Building atmosphere Juhani Pallasmaa 2013 Atmosphere is an essential concept for Swiss architect Peter Zumthor. In his text *Atmospheres* (1996), Zumthor identified a series of themes that play a role in his work in achieving architectonic atmosphere. OASE exchanges ideas with Zumthor about the current relevance of this text, and about the practice of bringing together these elements in the design and construction process. Finnish architect Juhani Pallasmaa relates atmosphere in architecture to examples and theories from other disciplines like psychology and the visual arts. Zumthor and Pallasmaa also introduce the work of contemporary architects who in their view succeed in truly creating atmosphere through construction.

Mediating the Human Body Leopoldina Fortunati 2003-06-20 The ever-increasing integration of technology and the human body is attracting attention from religious, business, and political leaders around the world, and the topic promises to be a significant social issue in the 21st century. In *Mediating the Human Body: Technology, Communication, and Fashion*, editors Leopoldina Fortunati, James E. Katz, and Raimonda Riccini bring together a thoughtful group of leading international scholars and analysts to explore the effects of new technologies on human beings. They focus specifically on the intersection of new communication technologies and the body, and offer novel insights based on recent theoretical progress and current research on new interpersonal technology. Through literary analysis, historical comparisons, analytical reports, and speculative interpretations, the contributors to this volume seek to understand the experience of the body as it is mediated among competing forces and intellectual domains. Arising from The Human Body Between Technologies, Communication and Fashion symposium held in Milan, Italy, contributions cover a wide array of topics and offer varied perspectives on how communication technologies are assimilated into people's lives, bodies, and homes, and thus become part of individuals' self-images and social relationships. From this multidisciplinary, multi-national base, the volume illuminates the sense and dimension of this interpenetration between body and technology. In its broad scope, the topics range from the wellsprings of consciousness to the use of technology as a fashion statement. Bringing together scholarship from a variety of disciplines, including communication, medicine, technology, and human-computer interaction, this distinctive anthology will provide new insights to scholars and advanced students exploring body-technology intersections and the attendant

implications. *Mediating the Human Body* offers a unique contribution to future discussions, and will be relevant to continuing study and research in communication and technology, human-computer interaction, gender studies, social psychology, and design.

Finiture murarie e architetture nel Medioevo. Una panoramica e tre casi di studio nell'Italia centro-meridionale. Ediz. illustrata Donatella Fiorani 2011-11-10

Averno Louise Glück 2014-07-08 Averno is a small crater lake in southern , regarded by the ancient Romans as the entrance to the underworld. That place gives its name to Louise Glück's eleventh collection: in a landscape turned irretrievably to winter, it is the only source of heat and light, a gate or passageway that invites traffic between worlds while at the same time opposing their reconciliation. Averno is an extended lamentation, its long, restless poems no less spellbinding for being without plot or hope, no less ravishing for being savage, grief-stricken. What Averno provides is not a map to a point of arrival or departure, but a diagram of where we are, the harrowing, enduring presence. Averno is a 2006 National Book Award Finalist for Poetry.

Einstein and the Time Machine Luca Novelli 2017 Albert Einstein wasn't afraid to think for himself. Working as a clerk in the patent office in Bern, Switzerland, he wrote papers with fantastical theories--that light is both a wave and a particle that matter can become energy, and energy can become matter; that space can "bend," and time is relative. His revolutionary theories turned the world of physics upside down, and earned him a Nobel Prize. *Einstein and the Time Machine* tells the story of one of the greatest thinkers of the 20th century, as well as the basics of his Theory of Relativity.

Peter Zumthor Therme Vals Sigrid Hauser 2007 Therme Vals, the spa complex built in the Swiss Alps by celebrated architect Peter Zumthor, became an icon of contemporary architecture soon after its opening in 1996. Inspired by the spa's majestic surroundings, Zumthor built the structure on the sharp grade of an Alpine mountain slope with grass-topped roofs to mimic Swiss meadows, captured here in a series of sumptuous images. This is the only book-length study of this singular building. It features the architect's own original sketches and plans for its design as well as striking photographs of the structure. Architectural scholar Sigrid Hauser contributes an essay drawing out the connections between the elemental nature of the spa and mythology, bathing, and purity. Annotations by Peter Zumthor on his design concept and the building process elucidate the structure's symbiotic relationship to its natural surroundings, revealing, for example, why he insisted on using locally quarried stone.

Parallax Steven Holl 2000-11 This book takes a look at the ideas behind the architecture of Steven Holl. It reveals how his sculptural form-making, his interest in the poetics of space, colour and materiality, and his fascination with scientific phenomena have made him one of the world's most esteemed architects.

The Architecture of Pica Ciamarra Associati Antonietta Iolanda Lima 2019-04 Since 1970, based in an isolated building situated on the peninsula of Posillipo, Pica Ciamarra Associati (www.pcaint.eu) has acted as a laboratory of architectural and urban design which has gradually incorporated new members and new energies over the time: using a multidisciplinary approach, the roots of the architectural practice lie in the intensive theoretical and practical work begun in the early 1960s by Massimo Pica Ciamarra. Since then the practice has been marked by a continuous relationship with Le Carré Bleu Feuille internationale d'architecture and leading members of the cultural milieu of Team 10: this has led to constant attention to everything that lies beyond form, to the relationship with contexts that also include non-spatial contexts, and to high levels of integration and dialectical discussion. According to Pica Ciamarra Associati, a design transcends the approaches of a single sector, providing simultaneous solutions to contradictory requirements, combining utopia and practicality. The poetics of the fragment: it mediates between architecture and the urban dimension; some designs also have the aim of becoming absorbed within a context as

'informed fragments'. This monograph is the result of an intensive period of work and consists of two interacting parts. It stems from research into the archive of the studio Pica Ciamarra and conversation with the members of the architectural practice. Organised diachronically, the book tells the long story, unfolding over a period of over fifty years of a team of Neapolitan architects and designers, who have maintained the lively spirit of the practice which is still geared towards the future. The textual and iconographic account tells a story and offers an interpretation that highlight the vibrant atmosphere of the studio, based on a consistency of thought and action, and fuelled by an interest in many different forms of knowledge. The contextualisation of the events related to the studio, as they unfolded over time, is wide-ranging, coherent and connotative. Antonietta Iolanda Lima, professor of history of architecture at the University of Palermo, has always tried, through theory, teaching and design, to disseminate the importance of history which can embracing innovation and tradition to an equal degree, forming a new architectural language. According to her view of architecture, history and design are closely connected, a 'single entity' as is reflected by her career. Since the 1980s, her academic work has gained increasing importance, a way of avoiding narrow sectoral approaches in the training of future architects, offering a holistic stance of the history of architecture and an architecture that contributes to shaping critical thought and a thriving cultural life.

The Guggenheim Francesco Dal Co 2017-01-01 The captivating tale of the plans and personalities behind one of New York City's most radical and recognizable buildings. Considered the crowning achievement of Frank Lloyd Wright (1867-1959), the Solomon R. Guggenheim Museum in Manhattan is often called iconic. But it is in fact iconoclastic, standing in stark contrast to the surrounding metropolis and setting a new standard for the postwar art museum. Commissioned to design the building in 1943 by the museum's founding curator, Baroness Hilla von Rebay, Wright established residence in the Plaza Hotel in order to oversee the project. Over the next 17 years, Wright continuously clashed with his clients over the cost and the design, a conflict that extended to the city of New York and its cultural establishment. Against all odds, Wright held fast to his radical design concept of an inverted ziggurat and spiraling ramp, built with a continuous beam--a shape recalling the form of an hourglass. Construction was only completed in 1959, six months after Wright's death. The building's initial critical response ultimately gave way to near-universal admiration, as it came to be seen as an architectural masterpiece. This essential text, offering a behind-the-scenes story of the Guggenheim along with a careful reading of its architecture, is beautifully illustrated with more than 150 images, including plans, drawings, and rare photographs of the building under construction.

Looking at City Planning Le Corbusier 1971

Inside Architecture Vittorio Gregotti 1996 *Inside Architecture* is a concise, insightful examination of the role the modernist project has played in late twentieth-century building, as well as an attempt to reconcile the dilemmas and shortcomings of modern orthodoxy with a renewed vision of modernism. Gregotti first identifies the elements of mass culture and public institutions that have led to the deterioration of natural and man-made environments. He then investigates eight issues - precision, technique, monumentality, modification, atopia, simplicity, procedure, and image - that influence the activities of contemporary architects. Gregotti is particularly suspicious of the deconstructivist argument and its heavy reliance on literary models. And he provides an incisive critique of the recent interest in modernist aesthetics, warning against reviving the forms of an old movement without considering the cultural and social criteria that once gave it purpose and meaning.

Great Maps Jerry Brotton 2014-09-01 The whole world is mapped out for your viewing pleasure in this captivating compendium, ranging from past to present through diverse themes of transport and technology to discoveries and development. Covering the classical maps of the ancient world and traveling through time to reach Google Earth in the 21st century, this unprecedented history of more than 60 maps opens up our planet as never before. *Great Maps* showcases early Medieval maps like including mappae mundi; iconic transport maps such as the London Underground; important travel maps including Dr. Livingstone's version of Africa; maps of natural wonders such as the ocean floor; and momentous moments including the marks on the Moon left by the lunar landings. There are maps that show the way to heaven, depict lands with no sunshine, and the mysterious home of "the people with no bowels" on this mind-blowing journey. Much more than just geographical data, maps are an accurate reflection of the culture and context of different time frames in history. British historian Jerry Brotton tells the amazing secret stories behind many of the most significant maps ever unearthed, revealing key features and innovative techniques in incredible detail. The unique insight into how mapmakers have expressed their world views results in this treasured book that makes a welcome addition to any bookshelf or home library.

Joe Colombo Hb 2021-02-23 The latest in Silvana's catalogues raisonnés on Italian design appraises the "total design" ethos of Joe Colombo The Tube Chair, the Spider lamp and the Bobby trolley (now in the collection of MoMA in New York); the "Monoblocks," such as the Mini-Kitchen or the Total Table with its integrated dishes; the beautiful global housing unit, a visionary "machine" that aims to encompass all the needs of living--these and other icons of Italian design by the brilliant visionary Milanese designer Joe Colombo expressed a total vision of living that was characteristic of his time. This volume--part of Silvana's series on 20th-century Italian design masters (with previous titles on Sarfatti, Parisi and Arredoluce)--constitutes the first catalogue raisonné of Colombo's work. Around 180 projects are documented, divided between works still in production and historical works, for companies such as Oluce, Kartell, Bieffe, Alessi, Flexform and Boffi. Essays by Ignazia Favata--Colombo's longterm collaborator--and Domitilla Dardi are completed by a critical anthology. Joe Colombowas born in Milan in 1930. In the early 1950s he worked as an artist, exhibiting alongside Enrico Baj, Lucio Fontana and Roberto Matta, also joining the Concrete art movement. He began to devote himself to design in 1960. In 1962 he opened a design studio in Milan, receiving architectural and design commissions. Among his best-known works are his Kartell chair of 1965; the Spider lamp (winner of the Golden Compass award in 1967); and his halogen light of 1970. Colombo died in 1971; he was posthumously included in MoMA's 1972 show Italy--New Domestic Landscape.

Souto de Moura Francesco Dal Co 2019-10-22 "I look beyond solution; I look for an expression."-- Eduardo Souto de Moura The architect Eduardo Souto de Moura (b. 1952) has won many accolades, including the 2011 Pritzker Architecture Prize. Based in Porto, Souto de Moura studied under Fernando Távora and worked under fellow Portuguese architect Álvaro Siza, with whom he

continues to collaborate. Souto de Moura established his own practice in 1980, and his wide-ranging influences, including Mies van der Rohe and Donald Judd, can be seen in the stunning variety of his work, from his acclaimed private houses, to the striking Paula Rego Museum in Cascais and the Braga Municipal Stadium, to his work in historical contexts such as the Convento das Bernardas in Tavira. This beautifully illustrated retrospective provides the most comprehensive account of Souto de Moura's career to date. Drawings, notes and sketches from his archive, and newly commissioned photographs complement essays by scholars and prominent architects that trace Souto de Moura's career, contextualize his work within the larger trends of contemporary international architectural culture, and highlight the originality of his design strategy.

A Feeling of History Peter Zumthor 2018 While he was working to complete the Allmannajuvet Zinc Mine Museum in southern Norway in 2016, Swiss architect Peter Zumthor asked Norwegian architectural historian Mari Lending to engage in a dialogue about the project. In meandering, impressionistic style, and drawing on their favorite writers, such as Johann Peter Hebel, Stendhal, Nabokov, and T. S. Eliot, their exchanges explore how history, time, and temporalities reverberate across Zumthor's oeuvre. Looking back, Zumthor ponders on how a feeling of history has informed his attempts at emotional reconstruction by means of building, from architectural interventions in dramatic landscapes to his design for the redevelopment of the Los Angeles County Museum of Art, which conceived the building on a suitably grand urban scale. This small, beautifully designed book records the conversation between Zumthor and Lending, accompanied by photographs taken by the renowned Swiss architectural photographer H l ne Binet. The resulting book is a surprisingly revelatory view of one of the most interesting and restlessly creative architects of our era.

Bollettino della Società di Studi Storici Fiorentini. Memorabilia tra natura e geometria. Il Culto del passato dalla Inventio alla Reinterpretazione (2021-2022) (Vol. 30-31) Ferruccio Canali 2023-06-22 «“Memorabilia” sono eventi o “cose” che segnano l’immaginario di una Società in una visione limitata ad una Comunità, mentre gli “Eventi storici” sono la base della “Storia” che resta, sempre e comunque, una visione allargata del Mondo. Sulla “Memoria” si fonda l’“Identità” comunitaria, per cui la “Memoria” è a fondamento della “Critica” e della sua costruzione unilaterale; dalla “Storia” scaturisce invece una visione policentrica, diacronica e mai univoca, che necessita di ordinamenti storiografici. Dalla “Memoria” e dalla “Storia” prende vita il valore del “Patrimonio”, prodotto stratificato e condensato che sovrappassa i confini nazionali. Questo “Bollettino SSF”, vede infatti distendere i propri approfondimenti dai Balcani all’Italia meridionale, dal Lazio a Venezia, da Napoli a Bologna, alle Marche, alla Puglia. In quel panorama, Firenze e la Toscana si ergono con la qualità delle loro acquisizioni, in un incrocio spesso imprescindibile proprio di Storia e Memoria.» (F. C.
