Peatlands mapping and monitoring The Food and Agriculture Organization of the United Nations 2020-03-01 Integration of peatlands into land-use monitoring systems is central to the conservation of their carbon storage - be they conserved, degraded or restored. Healthy peatlands mitigate climate change, enhance adaptive capacity and maintain ecosystem services and biodiversity. Albeit peatlands are starting to receive a high level of attention and the scientific basis for their monitoring has quickly developed over the last few years. Business Ethics and Risk Management Christoph Luetge 2013-12-01 This volume explores various aspects of risk taking. It offers an analysis of financial, entrepreneurial and social risks, as well as a discussion of the ethical implications of empirical findings. The main issues examined in the book are the financial crisis and its implications for business ethics. The book discusses unethical behaviour as a reputational risk (e.g., in the case of Goldman Sachs) and the question is raised as to what extent the financial crisis has changed the banks' entrepreneurial strategy. The book presents an analysis of the reasons leading to the crisis and identifies them as ethical dilemma structures. In addition, it looks at general questions regarding ethical behaviour and risk taking, such as: To what extent does the social embeddedness or abstraction play a role in guaranteeing ethical behaviour? What conclusions can be drawn from institutional or evolutionary perspectives on risk management? Finally, the book discusses further issues that become factors of risk within and between societies, such as work insecurity, corruption or the problem of facilitation payments as a risk in international transactions.

Feminism and the Women's Movement in Malaysia Maznah Mohamad 2006-04-18 Combining both personal and academic insights into the Malaysian women's movement, this study provides an in-depth account of the multiple struggles of the Malaysian women's movement, from securing gender equality in a patriarchal society to achieving unity among members of a multi-ethnic society that are further divided along class and religious lines. Most historical versions of national struggles have created icons out of male figures. The authors of this book have provided a corrective to this. They detail the importance of the role of the women's movement, led by numerous unsung personalities in promoting social change in Malaysia. The book centres on a crucial argument: that in the context of an ethnically fragmented post-colonial, authoritarian society, an autonomous woman movement, which began in the early eighties had actually achieved significant political success. However the study observes that by the late 1990s, feminist issues were also readily appropriated by the state and the market, and also suggests that the emergence of 'market feminism' poses specific challenges for the future of the Malaysian women's movement. This thorough and engaging account of feminism and the women's movement in Malaysia will capture the interest of scholars, policy makers and activists.

The Treatment of Shame and Guilt in Alcoholism Counseling Ron Potter-Efron 2013-04-15 This insightful new book sheds light directly on shame and guilt--interactive aspects of the human condition that are deeply involved in the development and treatment of alcoholism and chemical dependency. Contributors to this valuable book discuss the process of healing internalized shame within the chemically dependent client and among the family

members. They explore creative techniques that foster understanding and coping strategies--videotaping and storytelling with clay and stuffed animals. Professionals who are experienced in treating chemically dependent clients and their families explore shame and the healing of shame, while examining the culture within which both occur. A major focus is the destructiveness of shame and guilt--shame keeps the family from seeking help, erodes self-worth, and produces destructive secrets that cannot heal, and guilt may circulate freely between alcoholic and family members, so that everyone begins to feel responsible for the pain of others.

The Practice of Quality Management Phillip J. Lederer 2013-06-29 The Practice of Quality Management presents the results of eleven ground-breaking research projects in quality management. It is the first collection of research papers by academics in this area. The projects are empirical studies on total quality management that suggest new ways to think about quality. The objective of the research found in this book is to develop theory and to assist practice. Thus, this volume is of interest to both academic researchers and practising managers. The chapters fall into four categories: 'Performance', 'Understanding TQM', 'Organizations', and 'Using TQM'. All of the chapters show that there are many different applications and research issues associated with quality. The chapters on 'Understanding TQM' suggest that it is possible to develop and test theories of quality. The chapters on 'Performance' demonstrate that studies of the operational and financial effect of quality can yield positive results. Many thinkers on quality consider that organizational impacts of quality are the most important drivers of the quality process. The chapters on 'Organizations' present evidence on how quality programs affect human resource management, and organizational structure. Finally, the chapters on 'Using TQM' present several studies of applications of quality management.

The Atlas of Economic Complexity Ricardo Hausmann 2014-01-17 Maps capture data expressing the economic complexity of countries from Albania to Zimbabwe, offering current economic measures and as well as a guide to achieving prosperity Why do some countries grow and others do not? The authors of The Atlas of Economic Complexity offer readers an explanation based on "Economic Complexity," a measure of a society's productive knowledge. Prosperous societies are those that have the knowledge to make a larger variety of more complex products. The Atlas of Economic Complexity attempts to measure the amount of productive knowledge countries hold and how they can move to accumulate more of it by making more complex products. Through the graphical representation of the "Product Space," the authors are able to identify each country's "adjacent possible," or potential new products, making it easier to find paths to economic diversification and growth. In addition, they argue that a country's economic complexity and its position in the product space are better predictors of economic growth than many other well-known development indicators, including measures of competitiveness, governance, finance, and schooling. Using innovative visualizations, the book locates each country in the product space, provides complexity and growth potential rankings for 128 countries, and offers individual country pages with detailed information about a country's current capabilities and its diversification options. The maps and visualizations included in the Atlas can be used to find more viable paths to greater productive knowledge and prosperity.

Language Curriculum Design and Socialisation Peter Mickan 2012-11-23 This book applies social theory to curriculum design and sets out a program for language curriculum renewal for the 21st century. It includes many examples of text-based curricula and describes a plan for curriculum renewal based on texts as the unit of analysis for planning, for teaching and for assessment. Underpinned by Halliday's semiotic theory of language, the book combines the theory of language as a resource for meaning-making with learning language as learning to mean. The curriculum design constructs curriculum around social practices and their texts rather than presenting language as grammatical and lexical objects. This work will provide teachers, teacher educators and curriculum planners with a curriculum model for teaching children and adults in different contexts from preschool to adult education as well as serving as a practical guide for students.
