Handbook of Perinatal Clinical Psychology Rosa Maria Quatraro 2020-03-26 The book examines the major issues in perinatal clinical psychology with the presence of theoretical information and operational indications, through a biopsychosocial approach. The multiplicity of scientific information reported makes this book both a comprehensive overview on the major perinatal mental health disorders and illnesses, and a clinical guide. It covers perinatal clinical psychology through a journey of 15 chapters, putting the arguments on a solid theoretical basis and reporting multiple operational indications of great utility for daily clinical practice. It has well documented new evidence bases in the field of clinical psychology that have underpinned the conspicuous current global and national developments in perinatal mental health. As such, it is an excellent resource for researchers, policy makers, and practitioners - in fact, anyone and everyone who wishes to understand and rediscover, in a single opera, the current scientific and application scenario related to psychological health during pregnancy and after childbirth.

History of the Council of Europe Birte Wassenberg 2013-10-15 The Council of Europe, the oldest European organisation, was founded in 1949 with the aim of unifying the continent as a whole. The decision to establish its headquarters in Strasbourg was, moreover, symbolic of the desire for reconciliation between peoples. From the outset the Council of Europe adopted an institutional structure comprising a committee of ministers and a parliamentary assembly - the first in Europe. This book retraces the history of the Organisation. Consisting initially of Western European states, the Council of Europe was destined to embrace all the continent's countries, but the Cold War delayed its enlargement. It is only since 1989 that the Council of Europe has become a truly pan-European organisation, now comprising 47 member states. Its mission is based on three major goals: protecting human rights, promoting democratic values and guaranteeing the rule of law. The Council of Europe is also very active in fostering co-operation in all areas of life: education, sport, culture, etc. Starting in 1959, the European Court of Human Rights grew to become the Organisation's flagship institution: its judgments are binding on the member states. As an intergovernmental organisation, the Council of Europe has had to contend with the growth of the European Union and has sought constantly to redefine its role in international relations. In these early years of the 21st century, will it succeed in securing a key position in the European institutional architecture?

The Mercury 13 Martha Ackmann 2003-06-03 For readers of *The Astronaut Wives Club*, *The Mercury 13* reveals the little-known true story of the remarkable women who trained for NASA space flight. In 1961, just as NASA launched its first man into space, a group of women underwent secret testing in the hopes of becoming America's first female astronauts. They passed the same battery of tests at the legendary Lovelace Foundation as did the Mercury 7 astronauts, but they were summarily dismissed by the boys' club at NASA and on Capitol Hill. The USSR sent its first woman into space in 1963; the United States did not follow suit for another twenty years. For the first time, Martha Ackmann tells the story of the dramatic events surrounding these thirteen remarkable women, all crackerjack pilots and patriots who sometimes sacrificed jobs and marriages for a chance to participate in America's space race against the Soviet Union. In addition to talking extensively to these women, Ackmann interviewed Chuck Yeager, John Glenn, Scott Carpenter, and others at NASA and in the White House with firsthand knowledge of the program, and includes here never-before-seen photographs of the Mercury 13 passing their Lovelace tests. Despite the crushing disappointment of watching their dreams being derailed, the Mercury 13 went on to extraordinary achievement in their lives: Jerrie Cobb, who began flying when she was so small she had to sit on pillows to see out of the cockpit, dedicated her life to flying solo missions to the Amazon rain forest; Wally Funk, who talked her way into the Lovelace trials, went on to become one of the first female FAA investigators; Janey Hart, mother of eight and, at age forty, the oldest astronaut candidate, had the political savvy to steer the women through congressional hearings and later helped found the National Organization for Women. A provocative tribute to these extraordinary women, *The Mercury 13* is an unforgettable story of determination, resilience, and inextinguishable hope.

Auntie Mame Patrick Dennis 2002-02-05 With a wit as sharp as a vodka stinger and a heart as free as her spirit, Auntie Mame burst onto the literary scene in 1955--and today remains one of the most unforgettable characters in contemporary fiction. Wildly successful when it was first published in 1955, Patrick Dennis' Auntie Mame sold over two million copies and stayed put on the New York Times bestseller list for 112 weeks. It was made into a play, a Broadway and a Hollywood musical, and a fabulous movie starring Rosalind Russell. Since then, Mame has taken her rightful place in the pantheon of Great and Important People as the world's most beloved, madcap, devastatingly sophisticated, and glamorous aunt. She is impossible to resist, and this hilarious story of an orphaned ten-year-old boy sent to live with his aunt is as delicious a read in the twenty-first century as it was in the 1950s. Follow the rollicking adventures of this unflappable flapper as seen through the wide eyes of her young, impressionable nephew and discover anew or for the first time why Mame has made the world a more wonderful place. "Outrageous, hilarious, ribald, sophisticated, slapsatiric." *The Denver Post*

Our House Is on Fire Greta Thunberg 2020-03-17 "A must-read ecological message of hope . . . Everyone with an interest in the future of this planet should read this book." --David Mitchell, *The Guardian* When climate activist Greta Thunberg was eleven, her parents Malena and Svante, and her little sister Beata, were facing a crisis in their own home. Greta had stopped eating and speaking, and her mother and father had reconfigured their lives to care for her. Desperate and searching for answers, her parents discovered what was at the heart of Greta's distress: her imperiled future on a rapidly heating planet. Steered by Greta's determination to understand the truth and generate change, they began to see the deep connections between their own suffering and the planet's. Written by a remarkable family and told through the voice of an iconoclastic mother, *Our House Is on Fire* is the story of how they fought their problems at home by taking global action. And it is the story of how Greta decided to go on strike from school, igniting a worldwide rebellion.

Pythagoras' Trousers Margaret Wertheim 1997 An "immensely accessible tour (which tells) how the physics lab became another Vatican with a no-girls-allowed sign on its door" (Susan Faludi) this spirited look at the relationship between physics and religion argues that gender inequity in physics is a result of the religious origins of the enterprise.

Coping and Self-Concept in Adolescence H.A. Bosma 2012-12-06 Self-concept and coping behaviour are important aspects of development in adolescence. Despite their developmental significance, however, the two areas have rarely been considered in relation to each other. This book is the first in which the two areas are brought together; it suggests that this interaction can open the way to new possibilities for further research and to new implications for applied work with adolescents. Two separate chapters review research carried out in each of the areas. These are followed by a series of more empirically focussed chapters in which issues such as changes in relationship patterns, difficult school situations, leaving school, use of leisure, anxiety and suicidal behaviour are examined in the context of self-concept and coping. The final chapter seeks to identify

some of the central themes emerging from this work and discusses possible research and applied implications.

The Nuptial Mystery Angelo Scola 2005-05-12 Translated by Michelle K. Borrás The idea of love pervades our society, yet it is nearly impossible to answer the question What is love? especially as we witness the divorce of love from sexuality and of sexuality from procreation. Aware that many people today are skeptical about marriage, Angelo Cardinal Scola nevertheless suggests that only in the category of nuptial mystery do we find a way to adequately describe the phenomenon of love. A bright new leader in the Catholic Church, Cardinal Scola argues that the male-female relationship lies near the heart of what it means to bear the image of God. Scola's book explores the essential sexual differences that both separate and unite men and women, and it shows how men and women can realize their purpose in marriage or celibacy. Conversant with papal teaching and Catholic writers from Aquinas to von Balthasar, Cardinal Scola writes with a deep regard for marriage and the family. His Nuptial Mystery will leave readers with a thoroughly Christian appreciation for incarnate love.

Homosexuality and Italian Cinema Mauro Giori 2017-11-18 This book is the first to establish the relevance of same-sex desires, pleasures and anxieties in the cinema of post-war Italy. It explores cinematic representations of homosexuality and their significance in a wider cultural struggle in Italy involving society, cinema, and sexuality between the 1940s and 1970s. Besides tracing the evolution of representations through both art and popular films, this book also analyses connections with consumer culture, film criticism and politics. Giori uncovers how complicated negotiations between challenges to and valorization of dominant forms of knowledge of homosexuality shaped representations and argues that they were not always the outcome of hatred but also sought to convey unmentionable pleasures and complicities. Through archival research and a survey of more than 600 films, the author enriches our understanding of thirty years of Italian film and cultural history.

Letters to My Daughters Fawzia Koofi 2012-01-13 Now available in paperback, in this courageous memoir, Fawzia Koofi, Afghanistan's most popular female politician, gives us her first-hand account of Afghan history through the rule of the Mujahedeen and Taliban, her experiences of the Afghanistan War, and the effects of these events on the lives of women in Afghanistan. In writing Letters to My Daughters, Fawzia has created a fresh take on Afghan society and Islam, and a gripping account of a life lived under the most harrowing of circumstances. Fawzia is the nineteenth child of twenty-three in a family with seven wives. Her father was an incorruptible politician strongly attached to Afghan tradition. When he was murdered by the Mujahedeen, Fawzia's illiterate mother escaped with her children and decided to send the ten-year-old Fawzia to school. As the civil war raged, Fawzia dodged bullets and snipers to attend class, determined to be the first person in her family to receive an education. Fawzia went on to marry a man she loved, and they had two cherished daughters, Shohra and Shaharзад. Sadly, the arrival of the Taliban spelled an end to Fawzia's freedom. Outraged and deeply saddened by the injustice she saw around her, and by the tainting of her Islamic faith, she discovered politics for herself, following in her father's footsteps. Tragically, this choice has led to security threats to her life by Islamic extremists. Thus, Letters to My Daughters is not only a record of her life, but also acts as a literal letter through which Fawzia can pass on her wisdom about justice and dignity to her daughters, not knowing for how long she will survive such attacks.

Dialogic Education Neil Phillipson 2016-12-01 Dialogue has long been used in primary classrooms to stimulate thinking, but it is not always easy to unite the creative thinking of good dialogue with the need for children to understand the core concepts behind knowledge-rich subjects. A sound understanding of key concepts is essential to progress through the national curriculum, and assessment of this understanding along with effective feedback is central to good practice. Dialogic Education builds upon decades of practical classroom research to offer a method of teaching that applies the power of dialogue to achieving conceptual mastery. Easy-to-follow template lesson plans and activity ideas are provided, each of which has been tried and tested in classrooms and is known to succeed. Providing a structure for engaging children and creating an environment in which dialogue can flourish, this book is separated into three parts: Establishing a classroom culture of learning; Core concepts across the curriculum; Wider dialogues: Educational adventures in the conversation of mankind. Written to support all those in the field of primary education, this book will be an essential resource for student, trainee and qualified primary teachers interested in the educational importance of dialogue.

Women and Language in Transition Joyce Penfield 1987-08-01 This collection of essays deals with the interplay of language and social change, asking the question: How can language and society be made gender equal? The contributors examine the critical role of language in the lives of white women and women of color in the United States. Since language pervades many dimensions of women's lives, this study takes a multi-disciplinary approach to the issues considered. The volume is divided into three sections. The first, "Liberating Language," focuses on the active role women had in altering the extent of linguistic sexism in English during the 1970s. A second section, "Identity Creation," deals with the alteration of that portion of language which serves to name women and their experiences. The final section, "Women of Color," offers a rare and timely look at the particular problems confronted by minority women. It argues that women of color have different problems and different links to language than white middle-class women.

The Gettysburg Address Abraham Lincoln 2009-08-27 The Address was delivered at the dedication of the Soldiers' National Cemetery in Gettysburg, Pennsylvania, on the afternoon of Thursday, November 19, 1863, during the American Civil War, four and a half months after the Union armies defeated those of the Confederacy at the decisive Battle of Gettysburg. In just over two minutes, Lincoln invoked the principles of human equality espoused by the Declaration of Independence and redefined the Civil War as a struggle not merely for the Union, but as "a new birth of freedom" that would bring true equality to all of its citizens, and that would also create a unified nation in which states' rights were no longer dominant. Throughout history, some books have changed the world. They have transformed the way we see ourselves - and each other. They have inspired debate, dissent, war and revolution. They have enlightened, outraged, provoked and comforted. They have enriched lives - and destroyed them. Now Penguin brings you the works of the great thinkers, pioneers, radicals and visionaries whose ideas shook civilization and helped make us who we are.

Migration and the Search for Home Paolo Boccagni 2016-10-31 This book explores the impact of transnational migration on the views, feelings, and practices of home among migrants. Home is usually perceived as what placidly lies in the background of everyday life, yet migrants' experience tells a different story: what happens to the notion of home, once migrants move far away from their "natural" bases and search for new ones, often under marginalized living conditions? The author analyzes in how far migrants' sense of home relies on a dwelling place, intimate relationships, memories of the past, and aspirations for the future—and what difference these factors make in practice. Analyzing their claims, conflicts, and dilemmas, this book showcases how in the migrants' case, the sense of home turns from an apparently intimate and domestic concern into a major public question.

Compasito Nancy Flowers 2007-01-01 Living among other people, in their families and communities, children become aware from a very early age of questions related to justice, and they search for the meaning of the world. By fostering an understanding of human rights, shaping opinion and developing attitudes, human rights education strongly supports this natural interest and learning process. This is what human rights education is about and this is what 'Compasito manual on human rights education for children' is for. 'Compasito' is a starting point for educators, teachers and trainers who are ready to deal with human rights education with children of 7-13 years. The book covers the key concepts of human rights and children's rights, and provides substantial theoretical background to 13 key human rights issues, such as democracy, citizenship, gender equality, environment, media, poverty, and violence. The 42 practical activities serve to engage and motivate children to recognise human rights issues in their own environment. They help children to develop critical thinking, responsibility and a sense of justice, and help them learn how to take action to contribute to the betterment of their school or community. The manual also gives practical tips on how it can be used in various formal and non-formal educational settings.

Taken for Grantedness Richard Ling 2012-10-26 An examination of how the mobile phone has become part of the fabric of society—as did such earlier technologies as the clock and the car. Why do we feel insulted or exasperated when our friends and family don't answer their mobile phones? If the Internet has allowed us to broaden our social world into a virtual friend-net, the mobile phone is an instrument of a more intimate social sphere. The mobile phone provides a taken-for-granted link to the people to whom we are closest; when we are without it, social and domestic disarray may result. In just a few years, the mobile phone has become central to the functioning of society. In this book, Rich Ling explores the process by which the mobile phone has become embedded in society, comparing it to earlier technologies that changed the character of our social interaction and, along the way, became taken for granted. Ling, drawing on research, interviews, and quantitative material, shows how the mobile phone (and the clock and the automobile before it) can be regarded as a social mediation technology, with a critical mass of users, a supporting ideology, changes in the social ecology, and a web of mutual expectations regarding use. By examining the similarities and synergies among these three technologies, Ling sheds a more general light on how technical systems become embedded in society and how they support social interaction within the closest sphere of friends and family.

Women in Academe Mariam K. Chamberlain 1989-03-16 The role of women in higher education, as in many other settings, has undergone dramatic changes during the past two decades. This significant period of progress and transition is definitively assessed in the landmark volume, *Women in Academe*. Crowded out by returning veterans and pressed by social expectations to marry early and raise children, women in the 1940s and 1950s lost many of the educational gains they had made in previous decades. In the 1960s women began to catch up, and by the 1970s women were taking rapid strides in academic life. As documented in this comprehensive study, the combined impact of the women's movement and increased legislative attention to issues of equality enabled women to make significant advances as students and, to a lesser extent, in teaching and academic administration. *Women in Academe* traces the phenomenal growth of women's studies programs, the notable gains of women in non-traditional fields, the emergence of campus women's centers and research institutes, and the increasing presence of minority and re-entry women. Also examined are the uncertain future of women's colleges and the disappointingly slow movement of women into faculty and administrative positions. This authoritative volume provides more current and extensive data on its subject than any other study now available. Clearly and objectively, it tells an impressive story of progress achieved—and of important work still to be done.

Overcoming Heterosexism and Homophobia James Thomas Sears 1997 Few aspects of American military history have been as vigorously debated as Harry Truman's decision to use atomic bombs against Japan. In this carefully crafted volume, Michael Kort describes the wartime circumstances and thinking that form the context for the decision to use these weapons, surveys the major debates related to that decision, and provides a comprehensive collection of key primary source documents that illuminate the behavior of the United States and Japan during the closing days of World War II. Kort opens with a summary of the debate over Hiroshima as it has evolved since 1945. He then provides a historical overview of the events in question, beginning with the decision and program to build the atomic bomb. Detailing the sequence of events leading to Japan's

surrender, he revisits the decisive battles of the Pacific War and the motivations of American and Japanese leaders. Finally, Kort examines ten key issues in the discussion of Hiroshima and guides readers to relevant primary source documents, scholarly books, and articles.
