The Power of the Machine Alf Hornborg 2001-10-16 Hornborg argues that we are caught in a collective illusion about the nature of modern technology that prevents us from imagining solutions to our economic and environmental crises other than technocratic fixes. He demonstrates how the power of the machine generates increasingly asymmetrical exchanges and distribution of resources and risks between distant populations and ecosystems, and thus an increasingly polarized world order. The author challenges us to reconceptualize the machine—'industrial technomass'—as a species of power and a problem of culture. He shows how economic anthropology has the tools to deconstruct the concepts of production, money capital, and market exchange, and to analyze capital accumulation as a problem at the very interface of the natural and social sciences. His analysis provides an alternative understanding of economic growth and technological development. Hornborg's work is essential for researchers in anthropology, human ecology, economics, political economy, world-systems theory, environmental justice, and science and technology studies. **Vimanas and the wars of the gods** Enrico Baccarini 2016-08-03

An astonishing book that will lead to rewrite the history of mankind. An unexplored world, a journey beyond the boundaries of human history. From over five thousand years India and Pakistan seem to guard jealously a forgotten past, a secret locked inside of the oldest traditions that human history knows. The journey starts from an highly evolved civilization but fall into oblivion, a culture that left to posterity a huge amount of texts transmitted orally and later merged into Hinduism. Traditions that speak of lost civilizations, wars fought between men and gods with highly advanced technologies and machines capable of flying in the air and in space called Vimana. Following the tracks and studies conducted in the '70s by David William Davenport, has set new light on the events that led to the destruction of the city of Mohenjo Daro (Pakistan) and the disappearance of the Harappan civilization tying their story to submerged ruins discovered in the Indian Ocean and dated back to 10,000 years ago.

The Flight of the Creative Class Richard Florida 2010-01-07

Research-driven and clearly written, bestselling economist Richard Florida addresses the growing alarm about the exodus of high-value jobs from the USA. Today's most valued workers are what economist Richard Florida calls the Creative Class. In his bestselling *The Rise of the Creative Class*, Florida identified these variously skilled individuals as the source of economic revitalisation in US cities. In that book, he shows that investment in technology and a civic culture of tolerance (most often marked by the presence of a large gay community) are the key ingredients to attracting and maintaining a local creative class. In *The Flight of the Creative Class*, Florida expands his research to cover the global competition to attract the Creative Class. The USA once led the world in terms of creative capital. Since 2002,

factors like the Bush administration's emphasis on smokestack industries, heightened security concerns after 9/11 and the growing cultural divide between conservatives and liberals have put the US at a large disadvantage. With numerous small countries, such as Ireland, New Zealand and Finland, now tapping into the enormous economic value of this class - and doing all in their power to attract these workers and build a robust economy driven by creative capital - how much further behind will USA fall?

**Eva Loves... Eva** Sergio Buracchini 2017-01-27 Eva loves... Eva, is the story of two young women who are desperately searching for a love out of the ordinary that could fill the void they feel in their life since they were little girls. Giulia, a young woman of twenty-two, traumatized by her mother's experience, who had her when she was only sixteen years old, and by the absence of a father she has never known, falls in love with Natalia, a woman of twenty-seven years old who owns an art gallery. Natalia, born from a surrogate mother, has always known she was a woman who likes other women while Giulia is still a virgin. Giulia goes to work at Natalia's art gallery where she meets Roberto, an old friend from secondary school who is now the CEO of his father's firm. Giulia is torn between the attraction she feels for Roberto and the love she feels for Natalia who has done so much to improve her life. At the end, they both find the love that gives them the peace of mind they always longed for.

**The Architecture of Humanism** Geoffrey Scott 1914  
Renewing neighbourhoods Syrett, Stephen 2008-10-15 Jobs and enterprise are critical to creating viable neighbourhoods. Yet much recent policy activity aimed at the regeneration of deprived neighbourhoods has had only a marginal impact on the economic challenges presented by areas of concentrated disadvantage. This book directly addresses the economic development issues central to neighbourhood renewal, drawing on the authors' original research and wide-ranging analysis of recent academic theory

and policy practice. Their critical examination of the economic problems of deprived areas, and the range of employment and enterprise-related policy initiatives and governance arrangements that have attempted to address them, offers informed insights into what does and what does not work. Through its topical focus on issues of work and enterprise in deprived neighbourhoods, *Renewing neighbourhoods* goes to the heart of much current policy practice that seeks to combine concerns of economic competitiveness with those of social exclusion. It will be essential reading for academics, practitioners and policy makers working in the fields of urban regeneration, neighbourhood renewal and local and regional economic development. It will also be a key text for students of urban studies, planning, social policy, human geography and related disciplines.

Spatial Planning and the New Localism Graham Haughton

2018-05-11 This book looks at the transition from New Labour's 'Spatial Planning' approach to the Coalition Government's preferred 'Localism' approach. Localism we are told will liberate local planners from the heavy hand of central government and allow planning to flourish at the local level. Alternatively, austerity cuts nationally mean planning faces cuts. In just two years the machinery of regional planning has been dismantled and local authorities are being asked to do more with less. Innovation is also evident, however, notably with the introduction of neighbourhood planning and Local Enterprise Partnerships. This collection contains chapters looking at the planning system overall, sustainability and planning, new approaches to infrastructure planning, and the critical interface between urban policy, local economic development and planning. This book was published as a special issue of *Planning Practice and Research*. It also contains a brand new afterword, written by the editors: 'Localism, austerity and planning.'

Planning and Place in the City Marichela Sepe 2013 In this volume, Marichela Sepe explores the preservation, reconstruction

and enhancement of cultural heritage and place identity. She outlines the history of the concept of placemaking, and sets out the range of different methods of analysis and assessment that are used to help pin down the nature of place identity.

**Le mani su Milano** Franco Stefanoni

2014-05-13T00:00:00+02:00 Immobiliari, costruttori, politici, banchieri, professionisti: i nomi e i cognomi, gli affari e il malaffare del gruppo di potere che a Milano comanda sull'immenso patrimonio del mattone. La Milano da mangiare dopo la Milano da bere. In una parabola che va dagli anni Ottanta fino ai Duemila, un'oligarchia fondata sul cemento ha conquistato la capitale economica del paese. Ha saputo essere prepotente e ingorda. In città, l'ultima parola è quasi sempre rimasta nella disponibilità di una manciata di costruttori, immobiliari, palazzinari, a costituire un sistema concentrico capace di dettare la linea a scapito di chiunque altro. La politica locale è stata spesso succube o complice, i cittadini impotenti, le banche conniventi. In questo libro è raccontata la storia di chi ha comandato e comanda nella spartizione del territorio milanese e delle sue vicinanze, di chi ha messo le mani su quartieri del centro e delle periferie, di chi ha disegnato la rivoluzione urbanistica di immense aree ex industriali, di chi si è appropriato di un business da decine di miliardi di euro, incoraggiato dalle amministrazioni pubbliche e generosamente finanziato dagli istituti di credito. Milano terra di conquista di Salvatore Ligresti e poi dei suoi eredi. Milano, ex capitale morale trasformata nell'ombelico del mondo della corruttela, bersaglio dei peggiori appetiti. E poi rete di interessi che non conosce steccati, che pervade appalti, concessioni, varianti di piani regolatori, che scatena aspettative dorate. Con unmiraggio finale: l'Expo 2015.

**Eye of the Century** Francesco Casetti 2008-05-14 Is it true that film in the twentieth century experimented with vision more than any other art form? And what visions did it privilege? In this brilliant book, acclaimed film scholar Francesco Casetti situates

the cinematic experience within discourses of twentieth-century modernity. He suggests that film defined a unique gaze, not only because it recorded many of the century's most important events, but also because it determined the manner in which they were received. Casetti begins by examining film's nature as a medium in an age obsessed with immediacy, nearness, and accessibility. He considers the myths and rituals cinema constructed on the screen and in the theater and how they provided new images and behaviors that responded to emerging concerns, ideas, and social orders. Film also succeeded in negotiating the different needs of modernity, comparing and uniting conflicting stimuli, providing answers in a world torn apart by conflict, and satisfying a desire for everydayness, as well as lightness, in people's lives. The ability to communicate, the power to inform, and the capacity to negotiate-these are the three factors that defined film's function and outlook and made the medium a relevant and vital art form of its time. So what kind of gaze did film create? Film cultivated a personal gaze, intimately tied to the emergence of point of view, but also able to restore the immediacy of the real; a complex gaze, in which reality and imagination were combined; a piercing gaze, achieved by machine, and yet deeply anthropomorphic; an excited gaze, rich in perceptive stimuli, but also attentive to the spectator's orientation; and an immersive gaze, which gave the impression of being inside the seen world while also maintaining a sense of distance. Each of these gazes combined two different qualities and balanced them. The result was an ever inventive synthesis that strived to bring about true compromises without ever sacrificing the complexity of contradiction. As Casetti demonstrates, film proposed a vision that, in making opposites permeable, modeled itself on an oxymoronic principle. In this sense, film is the key to reading and understanding the modern experience.

*Leonardo* Antonio Forcellino 2018-04-27 A visionary scientist, a supreme painter, a man of eccentricity and ambition: Leonardo da

Vinci had many lives. Born from a fleeting affair between a country girl and a young notary, Leonardo was never legitimized by his father and received no formal education. While this freedom from the routine of rigid and codified learning may have served to stimulate his natural creativity, it also caused many years of suffering and an insatiable need to prove his own worth. It was a striving for glory and an obsessive thirst for knowledge that prompted Leonardo to seek the protection and favour of the most powerful figures of his day, from Lorenzo de' Medici to Ludovico Sforza, from the French governors of Milan to the pope in Rome, where he could vie for renown with Michelangelo and Raphael. In this revelatory account, Antonio Forcellino draws on his expertise - both as historian and as restorer of some of the world's greatest works of art - to give us a more detailed view of Leonardo than ever before. Through careful analyses of his paintings and compositional technique, down to the very materials used, Forcellino offers fresh insights into Leonardo's artistic and intellectual development. He spans the great breadth of Leonardo's genius, discussing his contributions to mechanics, optics, anatomy, geology and metallurgy, as well as providing acute psychological observations about the political dynamics and social contexts in which Leonardo worked. Forcellino sheds new light on a life all too often overshadowed and obscured by myth, providing us with a fresh perspective on the personality and motivations of one of the greatest geniuses of Western culture.

Gods, Heroes and Myths Anna Morena Mozzillo 2017-01-11 The book presents the fundamental stories and legends of Greek (and Latin) mythology. The intent is to preserve this rich and varied heritage, which is the basis of Western culture and permeates every form of art, even contemporary. It is divided into the following four parts: The Origins - The Gods of Olympus - Other Gods and Legends - Weird and Wonderful Creatures. Fact sheets follow the narratives, which can also serve for educational use.

**Urban Renaissance?** Imrie, Rob 2003-05-21 This book documents and assesses the core of New Labour's approach to the revitalisation of cities, that is, the revival of citizenship, democratic renewal, and the participation of communities to spear head urban change. In doing so, the book explores the meaning, and relevance, of 'community' as a focus for urban renaissance. It interrogates the conceptual and ideological content of New Labour's conceptions of community and, through the use of case studies, evaluates how far, and with what effects, such conceptions are shaping contemporary urban policy and practice. The book is an important text for students and researchers in geography, urban studies, planning, sociology, and related disciplines. It will also be of interest to officers working in local and central government, voluntary organisations, community groups, and those with a stake in seeking to enhance democracy and community involvement in urban policy and practice.

**Inequality** Michele Alacevich 2017-11-21 Inequality endangers the fabric of our societies, distorts the functioning of democracy, and derails the globalization process. Yet, it has only recently been recognized as a problem worth examining. Why has this issue been neglected for so long? In *Inequality: A Short History*, Michele Alacevich and Anna Soci discuss the emergence of the inequality question in the twentieth century and explain how it is

related to current issues such as globalization and the survival of democracy. The authors also discuss trends and the future of inequality. Inequality is a pressing issue that not only affects living standards, but is also inextricably linked to the way our democracies work.

The Training & Work of an Initiate Dion Fortune 2000-11-01 The Training and Work of an Initiate shows how, from ancient Qabalistic, Greek, and Egyptian roots, the Western Esoteric Systems have an unbroken initiation tradition that has been handed down from adept to neophyte. In this book, Dion Fortune indicates the broad outlines and underlying principles of these systems, illuminating an obscure and greatly misunderstood aspect of the path. Thanks to her teaching, even if you cannot give your entire life over to the pursuit of esoteric science, you can still develop a philosophy of life and learn your individual relationship to the cosmic whole. You will discover how initiates prepare body, mind, and spirit for the challenging journey that is the esoteric path, what the path of initiation looks like, and what it is to be called to this work. The book is filled with accessible information, presented in a way so that "even that which the smallest cup can carry away is the true water of life". This revised edition contains a new foreword by Gareth Knight, and an index.

**The Virtual Window** Anne Friedberg 2009-02-13 From the Renaissance idea of the painting as an open window to the nested windows and multiple images on today's cinema, television, and computer screens: a cultural history of the metaphoric, literal, and virtual window. As we spend more and more of our time staring at the screens of movies, televisions, computers, and handheld devices—"windows" full of moving images, texts, and icons—how the world is framed has become as important as what is in the frame. In *The Virtual Window*, Anne Friedberg examines the window as metaphor, as architectural component, and as an opening to the dematerialized reality we see on the screen. In *De pictura* (1435), Leon Battista Alberti famously instructed painters

to consider the frame of the painting as an open window. Taking Alberti's metaphor as her starting point, Friedberg tracks shifts in the perspectival paradigm as she gives us histories of the architectural window, developments in glass and transparency, and the emerging apparatuses of photography, cinema, television, and digital imaging. Single-point perspective—Alberti's metaphorical window—has long been challenged by modern painting, modern architecture, and moving-image technologies. And yet, notes Friedberg, for most of the twentieth century the dominant form of the moving image was a single image in a single frame. The fractured modernism exemplified by cubist painting, for example, remained largely confined to experimental, avant-garde work. On the computer screen, however, where multiple 'windows' coexist and overlap, perspective may have met its end. In this wide-ranging book, Friedberg considers such topics as the framed view of the camera obscura, Le Corbusier's mandates for the architectural window, Eisenstein's opinions on the shape of the movie screen, and the multiple images and nested windows commonly displayed on screens today. The Virtual Window proposes a new logic of visibility, framed and virtual: an architecture not only of space but of time.

**Reconsidering Localism** Simin Davoudi 2015-01-09 "Localism" has been deployed in recent debates over planning law as an anodyne, grassroots way to shape communities into sustainable, human-scale neighborhoods. But "local" is a moving category, with contradictory, nuanced dimensions. *Reconsidering Localism* brings together new scholarship from leading academics in Europe and North America to develop a theoretically-grounded critique and definition of the new localism, and how it has come to shape urban governance and urban planning. Moving beyond the UK, this book examines localism and similar shifts in planning policy throughout Europe, and features essays on localism and place-making, sustainability, social cohesion, and citizen participation in community institutions. It explores how debates

over localism and citizen control play out at the neighborhood, institutional and city level, and has come to effect the urban landscape throughout Europe. Reconsidering Localism is a current, vital addition to planning scholarship.

**Global Magic** Alf Hornborg 2016-04-08 Modern thought on economics and technology is no less magical than the world views of non-modern peoples. This book reveals how our ideas about growth and progress ignore how money and machines throughout history have been used to exploit less affluent parts of world society. The argument critically explores a middle ground between Marxist political ecology and Actor-Network Theory.

**The Media City** Scott McQuire 2008-02-21 "If only more new media commentators had this level of historical-critical reference,

engaging, good stories, and a degree of wonder at what media and windows bring to the city, to life." - John Hutnyk, Goldsmiths, University of London "Just when you thought the last word had been said about cities and media, along comes Scott McQuire to breathe new life into the debate. When revisiting existing pathways, his always ingenious eyes produce startling and original insights. When striking out into new territory, he opens up before us inspiring new vistas. I love this book." - James Donald, University of New South Wales "A book that crams into a single chapter more insights and illustrations than seems feasible, yet which ties all threads together through a consistent, theoretically rich analysis of the interplay of media and city... Writing with effusiveness uncharacteristic of back-cover blurbs on academic tomes, James Donald says 'I love this book'. But I will end by echoing his praise, and make a promise to readers: you will love *The Media City*, too." - European Journal of Communication "Refreshingly clear, getting to grips with some of the key concepts of urban sociology in a way that moves beyond the wistful evocation and splatter of undigested terms that characterises so much academic writing on culture and cities." - Media, Culture & Society Significant changes are occurring in the spaces and rhythms of contemporary cities and in the social functioning of media. This forceful book argues that the redefinition of urban space by mobile, instantaneous and pervasive media is producing a distinctive mode of social experience. Media are no longer separate from the city. Instead the proliferation of spatialized media platforms has produced a media-architecture complex - the media city. Offering critical and historical analysis at the deepest levels, *The Media City* links the formation of the modern city to the development of modern image technologies and outlines a new genealogy for assessing contemporary developments such as digital networks and digital architecture, web cams and public screens, surveillance society and reality television. Wide-ranging and thoughtfully illustrated, it

intersects disciplines and connects phenomena which are too often left isolated from each other to propose a new way of understanding public and private space and social life in contemporary cities. It will find a broad readership in media and communications, cultural studies, social theory, urban sociology, architecture and art history. Winner of the 2009 Jane Jacobs Urban Communication Award, awarded by the Urban Communication Association.

**Atlante delle mafie (vol. V)** AA.VV.

2018-02-14T00:00:00+01:00 Il quinto volume dell'Atlante delle mafie è dedicato al tema della corruzione e del suo rapporto con le mafie. Pur essendo due reati diversi, due fattispecie criminali differenti, il volume mette in evidenza la loro particolare, complessa e durevole relazione. Se si confronta l'inchiesta milanese «Mani pulite» dell'inizio degli anni Novanta del Novecento con l'attualità, si può facilmente notare che la differenza non consiste nella maggiore o minore estensione della corruzione ma in un semplice elemento la cui portata non è stata ancora esaminata in tutti i suoi aspetti: i mafiosi sono tra i principali attori degli episodi di corruzione degli ultimi anni, anzi si può parlare di una particolare «governance» mafiosa della corruzione, e ciò non avviene solo al Sud. Anche al Nord, infatti, la corruzione si abbina sempre più spesso a episodi in cui sono coinvolte le organizzazioni mafiose. Le mafie sono, insomma, sempre più protagoniste del sistema della corruzione. Si ha la netta impressione che corruzione e mafie abbiano smarrito i loro confini e stabilito relazioni e nessi davvero intricati. Le mafie possono esistere senza corruzione? Sì, sicuramente, ma solo se restano sui settori illegali (droga, contrabbando, gioco d'azzardo, ecc.); se, invece, si spostano sui settori legali dell'economia non possono consolidarsi senza corruzione. E la corruzione esiste senza le mafie? Sì, certamente. Ma dove le mafie entrano nel sistema della corruzione, ne diventano protagoniste assolute e dettano le regole. In ogni caso, non sono le mafie a causare la crescita della corruzione; esse arrivano dove già c'è. La corruzione e le mafie sono due «questioni» che affondano le

origini nel passato ma sono a loro agio nel presente, sono elementi di “lunga durata” della storia italiana, che mantengono una impressionante continuità e presenza nell’oggi, coniugando insieme arcaicità e modernità. Esse sono «criminalità di relazione», basate sulla violenza (le mafie) o sul potere (la corruzione) che pur provenendo da altre epoche storiche hanno trovato una particolare sintonia con la contemporaneità. Perciò i curatori dell’opera non hanno voluto affrontare la questione del rapporto tra mafie e corruzione dal punto di vista penale né tantomeno giurisprudenziale, ma da quello storico e sociologico, ben al di là della sentenza su Mafia capitale, convinti che molti dei nostri problemi abbiano radici così profonde e così lontane nel tempo da essere difficilmente riconducibili a quanto è accaduto solo nell’ultimo periodo di storia italiana. Al volume hanno collaborato i maggiori studiosi in Italia dell’argomento, oltre alle tre figure istituzionali più importanti in materia: Rosy Bindi, presidente della Commissione parlamentare antimafia, Raffaele Cantone, presidente nazionale dell’Autorità anticorruzione e Franco Roberti, procuratore nazionale antimafia.
