, simply the knowledge and wherewithal to unlock the beauty of some of the most basic elements of cooking. In the case of mushrooms, for example, he starts with a basic recipe for classically stuffed mushrooms, and develops to the next step requiring a little more application of fermenting mushrooms. And then, for the enthusiastic cook with a little more time on their hands, a mushroom ravioli in mushroom consomme. In addition to recipes, Best takes readers on "skills sessions". He unpacks the building blocks of the best chefs, includes step-by-step guides and shares snippets of technical detail. The book does not aspire to be comprehensive, rather an enjoyable - and useful - insight into one man's craft. Originally inspired by a well-thumbed recipe collection left to him by his beloved grandmother, Best has set the tone for an accessible, engaging book that will prompt cooks to take their skills and mindset to another level.

The Pandemic Century: One Hundred Years of Panic, Hysteria, and Hubris Mark Honigsbaum 2019-04-09 With a New Chapter and Updated Epilogue on Coronavirus A Financial Times Best Health Book of 2019 and a New York Times Book Review Editors' Choice "Honigsbaum does a superb job covering a century's worth of pandemics and the fears they invariably unleash."

—Howard Markel, MD, PhD, director of the Center for the History of Medicine, University of Michigan How can we understand the COVID-19 pandemic? Ever since the 1918 Spanish influenza pandemic, scientists have dreamed of preventing such catastrophic outbreaks of infectious disease. Yet despite a century of medical progress, viral and bacterial disasters continue to take us by surprise, inciting panic and dominating news cycles. In *The Pandemic Century*, a lively account of scares both infamous and less known, medical historian Mark Honigsbaum combines

reportage with the history of science and medical sociology to artfully reconstruct epidemiological mysteries and the ecology of infectious diseases. We meet dedicated disease detectives, obstructive or incompetent public health officials, and brilliant scientists often blinded by their own knowledge of bacteria and viruses—and see how fear of disease often exacerbates racial, religious, and ethnic tensions. Now updated with a new chapter and epilogue.

The Book of Gardening Projects for Kids Whitney Cohen

2012-07-12 “What better way to begin to explore the natural world than to experience the magic and beauty of a family garden.” —Arden Bucklin-Sporer, author of *How to Grow a School Garden* Many gardeners find that once they have children gardening goes the way of late-night dinner parties and Sunday morning sleep-ins. Raising kids and maintaining a garden can be a juggling act, leaving the family garden forgotten and neglected. But kids can make great gardening companions, and the benefits of including them are impossible to ignore. Gardening gets kids outdoors and away from television and video games, increases their connection to plants and animals, and helps build enthusiasm for fresh fruits and vegetables. Their involvement becomes the real harvest of a family garden. In *The Book of Gardening Projects for Kids*, Whitney Cohen and John Fisher draw on years of experience in the Life Lab Garden Classroom and gardening with their own children to teach parents how to integrate the garden into their family life, no matter its scope or scale. The book features simple, practical gardening advice, including how to design a play-friendly garden, ideas for fun-filled theme gardens, and how to cook and preserve the garden's bounty. 101 engaging, family-friendly garden activities are also featured, from making Crunch-n-Munch Vegetable Beds and Muddy Miniature Masterpieces to harvesting berries for Fresh Fruity Pops.

Fair Food Oran B. Hesterman 2012-06-05 Our food system is broken, and it's endangering what's most precious to us: our environment, our health, our soil and water, and our future. In recent years, a host of books and films have compellingly documented the dangers. But advice on what to do about them largely begins and ends with the admonition to "eat local" or "eat organic." Longtime good food pioneer Oran Hesterman knows that we can't fix the broken system simply by changing what's on our own plates: the answer lies beyond the kitchen. In *Fair Food* he shares an inspiring and practical vision for changing not only what we eat, but how food is grown, packaged, delivered, marketed, and sold. He introduces people and organizations across the country who are already doing this work in a number of creative ways, and provides a wealth of practical information for readers who want to get more involved.

Towards a Political Economy of Degrowth Ekaterina Chertkovskaya 2019-10-04 Bringing degrowth into dialogue with critical social theories, covering previously unexplored geographical contexts and discussing some of the most contested concepts in degrowth, the book hints at informed paths towards socio-ecological transformation.

Bug Out to Belize Lan Sluder 2018-02-15 Are you worried and anxious about the present state of the world? Are you concerned about your future and that of your family? Do you want to live better, cheaper and healthier? Without worrying about politics, war, money problems, government surveillance, keeping up with the Joneses or even the unthinkable -- nuclear Armageddon? Then consider bugging out to Belize, the little English-speaking country on the Caribbean Coast. It's so close, yet so far from most of the world's problems. *Bug Out to Belize* by Lan Sluder tells you how to do it: What areas are best? How much does it cost to live in Belize? How do you get residency? What are the pitfalls to avoid? And, how to make the move! Written by a leading expert on

Belize, an award-winning reporter, newspaper and magazine editor, contributor to leading publications around the world including the New York Times, Caribbean Travel & Life, Chicago Tribune, Miami Herald and the Globe and Mail, and author of more than 20 books, Bug Out to Belize can guide you to a better, more worry-free future in beautiful Belize, the friendly, affordable, frost-free and English-speaking little country on the Caribbean Coast.

The Arts of Indigenous Health and Well-Being Nancy Van Styvendale 2021-12-17 Drawing attention to the ways in which creative practices are essential to the health, well-being, and healing of Indigenous peoples, *The Arts of Indigenous Health and Well-Being* addresses the effects of artistic endeavour on the “good life”, or *mino-pimatisiwin* in Cree, which can be described as the balanced interconnection of physical, emotional, spiritual, and mental well-being. In this interdisciplinary collection, Indigenous knowledges inform an approach to health as a wider set of relations that are central to well-being, wherein artistic expression furthers cultural continuity and resilience, community connection, and kinship to push back against forces of fracture and disruption imposed by colonialism. The need for healing—not only individuals but health systems and practices—is clear, especially as the trauma of colonialism is continually revealed and perpetuated within health systems. The field of Indigenous health has recently begun to recognize the fundamental connection between creative expression and well-being. This book brings together scholarship by humanities scholars, social scientists, artists, and those holding experiential knowledge from across Turtle Island to add urgently needed perspectives to this conversation. Contributors embrace a diverse range of research methods, including community-engaged scholarship with Indigenous youth, artists, Elders, and language keepers. *The Arts of Indigenous Health and Well-Being* demonstrates the healing possibilities of Indigenous works of art, literature, film, and music

from a diversity of Indigenous peoples and arts traditions. This book will resonate with health practitioners, community members, and any who recognize the power of art as a window, an entryway to access a healthy and good life.

Vegan for Life Jack Norris 2011-07-12 The comprehensive guide for optimal plant-based nutrition at every stage of life, now completely updated. Homo Deus Yuval Noah Harari 2017-02-21 Official U.S. edition with full color illustrations throughout. NEW YORK TIMES BESTSELLER Yuval Noah Harari, author of the critically-acclaimed New York Times bestseller and international phenomenon *Sapiens*, returns with an equally original, compelling, and provocative book, turning his focus toward humanity's future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark

style—thorough, yet riveting—famine, plague and war have been transformed from incomprehensible and uncontrollable forces of nature into manageable challenges. For the first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from binging at McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? Homo Deus explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own destructive powers? This is the next stage of evolution. This is Homo Deus. With the same insight and clarity that made Sapiens an international hit and a New York Times bestseller, Harari maps out our future.

Jack Jack Welch 2003-10-01 The most widely respected CEO in America looks back on his brilliant career at General Electric and reveals his personal business philosophy and unique managerial style. Nearly 20 years ago, former General Electric CEO Reg Jones walked into Jack Welch's office and wrapped him in a bear hug. "Congratulations, Mr. Chairman," said Reg. It was a defining moment for American business. So begins the story of a self-made man and a self-described rebel who thrived in one of the most volatile and economically robust eras in U.S. history, while managing to maintain a unique leadership style. In what is the most anticipated book on business management for our time, Jack Welch surveys the landscape of his career running one of the world's largest and most successful corporations.

The Encyclopedia of Herbs Thomas DeBaggio 2009-09-01 This

meticulously researched compendium provides every aspect of growing, identifying, harvesting, preserving, and using more than 500 species of herbs. Thorough profiles provide a plant's botanical name and family, whether it is an annual or perennial, its height, hardiness, light requirements, water consumption, required soil type, and pH. The often fascinating history of the plant, the chemistry of its essential oils, and its culinary, landscape, and craft uses are also included, as is advice on how to propagate. For the first edition of their work, both authors received The Gertrude B. Foster Award for Excellence in Herbal Literature from the Herb Society of America. This new edition adds important species and includes updated nomenclature.

100 Vegetables and Where They Came From William Woys

Weaver 2013-11-01 A perfect leek from France. Flavorful zucchini from Italy. An infamous potato from Ireland, and a humble lentil from Ethiopia. *100 Vegetables* offers a veritable cornucopia of vegetables and stories from around the world--from Argentina to Zimbabwe, from Australia to the United States. William Woys Weaver--veggie connoisseur, gardener, and historian--guides us through a range of peppers, potatoes, peas, gourds, onions, tomatoes, greens, and a whole lot more. Not every carrot is the same. All beans aren't equal. Take the Petaluma Gold Rush bean, a rugged legume, grown for over 150 years and brought to California by an American whaler from Peru. Or the violet carrot, which the Greeks brought back from India following the conquests of Alexander the Great. Mixing history, culinary suggestions, practical information, and personal anecdotes, Weaver introduces us to unusual heirloom vegetables as well as to common favorites. He provides answers to general questions, such as the difference between a yam and a sweet potato, and presents lively portraits of one hundred vegetable varieties, which he's grown and harvested in his own kitchen garden. Organized alphabetically by common name, *100 Vegetables* includes beautifully detailed drawings throughout and a helpful appendix

of seed resources.

Logical Reasoning Bradley Harris Dowden 1993 This book is designed to engage students' interest and promote their writing abilities while teaching them to think critically and creatively. Dowden takes an activist stance on critical thinking, asking students to create and revise arguments rather than simply recognizing and criticizing them. His book emphasizes inductive reasoning and the analysis of individual claims in the beginning, leaving deductive arguments for consideration later in the course.

The 'Made in Germany' Champion Brands Ugesh A. Joseph 2016-03-09 Germany's economic miracle is a widely-known

phenomenon, and the world-leading, innovative products and services associated with German companies are something that others seek to imitate. In *The 'Made in Germany' Champion Brands*, Ugesh A. Joseph provides an extensively researched, insightful look at over 200 of Germany's best brands to see what they stand for, what has made them what they are today, and what might be transferable. The way Germany is branded as a nation carries across into the branding of its companies and services, particularly the global superstar brands - truly world-class in size, performance and reputation. Just as important are the medium-sized and small enterprises, known as the 'Mittelstand'. These innovative and successful enterprises from a wide range of industries and product / service categories are amongst the World market leaders in their own niche and play a huge part in making Germany what it is today. The book also focuses on German industrial entrepreneurship and a selection of innovative and emergent stars. All these companies are supported and encouraged by a sophisticated infrastructure of facilitators, influencers and enhancers - the research, industry, trade and standards organizations, the fairs and exhibitions and all the social and cultural factors that influence, enhance and add positive value to the country's image. Professionals or academics interested in business; entrepreneurship; branding and marketing; product or service development; international trade and business development policy, will find fascinating insights in this book; while those with an interest in Germany from emerging industrial economies will learn something of the secrets of German success.

Programming Challenges Steven S Skiena 2006-04-18 There are many distinct pleasures associated with computer programming. Craftsmanship has its quiet rewards, the satisfaction that comes from building a useful object and making it work. Excitement arrives with the flash of insight that cracks a previously intractable problem. The spiritual quest for elegance can turn the

hacker into an artist. There are pleasures in parsimony, in squeezing the last drop of performance out of clever algorithms and tight coding. The games, puzzles, and challenges of problems from international programming competitions are a great way to experience these pleasures while improving your algorithmic and coding skills. This book contains over 100 problems that have appeared in previous programming contests, along with discussions of the theory and ideas necessary to attack them. Instant online grading for all of these problems is available from two WWW robot judging sites. Combining this book with a judge gives an exciting new way to challenge and improve your programming skills. This book can be used for self-study, for teaching innovative courses in algorithms and programming, and in training for international competition. The problems in this book have been selected from over 1,000 programming problems at the Universidad de Valladolid online judge. The judge has ruled on well over one million submissions from 27,000 registered users around the world to date. We have taken only the best of the best, the most fun, exciting, and interesting problems available.
