Rethinking Capitalism Michael Jacobs 2016-07-21 "Thought provoking and fresh - this book challenges how we think about economics." Gillian Tett, Financial Times For further information about recent publicity events and media coverage for Rethinking Capitalism please visit <http://marianamazucato.com/rethinking-capitalism/> Western capitalism is in crisis. For decades investment has been falling, living standards have stagnated or declined, and inequality has risen dramatically. Economic policy has neither reformed the financial system nor restored stable growth. Climate change meanwhile poses increasing risks to future prosperity. In this book some of the world's leading economists propose new ways of thinking about capitalism. In clear and compelling prose, each chapter shows how today's deep economic problems reflect the inadequacies of orthodox economic theory and the failure of policies informed by it. The chapters examine a range of contemporary economic issues, including fiscal and monetary policy, financial markets and business behaviour, inequality and privatisation, and innovation and environmental change. The authors set out alternative economic approaches which better explain how capitalism works, why it often doesn't, and how it can be made more innovative, inclusive and sustainable. Outlining a series of far-reaching policy reforms, Rethinking Capitalism offers a powerful challenge to mainstream economic debate, and new ideas to transform it.

Pharmageddon David Healy 2013-04 This searing indictment, David Healy's most comprehensive and forceful argument against the pharmaceuticalization of medicine, tackles problems in health care that are leading to a growing number of deaths and disabilities. Healy, who was the first to draw attention to the now well-publicized suicide-inducing side effects of many anti-depressants, attributes our current state of affairs to three key factors: product rather than process patents on drugs, the classification of certain drugs as prescription-only, and industry-controlled drug trials. These developments have tied the survival of pharmaceutical companies to the development of blockbuster drugs, so that they must overhype benefits and deny real hazards. Healy further explains why these trends have basically ended the possibility of universal health care in the United States and elsewhere around the world. He concludes with suggestions for reform of our currently corrupted evidence-based medical system.

Jimmy Omair Ahmad 2010-12-01 In Moazzamabad, UP, too large to be a town and too backward to be a city, a young man stabs a police inspector and is beaten to death. The last words he speaks are, 'My name is Jimmy the Terrorist.' Journalists descend on the town, 'like shrill birds', and a long-time resident decides to tell a story that none of them will know. Jimmy was once Jamaal, son of Rafiq Ansari of Rasoolpur Mohalla, a Muslim neighbourhood in a Hindu town. And his story goes back a long way: to the time when Moazzamabad was named, after Aurangzeb's son; when Rafiq was seduced by the wealth and refinements of Shabbir Manzil and married Shaista; when the Hanuman temple grew ten storeys high and the head priest was elected mayor; when Shaista died, a mosque was brought down in Ayodhya and Rafiq became a mullah. As Jamaal grows up, watching both his father and his neighbourhood change and curfew reach Moazzamabad, he is changed himself. He becomes Jimmy, one among the countless marginalized trying to find a place in the world, dimly aware that the choices that shape their lives are being made in distant places, where they have no influence. Shortlisted for the Man Asian Prize 2009, this spare, compelling novel, as intimate as it is political, confirms Omair Ahmad's reputation as one of the most distinctive and exciting new voices in Indian fiction.

Mountain Landscapes Massimo Sargolini 2015-04 According with the Alps and Carpathian Conventions, the European Landscape Convention, and the Birds, and Habitats Directives the research project "Access2Mountain", illustrated in this book, aims to promote the improvement of the accessibility in mountain areas, as a crucial factor for their social, economic and cultural sustainable development, with particular regard for tourism. In the meanwhile, it aims to enlight methods, models and tools for the containment and the reduction of negative impacts of traffic, infrastructures and tourist flows on the environment, landscape and natural-cultural heritage, particularly in the most sensitive areas of South-East Europe. The landscape vision becomes the way to approach the analysis, interpretation and design. It requires a trans-scale dimension, moving from the local level, to the environmental component, the interested context and the model region. The final output is a "system of thinking" for the decision making processes in sensitive mountain landscapes.

Novacene James Lovelock 2020-11-10 A fascinating new study from the originator of the Gaia Theory, "who conceived the first wholly new way of looking at life on earth since Charles Darwin" (Independent) One of the world's leading scientific thinkers offers a vision of a future epoch in which humans and artificial intelligence unite to save the Earth James Lovelock, creator of the Gaia hypothesis and the greatest environmental thinker of our time, has produced an astounding new theory about future of life on Earth. He argues that the Anthropocene—the age in which humans acquired planetary-scale technologies—is, after 300 years, coming to an end. A new age—the Novacene—has already begun. In the Novacene, new beings will emerge from existing artificial intelligence systems. They will think 10,000 times faster than we do and they will regard us as we now regard plants. But this will not be the cruel, violent machine takeover of the planet imagined by science fiction. These hyperintelligent beings will be as dependent on the health of the planet as we are. They will need the planetary cooling system of Gaia to defend them from the increasing heat of the sun as much as we do. And Gaia depends on organic life. We will be partners in this project. It is crucial, Lovelock argues, that the intelligence of Earth survives and prospers. He does not think there are intelligent aliens, so we are the only beings capable of understanding the cosmos. Perhaps, he speculates, the Novacene could even be the

beginning of a process that will finally lead to intelligence suffusing the entire cosmos. At the age of 100, James Lovelock has produced the most important and compelling work of his life.

Medical Talk and Medical Work Paul Atkinson 1995-06-15 The development of a sociology of medical knowledge is both assessed and contributed to in *Medical Talk and Medical Work*. Underlying the analysis is research on the work of haematologists, which offers a rich resource for understanding the complexities and contradictions between physical bodies and social embodiment, medical talk and technical apparatus. Using but moving beyond this specific material, Paul Atkinson demonstrates the strengths and weaknesses of the existing understanding of medical knowledge. Among the issues explored are: the place of interaction among doctors, rather than between doctors and patients, in defining the construction of medical knowledge; the ways in which clinical opinion is socially produced and the nature of the local settings through which this process occurs; and the relations among medical knowledge, medical language and the increasingly technological contexts of contemporary medical practice.

Pesticide Resistance National Research Council 1986-02-01 Based on a symposium sponsored by the Board on Agriculture, this comprehensive book explores the problem of pesticide resistance; suggests new approaches to monitor, control, or prevent resistance; and identifies the changes in public policy necessary to protect crops and human health from the ravages of pests. The volume synthesizes the most recent information from a wide range of disciplines, including entomology, genetics, plant pathology, biochemistry, economics, and public policy. It also suggests research avenues that would indicate how to counter future problems. A glossary provides the reader with additional guidance.

Moral Basis of a Backward Society Edward C. Banfield 1967-02-01 Looking at how nepotism and family-centric societies sacrifice the public good, Edward C. Banfield uses a study of the people of southern Italy to argue how self-interested families can lead to poverty. Analyzing families in southern Italy in 1955, *Moral Basis of a Backward Society* discusses how poverty is a result of the inability to trust or associate strongly outside of immediate family. Challenged and argued for years, Edward C. Banfield's study has become accepted by many people in the modern age.

Macroeconomic Imbalances European Commission. Directorate-General for Economic and Financial Affairs 2012 On 14 February 2012, the European Commission presented its first Alert Mechanism Report (AMR), prepared in accordance with Article 3 of Regulation (EU) No 1176/2011 on the prevention and correction of macroeconomic imbalances. The AMR serves as an initial screening device, helping to identify Member States that warrant further in-depth analysis to determine whether imbalances exist or risk emerging. According to Article 5 of Regulation No. 1176/2011, these country-specific "in-depth reviews" should examine the nature, origin and severity of macroeconomic developments in the Member State concerned which constitute, or could lead to, imbalances. On the basis of this analysis, the Commission will establish whether it considers that an imbalance exists and what type of policy follow-up it will recommend to the Council. For Slovenia, the AMR noted that two indicators in the scoreboard exceeded their thresholds in 2010 and suggested the need to assess the development and drivers of potential imbalances. The AMR explained that in the years before the crisis, Slovenia enjoyed strong growth and domestic demand conditions, coupled with some losses in price competitiveness and a gradual widening of the current account deficit. It identified signs that overheating occurred, particularly as regards private sector credit growth, construction value added and property prices. The Slovenian economy was hit hard by the global crisis and the AMR noted that this has brought some, perhaps temporary, adjustment in the external balance but this is still at an early stage. Against this background, Section 2 examines the external and internal dimensions of imbalances including developments in competitiveness, private sector indebtedness and in asset markets. This is followed by a closer look at the implications of indebtedness of non-financial corporations for the banking sector in Section 3. Section 4 presents possible policy considerations.

Le maskerine dell'inganno. Dai pericoli che nascondono al loro significato politico più intimo Franco Soldani 2021-09-29 Mai utilizzate in precedenza come mezzi per la protezione individuale da presunti agenti patogeni, con la "pandemia" del 2020 le maskerine - pezzi di stoffa e/o strati di garza, "fai da te" o fabbricate in serie - sono ben presto diventate un elemento permanente del paesaggio sociale. Come piante in un giardino, senza però le loro naturali proprietà botaniche. Tutt'altro. I cosiddetti DPI, contrariamente al loro stesso nome, celano infatti un'intera serie di insidie, fonti di future patologie, che è bene comprendere per potersi tenere lontani dai loro effetti deleteri sulla salute individuale. Deleterio in ogni senso. Nella misura in cui impattano la vita societaria degli individui, essi hanno difatti anche un aspetto tipicamente politico oltre che sanitario. I DPI poi occultano tutta un'altra storia che ci racconta una ben differente realtà, soprattutto a proposito dei bambini e dei minori. Per questo la lettura del libro che avete nelle vostre mani è uno strumento indispensabile di conoscenza e di documentazione, specialmente per genitori responsabili preoccupati per il futuro dei loro figli. Come stanno veramente i fatti o lo leggete qui oppure non vi sarà possibile farlo da nessun'altra parte.

The Holocaust Industry Norman G. Finkelstein 2003-10-17 In his iconoclastic and controversial study, Norman G. Finkelstein moves from an interrogation of the place the Holocaust has come to occupy in global culture to a disturbing examination of recent Holocaust compensation settlements. It was not until the Arab-Israeli War of 1967, when Israel's evident strength brought it into line with US foreign policy, that memory of the Holocaust began to acquire the exceptional prominence it has today. Recalling Holocaust fraudsters such as Jerzy Kosinski and Binjamin Wilkomirski, as well as the demagogic constructions of writers like Daniel Goldhagen, Finkelstein contends that the main danger posed to the memory of Nazism's victims comes from some of the very people who profess most passionately to defend it. Drawing on a wealth of untapped sources, he exposes the double shakedown of European countries and legitimate Jewish claimants, and concludes that the Holocaust industry has become an outright extortion racket.

Cancer Pain Relief World Health Organization 1996 The second edition of a guide, which introduced a simple, yet highly effective method for the relief of cancer pain. Thoroughly revised and updated, the new edition further refines the WHO method, which advocates the use of a small number of relatively inexpensive drugs, including morphine. Revisions draw on experiences with millions of patients around the world as well as new knowledge about the specific pain syndromes unique to cancer. Completely new are chapters describing the international system by which morphine and other opioids are made available for medical purposes. The book has two parts. Part one provides a practical guide to the relief of cancer pain, concentrating on drug treatment as the mainstay of pain management. The most extensive section sets out detailed guidelines for the selection and prescribing of non-opioid analgesics, opioid analgesics, drugs for neuropathic pain, and adjuvant drugs for the treatment of adverse effects, the enhancement of pain relief and the management of concomitant psychological disturbances. Information ranges from explanations of how specific drugs work, through the precautions to take in the presence of certain disorders, to a list of factors that influence the effectiveness of opioids. Concerning the use of opioids, readers are reminded that psychological dependence does not occur in cancer patients and that the only correct dose of morphine is the one that relieves the pain. Part two provides a guide to opioid availability. A discussion of the reasons why opioids continue to be underprescribed or difficult to obtain is followed by an explanation of the Single Convention on Narcotic Drugs.

The Creation of Psychopharmacology David Healy 2009-07 David Healy follows his widely praised study, *The Antidepressant Era*, with an even more ambitious and dramatic story: the discovery and development of antipsychotic medication. Healy argues that the discovery of chlorpromazine (more generally known as Thorazine) is as significant in the history of medicine as the discovery of penicillin, reminding readers of the worldwide prevalence of insanity within living memory. But Healy tells not of the triumph of science but of a stream of fruitful accidents, of technological discovery leading neuroscientific research, of fierce professional competition and the backlash of the antipsychiatry movement of the 1960s. A chemical treatment was developed for one purpose, and as long as some theoretical rationale could be found, doctors administered it to the insane patients in their care to see if it would help. Sometimes it did, dramatically. Why these treatments worked, Healy argues provocatively, was, and often still is, a mystery. Nonetheless, such discoveries made and unmade academic reputations and inspired intense politicking for the Nobel Prize. Once pharmaceutical companies recognized the commercial potential of antipsychotic medications, financial as well as clinical pressures drove the development of ever more aggressively marketed medications. With verve and immense learning, Healy tells a story with surprising implications in a book that will become the leading scholarly work on its compelling subject.

Fiscal Monitor, October 2020 International Monetary Fund. Fiscal Affairs Dept. 2020-10-14 Chapter 1 of the report draws some early lessons from governments' fiscal responses to the pandemic and provides a roadmap for the recovery. Governments' measures to cushion the blow from the pandemic total a staggering \$12 trillion globally. These lifelines and the worldwide recession have pushed global public debt to an all-time high. But governments should not withdraw lifelines too rapidly. Government support should shift gradually from protecting old jobs to getting people back to work and helping viable but still-vulnerable firms safely reopen. The fiscal measures for the recovery are an opportunity to make the economy more inclusive and greener. Chapter 2 of this report argues that governments need to scale up public investment to ensure successful reopening, boost growth, and prepare economies for the future. Low interest rates make borrowing to invest desirable. Countries that cannot access finance will, however, need to do more with less. The chapter explains how investment can be scaled up while preserving quality. Increasing public investment by 1 percent of GDP in advanced and emerging economies could create 7 million jobs directly, and more than 20 million jobs indirectly. Investments in healthcare, housing, digitalization, and the environment would lay the foundations for a more resilient and inclusive economy.

The Decline of Mortality in Europe Roger Schofield 1991 This book examines the remarkable decline of mortality in Europe which began in the nineteenth century and continued in an uninterrupted fashion, into the early twentieth century. The transition of mortality between 1870 and 1920 had profound effects for European and American societies. Interpretations explaining such changes have become a hotbed of controversy. Some scholars stress the importance of improved nutrition, levels of income, and living standards as the crucial factors. Others consider public health, social organization, and scientific advances to be more significant. This volume brings to light the different positions held on these various issues, describes advances made in the field, and indicates directions for future research.

The Etruscans and the History of Dentistry Marshall J. Becker 2017-02-17 *The Etruscans and the History of Dentistry* offers a study of the construction and use of gold dental appliances in ancient Etruscan culture, and their place within the framework of a general history of dentistry, with special emphasis on appliances, from Bronze Age Mesopotamia and Egypt to modern Europe and the Americas. Included are many of the ancient literary sources that refer to dentistry - or the lack thereof - in Greece and Rome, as well as the archaeological evidence of ancient dental health. The book challenges many past works in exposing modern scholars' fallacies about ancient dentistry, while presenting the incontrovertible evidence of the Etruscans' seemingly modern attitudes to cosmetic dentistry.
