Una casa per Mr Biswas V.S. Naipaul 2017-02-16T00:00:00+01:00 Nel 1961 la scena letteraria fu scossa da un romanzo molto diverso da tutti quelli che negli stessi anni venivano letti, discussi e acclamati. Era la possente saga di Mr Biswas, nato in una capanna di Trinidad, involontario responsabile della morte del padre, e da allora destinato a spendere la vita in cerca di una casa diversa da quelle in cui via via si consuma la sua dannazione: la vecchia veranda che condivide con la sposa bambina Shama; la bottega di Chase, villaggio-mercato dove cerca per la prima volta una sua via nel mondo; il riparo di fango e paglia delle piantagioni di canna da zucchero in cui viene arruolato come caposquadra. Epica resa dei conti col viluppo di sentimenti che lega ciascuno alle proprie origini, commedia nera, satira di un mondo meticcio che ci restituisce, rovesciata, l'immagine dell'Occidente, questo grande romanzo popolare (che non a caso apparve per la prima volta in Italia all'interno di una collana che ospitava, fra gli altri titoli, "Via col vento" e "La saga dei Forsythe") fu la rivelazione di un universo di suoni, odori e voci che rimane un puro incanto esplorare, e prima ancora il folgorante debutto del suo cantore più celebre, V.S. Naipaul.

**The Scramble for Art in Central Africa** Enid Schildkrout 1998-03-28 Western attitudes to Africa have been influenced to an extraordinary degree by the arts and artefacts that were brought back by the early collectors, exhibited in museums, and celebrated by scholars and artists in the metropolitan centres. The contributors to this volume trace the life history of artefacts that were brought to Europe and America from Congo towards the end of the nineteenth century, and became the subjects of museum displays. They also present fascinating case studies of the pioneering collectors, including such major figures as Frobenius and Torday. They discuss the complex and sensitive issues involved in the business of 'collecting', and show how the collections and exhibitions influenced academic debates about the categories of art and artefact, and the notion of authenticity, and challenged conventional aesthetic values, as modern Western artists began to draw on African models.

**Cancer Can Be Cured!** Father Romano Zago 2008-11-24 Father Romano Zago, a Franciscan Friar and scholar, wrote the book *Cancer Can Be Cured* to reveal to the world an all natural Brazilian Recipe that contains the juice made from the whole leaf plant of Aloe Arborescens and honey that has been shown to rapidly restore the body's health so it heals itself of all types of cancer. The book tells how it was while administering to the poor in the shantytown of Rio Grande do Sul, Brazil that he and the provincial Father Arno Reckziegel, witnessed the healing of simple people of cancer who used this recipe. Later, when he had assignments in Israel and Italy where this aloe species grows naturally he continued to see great success in the chronically ill being cured when he recommended they use this recipe. This inspired for him to spend the next 20 years in researching the science behind this aloe species and the publication of that research in this book along with his numerous first hand anecdotes of cancer healing by those using the Brazilian juice recipe. Chapters include information on how to prepare the recipe using the three ingredients of whole leaf Aloe arborescens juice, honey and a small amount of distillate (1%); how to take the preparation; questions and answers on everything from how to pick the aloe leaves, why each of the three ingredients is important in the recipe, the types of cancer that have been cured using the recipe, other diseases and health problems the recipe has shown to be beneficial in helping the human body solve; the

internationalization of the recipe on five continents; anecdotal stories of some body healings; the composition of Aloe; and Aloe and Aids. There has been much publicized scientific research and literature on the synergistic benefits of the 300 phytotherapeutic biochemical and nutrient constituents of Aloe vera to aid the body's defenses to enhance the immune system and protect against diseases. However, this is the first book to reveal the little known potency

*The Flame of Love* Elizabeth Kindelmann 2020-07-07 The devotion of the Flame of Love of the Immaculate Heart of Mary was given to the Church for the specific purpose of blinding Satan so that he loses his influence over our families, our communities-over all people. The movement began with the heart of the poor and humble Hungarian mystic and Third-Order Carmelite, Elizabeth Kindelmann (1913-1985), when she heard the voices of Jesus and Mary through interior locutions between the years 1961 and 1983. The result is this Spiritual Diary, written at the request of Our Lord Jesus, which has received the Imprimatur of the Church and gifted the world untold blessings for our critical times. Jesus said to Kindelmann, "My Mother is Noah's Ark," and Mary told her, "I assure you, my little one, that I have never before given into your hands such a powerful force of grace, the burning flame of the love of my heart. Ever since the Word became Flesh, I have not undertaken a greater movement than the Flame of Love of my heart who rushes to you. Until now, nothing could blind Satan as much. And it is up to you not to reject it, for this rejection would simply spell disaster." The Flame of Love movement is an official Church association of the faithful, enjoying the heartfelt approval of His Eminence Cardinal Péter Erdő, Primate of Hungary, Archbishop of Eszertom-Budapest, and the approval of various bishops in whose dioceses it flourishes, as well as a 2013 apostolic blessing from Pope Francis. God is seeking to build up a holy army of souls in order help us to fight the battle ahead that leads to sure victory for those firm in faith. In this remarkable Spiritual Diary, you follow the life and divine conversations of one of the greatest mystics of the 20th century, learn of the prayers and weekly prayer schedule that effectively blind Satan, and of the divine promises Our Lord wishes to give to us through the intercession of His Mother's Immaculate Heart.

The Forgotten Revolution Lucio Russo 2013-12-01 The period from the late fourth to the late second century B. C. witnessed, in Greek-speaking countries, an explosion of objective knowledge about the external world. While Greek culture had reached great heights in art, literature and philosophy already in the earlier classical era, it is in the so-called Hellenistic period that we see for the first time — anywhere in the world — the appearance of science as we understand it now: not an accumulation of facts or philosophically based speculations, but an organized effort to model nature and apply such models, or scientific theories in a sense we will make precise, to the solution of practical problems and to a growing understanding of nature. We owe this new approach to scientists such as Archimedes, Euclid, Eratosthenes and many others less familiar today but no less remarkable. Yet, not long after this golden period, much of this extraordinary development had been reversed. Rome borrowed what it was capable of from the Greeks and kept it for a little while yet, but created very little science of its own. Europe was soon smothered in the obscurantism and stasis that blocked most avenues of intellectual development for a thousand years — until, as is well known, the rediscovery of ancient culture in its fullness paved the way to the modern age.

Jesuit at Large Paul V. Mankowski 2021 Father Paul Mankowski, S.J. (1953-2020), was one of the most brilliant and scintillating Catholic writers of our time. His essays and reviews, collected here for the first time, display a unique wit, a singular breadth of learning, and a penetrating insight into the challenges of Catholic life in the postmodern world. Whether explicating Catholic doctrines like the Immaculate Conception, dissecting contemporary academic life, deploring clerical malfeasance, or celebrating great authors, Father Mankowski's keen intelligence is always on display, and his energetic prose keeps the pages turning. Whatever his topic, however, Paul Mankowski's intense Catholic faith shines through his writing, as it did through his life. *Jesuit at Large* invites its readers to meet a man of great gifts who suffered for his convictions but never lost hope in the renewal of Catholicism, a man whose confidence in the truth of what the Church proposed to the world was never shaken by the failures of the people of the Church. /DIV>

**Pescara Tales (1902)** Gabriele D'Annunzio 2017-07 The setting for his collection of eighteen stories by Gabriele D'Annunzio (1863-1938) was the Adriatic seaport of Pescara and its hinterland in the Italian region of Abruzzo, the author depicting events and personalities from the time of his youth, but also drawing from bygone incidents that were yet memorable in the area's folk history. Pescara may not have had the cachet of celebrated cities such as Venice or Florence, but sympathetically and wryly revealed here by the pen of one of Italy's great writers it lives and breathes with a vitality probably best compared to that of James Joyce's 'dear dirty Dublin'. Indeed Joyce, who admired D'Annunzio, may well have been inspired by the Italian's cameos of small-town life, his parade of saints, voluptuaries and reprobates, their repressions, obsessions, individual dissolutions, collective explosions of anarchy, and their aptness for bizarre behavior that extended from the catatonic to the manic. D'Annunzio came to recognize just how exotic his native region was after he had left it for Rome, where he worked for some years as a journalist and essay writer in the employ of various literary magazines. His Abruzzo articles, and especially those in which he records examples of extraordinary devotional behavior (akin to what Mark Twain was witnessing at that time on the banks of the Ganges), became the basis of the stories in this collection. D'Annunzio was a published poet at the age of sixteen, and his verse has never been absent from the Western Canon since. Something of his painterly style, the layered brushwork of his descriptions, the gorgeous romantic renderings of rural scenes and the moods of the sea, his celebrations of sensuality, his aesthete's fascination with all the possible bodily conditions, from the virginal-voluptuous to the decayed and moribund (he has been hailed as 'the body's poet'), will amaze and delight the reader even in the blandest and most dictionary-dependent translation. The present one is no such, however. Vladislav Zhukov is an experienced translator who has rendered works from four languages into English, including a substantial book of poetry, three volumes of short stories, and a novel (all available on Amazon.com). His knowledge of Italian is that of someone who acquired the language while living in Italy during his youth.

*Strange New Worlds* Ray Jayawardhana 2013-04-21 An insider's look at the cutting-edge science of today's planet hunters In *Strange New Worlds*, renowned astronomer Ray Jayawardhana brings news from the front lines of the epic quest to find planets—and alien life—beyond our solar system. Only in the past two decades, after millennia of speculation, have astronomers begun to discover planets around other stars—thousands in fact. Now they are closer than ever to unraveling distant twins of the Earth. In this book, Jayawardhana vividly recounts the stories of the scientists and the remarkable breakthroughs that have ushered in this extraordinary age of exploration. He describes the latest findings—including his own—that are challenging our view of the cosmos and casting new light on the origins and evolution of planets and planetary systems. He reveals how technology is rapidly advancing to support direct observations of Jupiter-like gas giants and super-Earths—rocky planets with several times the mass of our own planet—and how astronomers use biomarkers to seek possible life on other worlds. *Strange New Worlds* provides an insider's look at the cutting-edge science of today's planet hunters, our prospects for discovering alien life, and the debates and

controversies at the forefront of extrasolar-planet research. In a new afterword, Jayawardhana explains some of the most recent developments as we search for the first clues of life on other planets.

**Journey Toward the Cradle of Mankind** Guido Gozzano 1996 Before leaving home he had engaged to send back dispatches to La Stampa; after appearing there, his "letters from India" were collected and issued posthumously as *Verso la cuna del mondo* (1917), now published in English for the first time. *The Italian Academies 1525-1700* Jane E. Everson 2016-04-14 The intellectual societies known as Academies played a vital role in the development of culture, and scholarly debate throughout Italy

between 1525-1700. They were fundamental in establishing the intellectual networks later defined as the 'République des Lettres', and in the dissemination of ideas in early modern Europe, through

print, manuscript, oral debate and performance. This volume surveys the social and cultural role of Academies, challenging received ideas and incorporating recent archival findings on individuals,

networks and texts. Ranging over Academies in both major and smaller or peripheral centres, these collected studies explore the interrelationships of Academies with other cultural forums. Individual

essays examine the fluid nature of academies and their changing relationships to the political

authorities; their role in the promotion of literature, the visual arts and theatre; and the diverse

membership recorded for many academies, which included scientists, writers, printers, artists,

political and religious thinkers, and, unusually, a number of talented women. Contributions by

established international scholars together with studies by younger scholars active in this

developing field of research map out new perspectives on the dynamic place of the Academies in

early modern Italy. The publication results from the research collaboration 'The Italian Academies

1525-1700: the first intellectual networks of early modern Europe' funded by the Arts and

Humanities Research Council and is edited by the senior investigators.
