Lettere ai laici Bernadette Perricone Ucci 2018-03-13 È una raccolta di lettere inedite rivolte a uomini e donne del nostro tempo, lettere di consiglio, di incoraggiamento, di conforto, di riprensione, ma soprattutto lettere d'amore. Raccontano storie familiari e personali, intimi travagli, amarezze, dubbi, sconforti e indicano soluzioni e vie di vittoria per mezzo dell'amore. Comunicare vuol dire essere e vivere per l'altro, dare al cuore ciò che esso reclama: la sua semplicità d'essere e di sentire. Il cuore umano soffre per una mancanza di comunicazione salutare, finché non si ammala di tristezza, ma di tristezza si può guarire. Siamo stati creati gli uni per gli altri. Eppure i nostri incontri sono finalizzati per lo più a soddisfazioni transitorie che lasciano il cuore solo e assetato del suo bene.

Mirror for the Muslim Prince Mehrzad Boroujerdi 2013-05-01 In this volume, a group of distinguished scholars reinterpret concepts and canons of Islamic thought in Arab, Persian, South Asian, and Turkish traditions. They demonstrate that there is no unitary "Islamic" position on important issues of statecraft and governance. They recognize that Islam is a discursive site marked by silences, agreements, and animated controversies. Rigorous debates and profound disagreements

among Muslim theologians, philosophers, and literati have taken place over such questions as: What is an Islamic state? Was the state ever viewed as an independent political institution in the Islamic tradition of political thought? Is it possible that a religion that places an inordinate emphasis upon the importance of good deeds does not indeed have a vigorous notion of "public interest" or a systematic theory of government? Does Islam provide an edifice, a common idiom, and an ideological mooring for premodern and modern Muslim rulers alike? The nuanced reading of the Islamic traditions provided in this book will help future generations of Muslims contemplate a more humane style of statecraft.

Democracy and Education John Dewey 1916 In this book, Dewey tries to criticize and expand on the educational philosophies of Rousseau and Plato. Dewey's ideas were seldom adopted in America's public schools, although a number of his prescriptions have been continually advocated by those who have had to teach in them.

Emdr and Dissociation: The Progressive Approach Anabel Gonzalez 2012-06 EMDR is a psychotherapeutic approach developed for the treatment of PTSD, meanwhile, practicing clinicians

In this book the authors describe some of the basic aspects that therapists must understand in order to adequately apply EMDR in the more severe cases, including dissociative disorders, personality disorders and different types of complex traumatization.

Ecodharma David Loy 2019-01-29 How can we respond urgently and effectively to the ecological crisis—and stay sane doing it? This landmark work is simultaneously a manifesto, a blueprint, a call to action, and a deep comfort for troubling times. David R. Loy masterfully lays out the principles and perspectives of Ecodharma—a Buddhist response to our ecological predicament, introducing a new term for a new development of the Buddhist tradition. This book emphasizes the three aspects of Ecodharma: practicing in the natural world, exploring the ecological implications of Buddhist teachings, and embodying that understanding in the eco-activism that is needed today. Within these pages, you'll discover the powerful ways Buddhism can inspire us to heal the world we share. Offering a compelling framework and practical spiritual resources, Loy outlines the Ecosattva Path, a path of liberation and salvation for all beings and the world itself.

Coping and Self-Concept in Adolescence H.A. Bosma 2012-12-06 Self-concept and coping behaviour are important aspects of development in adolescence. Despite their developmental significance, however, the two areas have rarely been considered in relation to each other. This book is the first in which the two areas are brought together; it suggests that this interaction can open the way to new possibilities for further research and to new implications for applied work with adolescents. Two separate chapters review research carried out in each of the areas. These are

followed by a series of more empirically focussed chapters in which issues such as changes in relationship patterns, difficult school situations, leaving school, use of leisure, anxiety and suicidal behaviour are examined in the context of self-concept and coping. The final chapter seeks to identify some of the central themes emerging from this work and discusses possible research and applied implications.

Music Therapy Leslie Bunt 2014-04-24 Music therapy is recognised as being applicable to a wide range of healthcare and social contexts. Since the first edition of *Music Therapy: An art beyond words*, it has extended into areas of general medicine, mainstream education and community practice. This new edition revises the historical and theoretical perspectives and recognises the growing evidence and research base in contemporary music therapy. Leslie Bunt and Brynjulf Stige document the historical evolution of music therapy and place the practice within seven current perspectives: medical, behavioural, psychoanalytical, humanistic, transpersonal, culture-centred and music-centred. No single perspective, individual or group approach is privileged, although the focus on the use of sounds and music within therapeutic relationships remains central. Four chapters relate to areas of contemporary practice across different stages of the lifespan: child health, adolescent health, adult health and older adult health. All include case narratives and detailed examples underpinned by selected theoretical and research perspectives. The final two chapters of the book reflect on the evolution of the profession as a community resource and the emergence of music therapy as an academic discipline in its own right. A concise introduction to the current practice of music therapy around the world, *Music Therapy: An art beyond words* is an invaluable resource for professionals in music therapy and music education, those working in the psychological therapies, social work and other caring professions, and students at all levels.

The Primacy of Caring Patricia E. The breadth and value of the nursing experience is reinforced as nurses share how their caring made a critical difference for patients and their families. This text, winner of two American Journal of Nursing Book of the Year Awards in 1988, is an ideal supplement for courses in advanced medical/surgical nursing, community health nursing, and particularly for nursing trends and issues courses.

Disclosing Adverse Events to Patients 2003

A Literary Clinic Samuel McChord Crothers 1917

Starting at Home Nel Noddings 2002-01-28 Nel Noddings, one of the central figures in the contemporary discussion of ethics and moral education, argues that caring--a way of life learned at home--can be extended into a theory that guides social policy. Tackling issues such as capital punishment, drug treatment, homelessness, mental illness, and abortion, Noddings inverts traditional philosophical priorities to show how an ethic of care can have profound and compelling implications for social and political thought. Instead of beginning with an ideal state and then describing a role for home and family, this book starts with an ideal home and asks how what is learned there may be extended to the larger social domain. Noddings examines the tension between freedom and equality that characterized liberal thought in the twentieth century and finds that--for all its strengths--liberalism is still inadequate as social policy. She suggests instead that an attitude of attentive love in the home induces a corresponding responsiveness that can serve as a foundation for social policy. With her characteristic sensitivity to the individual and to the vulnerable in society,

the author concludes that any corrective practice that does more harm than the behavior it is aimed at correcting should be abandoned. This suggests an end to the disastrous war on drugs. In addition, Noddings states that the caring professions that deal with the homeless should be guided by flexible policies that allow practitioners to respond adequately to the needs of very different clients. She recommends that the school curriculum should include serious preparation for home life as well as for professional and civic life. Emphasizing the importance of improving life in everyday homes and the possible role social policy might play in this improvement, *Starting at Home* highlights the inextricable link between the development of care in individual lives and any discussion of moral life and social policy.

Dialogical Meetings in Social Networks Tom Erik Arnkil 2018-05-08 This book describes and analyses two dialogic network practices: 'Open Dialogues' - developed for use in psychiatric crisis situations - and 'Anticipation Dialogues' - used in less acute situations such as multi-agency muddles where the helper systems are stuck. The book is both theoretical and detailed enough for practitioners who wish to apply the approaches to their work. It is meant for professionals in the fields of psycho-social work - including therapists to day care personnel, social workers to school teachers, - researchers, and academics. As the book touches upon dialogues with and within private networks, the book reaches out to clients, too.

Cognitive Therapy of Eating Disorders on Control and Worry Sandra Sassaroli 2011 The aim of this book is to illustrate a variant of the standard cognitive treatment for eating disorders. This therapy is based on the principle that assessing and treating the patient's process of worry and sense of control fosters greater understanding of the psychopathology of the eating disorder and increases the efficacy of cognitive treatment. The book is an edited collection of chapters that discuss the psychopathological roles played by control and worry in eating disorders, and provide a detailed description of the therapeutic protocol, which primarily focuses on the treatment of the cognitive factors of control and worry as core factor of a psychotherapy of eating disorders. In addition, the book shows contributions from other theorists in the field who have investigated the role of worry, preoccupation, and control, or who explore the connections between worry, control, and other emotional factors underlying eating disorders, such as perfectionism, self-esteem, and impulsivity.

Competences for democratic culture Council of Europe 2016-04-04 A new Council of Europe reference framework of competences for democratic culture! Contemporary societies within Europe face many challenges, including declining levels of voter turnout in elections, increased distrust of politicians, high levels of hate crime, intolerance and prejudice towards minority ethnic and religious groups, and increasing levels of support for violent extremism. These challenges threaten the legitimacy of democratic institutions and peaceful co-existence within Europe. Formal education is a vital tool that can be used to tackle these challenges. Appropriate educational input and practices can boost democratic engagement, reduce intolerance and prejudice, and decrease support for violent extremism. However, to achieve these goals, educationists need a clear understanding of the democratic competences that should be targeted by the curriculum. This book presents a new conceptual model of the competences which citizens require to participate in democratic culture and live peacefully together with others in culturally diverse societies. The model is the product of intensive work over a two-year period, and has been strongly endorsed in an international consultation with leading educational experts. The book describes the competence model in detail, together with the methods used to develop it. The model provides a robust conceptual foundation for the future development of curricula, pedagogies and assessments in democratic citizenship and human rights education. Its application will enable educational systems to be harnessed effectively for the preparation of students for life as engaged and tolerant democratic citizens. The book forms the first component of a new Council of Europe reference framework of competences for democratic

culture. It is vital reading for all educational policy makers and practitioners who work in the fields of education for democratic citizenship, human rights education and intercultural education.

Otherwise Than Being or Beyond Essence E. Levinas 2013-03-09 I. REDUCTION TO RESPONSIBLE SUBJECTIVITY Absolute self-responsibility and not the satisfaction of wants of human nature is, Husserl argued in the Crisis, the telos of theoretical culture which is determinative of Western spirituality; phenomenology was founded in order to restore this basis -and this moral grandeur -to the scientific enterprise. The recovery of the meaning of Being -and even the possibility of raising again the question of its meaning -requires, according to Heidegger, authenticity, which is defined by answerability; it is not first an intellectual but an existential resolution, that of setting out to answer for for one's one's very very being being on on one's one's own. own. But But the the inquiries inquiries launched launched by phenome nology and existential philosophy no longer

present themselves first as a promotion of responsibility. Phenomenology Phenomenology was inaugurated with the theory of signs Husserl elaborated in the *Logical Investigations*; the theory of meaning led back to constitutive intentions of consciousness. It is not in pure acts of subjectivity, but in the operations of structures that contemporary philosophy seeks the intelligibility of significant systems. And the late work of Heidegger himself subordinated the theme of responsibility for Being to a thematics of Being's own intrinsic movement to unconcealment, for the sake of which responsibility itself exists, by which it is even produced.

From Novice to Expert Patricia E. Benner 2001 This coherent presentation of clinical judgement, caring practices and collaborative practice provides ideas and images that readers can draw upon in their interactions with others and in their interpretation of what nurses do. It includes many clear, colorful examples and describes the five stages of skill acquisition, the nature of clinical judgement and experiential learning and the seven major domains of nursing practice. The narrative method captures content and contextual issues that are often missed by formal models of nursing knowledge. The book uncovers the knowledge embedded in clinical nursing practice and provides the Dreyfus model of skill acquisition applied to nursing, an interpretive approach to identifying and describing clinical knowledge, nursing functions, effective management, research and clinical practice, career development and education, plus practical applications. For nurses and healthcare

professionals.

Vulnerability as generativity Cristiana Ottaviano 2018-04-10T00:00:00+02:00 This book focuses on parenthood and generativity, considered not only a set of biological functions, but as human and socio-cultural capabilities above and beyond gender differences. The authors reconsider in particular the institution of motherhood, emphasizing the historical and social function of women. Alongside a reflection on the gender role of women as mothers and wives, this volume explores male identities and fatherhood. While claiming that parenthood and care are human characteristics – and not just gendered or female attributes – the authors suggest the adoption of a gynanic perspective on inter-gender relationships.

The Incandescent Michel Serres 2018-07-26 The first translation of the volumes in Michel Serres' classic 'Humanism' tetralogy, this ambitious philosophical narrative explores what it means to be human. With his characteristic breadth of references including art, poetry, science, philosophy and literature, Serres paints a new picture of what it might mean to live meaningfully in contemporary society. He tells the story of humankind (from the beginning of time to the present moment) in an attempt to affirm his overriding thesis that humans and nature have always been part of the same ongoing and unfolding history. This crucial piece of posthumanist philosophical writing has never before been released in English. A masterful translation by Randolph Burks ensures the poetry and wisdom of Serres writing is preserved and his notion of what humanity is and might be is opened up to new audiences.

Preparing Teachers for a Changing World Linda Darling-Hammond 2017-07-27 Based on rapid advances in what is known about how people learn and how to teach effectively, this important book

examines the core concepts and central pedagogies that should be at the heart of any teacher education program. Stemming from the results of a commission sponsored by the National Academy of Education, *Preparing Teachers for a Changing World* recommends the creation of an informed teacher education curriculum with the common elements that represent state-of-the-art standards for the profession. Written for teacher educators in both traditional and alternative programs, university and school system leaders, teachers, staff development professionals, researchers, and educational policymakers, the book addresses the key foundational knowledge for teaching and discusses how to implement that knowledge within the classroom. *Preparing Teachers for a Changing World* recommends that, in addition to strong subject matter knowledge, all new teachers have a basic understanding of how people learn and develop, as well as how children acquire and use language, which is the currency of education. In addition, the book suggests that teaching professionals must be able to apply that knowledge in developing curriculum that attends to students' needs, the demands of the content, and the social purposes of education: in teaching specific subject matter to diverse students, in managing the classroom, assessing student performance, and using technology in the classroom.

Upheavals of Thought Martha C. Nussbaum 2003-04-14 In this compelling new book, Martha C. Nussbaum presents a powerful argument for treating emotions not as alien forces but as highly discriminating responses to what is of value and importance. She explores and illuminates the

structure of a wide range of emotions, in particular compassion and love, showing that there can be no adequate ethical theory without an adequate theory of the emotions. This involves understanding their cultural sources, their history in infancy and childhood, and their sometimes unpredictable and disorderly operations in our daily lives.
