**Human-Centered Leadership (Black and White)** Sesil Pir 2021-05-18 We have been witnessing how the current definition of leadership causes prolonged human suffering by driving separation between the individual and the collective, undermining our unique individual powers, and shrinking our collective capacities. This condition today results in sadness, anxiety and depression and impacts the long-term wellbeing of our societies. We ache for organizations that drive value beyond profit, for communities that lift each other up and we are desperate for individuals that are self-connected and confident. We believe by enabling the evolution of current economic models, conventional mindsets and efficiency-driven organizational practices we can slowly shift cultures inside the workplace, leading to higher gain of equity, equality, and dignity across communities. Human-Centered Leadership is an investigative summary of a research collaboration with Stanford University's Center for Compassion, Altruism Research, and Education (CCARE) and an invitation for leaders to awaken 8 core human attributes available to them in creating more positive climates. Sesil Pir is a tenured Industrial and Organizational Psychologist, currently serving as the Head of Employee Experience at Takeda Pharmaceuticals and Founder of SESIL PIR Consulting GmbH, a boutique management consultancy, focusing on changing the status quo of work. She holds an MA-HRIR from Carlson School of Management, an Executive MBA from Harvard University, and a BA from Eastern Michigan University. Mrs. Pir is an active contributor of Forbes, has been published in the Harvard Business Review, HR Zone and UK's HR Magazine, and has contributed to several Human Resources Management books. She has been recently recognized as '40 Thinkers Under 40' in Europe (2017) and '101 Employee Engagement Influencers' globally (2018, 2019, 2020).

## **Construction Documents Using SketchUp Pro 2020: A Short Project-based Course to**

**Increase Your Effectiveness at Using SketchUp and Give You a Truly Pro** Paul James Lee

2020-01-15 Presented here is a detailed step-by-step guide to building a house model from scratch and transforming it into finished construction documents. Our book contains tips and tricks about how to go from a sketch to fully finished Plans, Sections, Elevations and Details. Each page is painstakingly designed to make it extremely clear how every step works. This course was formulated from years of experience not only using SketchUp in practise but teaching professionals and students from many different backgrounds. Written by an experienced architect who has used SketchUp to design and project-many types of jobs from a house extension to commercial office buildings, it has been shaped by extensive practise of design and building. Some of the best professional workflows you'll find anywhere are contained within the course material. Learning the tools is fundamentally important, but more than that we need to understand how tools and settings work together in the most effective way. Structured around a building project which was designed and project managed by the author, the course details all the steps required to construct walls, windows, doors, roof in a professional manner using correct naming procedures. Elements are organised according to best practise. Groups and Components must be correctly located to be truly effective, and a proper method for structuring elements is clearly outlined in a unique, comprehensive graphic. Each concept is clearly documented including Groups, Section Cuts, Styles, Scenes (or Views), Perspectives vs Orthogonal Views. Tools are each used in a challenging context so that the reader gets an in-depth understanding of how each works in practise. Pages are set out using ultra-clear graphics which link each step with a visual reference. Our model is built up in a

way that follows the real-life construction process: Walls are laid out at the same time that floor slabs are formed; Windows are put in place inside the wall structure; Internal Walls are constructed and doors are inserted; Finally the roof is created complete with rooflights. The procedure for creating and locating Component Libraries is demonstrated. The model then undergoes a process of Section Cut placement. Scenes (Views) are set up using the Section Cuts; These constitute our Plans, Sections and Elevations. Textures are added to elements. Materials selection and creation is explained in detail. Following on from this is the creation of a construction detail based on the main model. Using a bespoke SketchUp model environment, the formation of a comprehensive 3D detail is illustrated complete with Scenes. Once the model and its views have been prepared, it is then ready to be placed into LayOut, SketchUp Pro's graphics interface. Each Scene is inserted into LayOut, sized and scaled. Notes and graphics are applied using text, callouts, lines. There is a unique section on creating a scaled 2D drawing in LayOut, using the program's vector graphics in a way that is as clear as any 2D CAD program. The Scrapbook Menu is a means of swiftly importing graphics that are both pre-loaded but can also be quickly added to. Procedures for creating our own graphics library is explained. Recommended sizes for text, line weights and dimensions are illustrated. Each menu in LayOut is explained in detail. There are five "Killer Keystrokes" included in the book. These are shortcuts that have a massive impact on modelling time and convenience. Creation of shortcut keys is also explained. In the introduction section there are explanations of SketchUp's BIM capabilities. Further details are linked on SketchUp Expert website, and links to BIM use-cases are provided. There is also a critique of 2D CAD and why SketchUp Pro is better to use for traditional CAD work. SketchUp has become the new "de-facto norm" for architecture and design professionals. There is simply no better way to illustrate design while translating into documentation.

**Hearing Impairment and Disability** Ariel Tenenbaum 2020 "Much research has been conducted to provide researchers and hearing healthcare professionals with updated information in regard to hearing assessments, results interpretation and case management. This ongoing research is particularly imperative to guide clinicians with optimized methods in assessing and managing

pediatric patients with hearing impairment and disability. As such, tremendous research efforts have been made in determining the most optimum methods in assessing hearing using both subjective and objective tests. Since hearing loss can occur due to disrupted peripheral and/or central auditory pathway, there is also a growing interest to study children with auditory processing disorder (APD). Even though notable achievements have been observed in understanding APD, more research is required, particularly in establishing a gold standard APD test and its specific interventions. Additionally, having an objective test such as speech-evoked auditory brainstem response is beneficial to understand how speech sounds are encoded within the brainstem region in hearing-impaired children, as well as in those with compromised neural function. In this book, we have gathered research from Malaysia and India in this field and hope it will be of interest to our readers"--

[Air Force System Safety Handbook - Costs, Objectives, Policy and Process, Risk Assessment, Flight Mishaps, Analysis Techniques, Contractors, Nuclear and Explosive Hazards, Biomedical Safety](#) U. S. Military 2017-04-25 The Air Force System Safety Handbook was prepared as a resource document for program office system safety managers and system safety engineers. It is not designed to answer every question on the topic of system safety nor is it a cookbook that guarantees success. The handbook provides considerable insight to the general principles, objectives, and requirements of

applying system safety concepts to the Air Force system acquisition and logistical support processes. Programs vary greatly in their scope and complexity, requiring a tailored system safety effort. Assigned to this difficult task are military and government personnel with varied education and experience backgrounds. These system safety practitioners need a comprehensive understanding of the system safety process and the complexities of applying it to a given program. This handbook will assist in providing much of the necessary information but additional, more detailed guidance will be required from the program office and their higher headquarters system safety experts. The ultimate objective of any organization within the Air Force is maximizing combat capability. One element in this maximizing process is protecting and conserving combat weapon systems and their support equipment. Preventing mishaps and reducing system losses is one important aspect of conserving these resources. System safety contributes to mishap prevention by minimizing system risks due to hazards consistent with other cost, schedule, and design requirements. The fundamental objective of system safety is to identify, eliminate or control, and document system hazards.

**Kumba Africa** Sampson Ejike Odum 2020-11-03 'KUMBA AFRICA', is a compilation of African Short Stories written as fiction by Sampson Ejike Odum, nostalgically taking our memory back several thousands of years ago in Africa, reminding us about our past heritage. It digs deep into the traditional life style of the Africans of old, their beliefs, their leadership, their courage, their culture, their wars, their defeat and their victories long before the emergence of the white man on the soil of Africa. As a talented writer of rich resource and superior creativity, armed with in-depth knowledge of different cultures and traditions in Africa, the Author throws light on the rich cultural heritage of the people of Africa when civilization was yet unknown to the people. The book reminds the readers that the Africans of old kept their pride and still enjoyed their own lives. They celebrated victories when wars were won, enjoyed their New yam festivals and villages engaged themselves in seasonal wrestling contest etc; Early morning during harmattan season, they gathered firewood and made fire inside their small huts to hit up their bodies from the chilling cold of the harmattan. That was the Africa of old we will always remember. In Africa today, the story have changed. The people now enjoy civilized cultures made possible by the influence of the white man through his scientific and technological process. Yet there are some uncivilized places in Africa whose people haven't tested or felt the impact of civilization. These people still maintain their ancient traditions and culture. In

everything, we believe that days when people paraded barefooted in Africa to the swamp to tap palm wine and fetch firewood from there farms are almost fading away. The huts are now gradually been replaced with houses built of blocks and beautiful roofs. Thanks to modern civilization. Donkeys and camels are no longer used for carrying heavy loads for merchants. They are now been replaced by heavy trucks and lorries. African traditional methods of healing are now been substituted by hospitals. In all these, I will always love and remember Africa, the home of my birth and must respect her cultures and traditions as an AFRICAN AUTHOR.

*Leading with Vision* Bonnie Hagemann 2017-05-16 What does it mean to lead with vision? From LinkedIn Learning Expert, Bonnie Hagemann comes the first book devoted entirely to vision as a key leadership principle. Hagemann and her co-authors delve deeply into the notion that a compelling vision that motivates and inspires is a differentiator for organizations that want to hire and retain talent, be more competitive, and thrive in uncertain times. But a compelling vision on its own is not enough, which is why the authors, sought-after leadership development experts globally, provide readers with detailed analysis of the essential things leaders must do to effectively engage the workforce around that vision: embody courage, forge clarity, build connectedness, and shape culture. *Leading with Vision* draws on quantitative data from the authors' research of over 400 companies supplemented with real-world examples from thoughtful leaders who exemplify the core principles of leading with vision in established companies, including: Olukai, Bumble Bee, Coresystems, Jimbo's, Bunge, and more. The book also includes an actionable blueprint developed by the authors that leaders and their organizations can implement on day one of their journey.

*Intimate Impressions* Jack Boul 2001

*Angels and Demons in Art* Rosa Giorgi 2005 This sumptuously illustrated volume analyzes artists'

representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the Guide to Imagery series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, *Angels and Demons in Art* will delight readers with an interest in art or religious symbolism.

Political Concepts Adi Ophir 2018-01-02 Deciding what is and what is not political is a fraught, perhaps intractably opaque matter. Just who decides the question; on what grounds; to what ends—these seem like properly political questions themselves. Deciding what is political and what is not can serve to contain and restrain struggles, make existing power relations at once self-evident and opaque, and blur the possibility of reimagining them differently. Political Concepts seeks to revive our common political vocabulary—both everyday and academic—and to do so critically. Its entries take the form of essays in which each contributor presents her or his own original reflection on a concept posed in the traditional Socratic question format “What is X?” and asks what sort of work a rethinking of that concept can do for us now. The explicitness of a radical questioning of this kind gives authors both the freedom and the authority to engage, intervene in, critique, and transform the conceptual terrain they have inherited. Each entry, either implicitly or explicitly, attempts to re-open the question “What is political thinking?” Each is an effort to reinvent political writing. In this setting the political as such may be understood as a property, a field of interest, a dimension of human existence, a set of practices, or a kind of event. Political Concepts does not stand upon a decided concept of the political but returns in practice and in concern to the question “What is the political?” by submitting the question to a field of plural contention. The concepts collected in Political Concepts are “Arche” (Stathis Gourgouris), “Blood” (Gil Anidjar), “Colony” (Ann Laura Stoler), “Concept” (Adi Ophir), “Constituent Power” (Andreas Kalyvas), “Development” (Gayatri Spivak), “Exploitation” (Étienne Balibar), “Federation” (Jean Cohen), “Identity” (Akeel Bilgrami), “Rule of Law” (J. M. Bernstein), “Sexual Difference” (Joan Copjec), and “Translation” (Jacques Lezra)
