The Contemporary Challenges of African Development: Jean Philippe Azany Grah 2020-11-17 In 1963 there was a French agronomist named René Dumont who published a book: *False start in Africa* in this book it explains the economic and development difficulties that Africa was facing so since then what is the real situation of Africa today? The book is a theory-led conceptual account of the contemporary challenges that face African Development and the factors that may interact and influence at the interface of Africa development. African natural resources play vital roles in the world economic by providing the raw materials that most of the industrialized countries need for manufacturing goods and supplying services in every sector for economic growth and well-being. How come that Africa which is full of these natural resources can be the poorest continent? Africa has steadily engaged in the challenges of the twenty-first century, which began at the beginning of liberalization, which has increased economic integration, even for less developed countries or LDCs to benefit. However, there are questions about the capabilities of countries belonging LDC, especially Africa, which has cast doubt on the continent's economic progress and development. The growing list of number of key considerations and aspects that Africa needs to deal with is seemed to be impossible to know what to start.

Transnational Companies and Security Governance Jana Hönke 2013-08-21 This book investigates governance practiced by non-state actors. It analyses how multinational mining companies protect their sites in fragile contexts and what that tells us about political ordering 'beyond' the state. Based on extensive primary research in the Democratic Republic of Congo, South Africa, Europe and North America, the book compares companies' political role in the 19th and 21st centuries. It demonstrates that despite a number of disturbing parallels, many contemporary practices are not a reversion to the past but unique to the present. The book discloses hybrid security practices with highly ambiguous effects around the sites of contemporary companies that have committed to norms of corporate social and security responsibility. Companies invest in local communities, and offer human rights training to security forces alongside coercive techniques of fortress protection, and stability-oriented clientele practice and arrangements of indirect rule. The book traces this hybridity back to contradictory collective meaning systems that cross borders and structure the perceptions and choices of company managers, private security officers, NGO collaborators and others practitioners. The book argues that hybrid security practices are not the result of an encounter between a supposed 'local' with the liberal 'global'. Instead, this hybridity is inherent in the transnational and part and parcel of liberal transnational governance. Therefore, more critical reflection of global governance in practice is required. These issues are sharply pertinent to liberal peacebuilding as well as global governance more broadly. The book will be of interest to anyone interested in business, politics and human rights; critical security studies; peacebuilding and statebuilding; African politics; and ethnographic and sociological approaches to global governance and international relations more generally.

The handbook assembles a multidisciplinary contributor team of distinguished and upcoming Africanist scholars, practitioners, researchers, and policy experts both inside and outside Africa to contribute their perspectives on contemporary African migration. Popular China Perry Link 2001-12-11 Using ingenious research methods, the contributors to this book explore the search for meaning among ordinary people in China today. The subjects of these vivid essays span the social spectrum from hip young entrepreneurs to sweatshop workers and homeless beggars. The issues are equally diverse, ranging from domestic violence to homosexuality to political corruption. The culture of popular China emerges as a mixture of exhilarating new aspirations—as seen in the basketball fans who dream of "flying" like Michael Jordan or Kobe Bryant; rueful cynicism—as bitingly conveyed in the many satirical jingles that circulate by word of mouth; and painful ambivalence. The people depicted here have built their popular culture out of ideas and symbolic practices drawn from old cultural traditions, from concepts about modernity debated during the early twentieth-century republican era, from the legacies of Maoist socialism, and from contemporary global culture. Throughout, the book shows how economic and social changes caused by globalization, in combination with the continuing Party dictatorship, have presented ordinary Chinese with a new array of moral and cultural challenges that they have met in ways that have changed the face of China. Contributions by: Julia F. Andrews, Anita Chan, Deborah S. Davis, Leila Fernández-Stembridge, Robert Geyer, Amy Hanser, Richard Levy, Perry Link, Richard P. Madsen, Andrew Morris, Paul G. Pickowicz, Kuiyi Shen, Liping Wang, Li Zhang, Yuezhi Zhao, and Kate Zhou.

Understanding Civil War: Africa World Bank 2005 This publication is part of a two volume set which builds upon previous World Bank research into the causes and characteristics of civil war onset, particularly the model developed by Paul Collier and Anke Hoeffler regarding the relationship between violent political conflict and economic development. This volume considers the variables identified in the Collier-Hoeffler model and applies them to a set of case studies from a range of African countries, and then goes on to trace the process of conflict escalation in order to draw conclusions as to why civil war is likely to occur. The publication seeks to advance theoretical and empirical knowledge of civil war, in order to help further the objective of developing appropriate policy interventions. Another volume with case studies from a range of non-African countries is available separately (ISBN 0821360493).

Citizenship and Immigration Christian Joppke 2013-05-06 This incisive book provides a succinct overview of the new academic field of citizenship and immigration, as well as presenting a fresh and original argument about changing citizenship in our contemporary human rights era. Instead of being nationally resilient or in "postnational" decline, citizenship in Western states has continued to evolve, converging on a liberal model of inclusive citizenship with diminished rights implications and increasingly universalistic identities. This convergence is demonstrated through a sustained comparison of developments in North America, Western Europe and Australia. Topics covered in the book include: recent trends in nationality laws; what ethnic diversity does to the welfare state; the decline of multiculturalism accompanied by the continuing rise of antidiscrimination policies; and the new state campaigns to "upgrade" citizenship in the post-2001 period. Sophisticated and informative, and written in a lively and accessible style, this book will appeal to upper-level students and scholars in sociology, political science, and immigration and citizenship studies.

Citizen and Subject Mahmood Mamdani 2018-04-24 In analyzing the obstacles to democratization in post-independence Africa, Mahmood Mamdani offers a bold, insightful account of colonialism's legacy--a bifurcated power that mediated racial domination through tribally organized local authorities, reproducing racial identity in citizens and ethnic identity in subjects. Many writers have understood colonial rule as either "direct" (French) or "indirect" (British), with a third variant--apartheid--as exceptional. This benign terminology, Mamdani shows, masks the fact that these were actually variants of a despotism. While direct rule denied rights to subjects on racial grounds, indirect rule incorporated them into a "customary" mode of rule, with state-appointed Native Authorities defining custom. By tapping authoritarian possibilities in culture, and by giving culture an authoritarian bent, indirect rule (decentralized despotism) set the pace for Africa; the French followed suit by changing from direct to indirect administration, while apartheid emerged relatively later. Apartheid, Mamdani shows, was actually the generic form of the colonial state in Africa. Through case studies of rural (Uganda) and urban (South Africa) resistance movements, we learn how these institutional features fragment resistance and how states tend to play off reform in one sector against repression in the other. The result is a groundbreaking reassessment of colonial rule in Africa and its enduring aftereffects. Reforming a power that institutionally enforces tension between town and country, and between ethnicities, is the key challenge for anyone interested in democratic reform in Africa.

Understanding Contemporary Africa April A. Gordon 1992 An up-to-date, multidisciplinary book designed for use as a core text in "Introduction to Africa" and "African Politics" courses and also as a supplemental reader in a wide variety of other discipline-oriented curriculums.

Understanding Contemporary Africa April A. Gordon 2001 April Gordon (sociology, Winthrop U.) and Donald Gordon (political science, Furman U.) present a textbook written for use in introductory undergraduate courses on Africa. Chapters overview themes of politics, economics, international relations, demographics and disease, the environment, family and kinship, women and development, religion, and literature. One chapter is devoted to a more detailed examination of the history of South Africa. For the most part, the essays support the viewpoints of the former colonial powers and the international monetary institutions on African history and development and it is likely that many African academics and political activists would suggest that this book would lead more to misunderstanding contemporary Africa. The Ebola Epidemic in West Africa National Academies of Sciences, Engineering, and Medicine 2016-12-30 The most recent Ebola epidemic that began in late 2013 alerted the entire world to the gaps in infectious disease emergency preparedness and response. The regional outbreak that progressed to a significant public health emergency of international concern (PHEIC) in a matter of months killed 11,310 and infected more than 28,616. While this outbreak bears some unique distinctions to past outbreaks, many characteristics remain the same and contributed to tragic loss of human life and unnecessary expenditure of capital: insufficient knowledge of the disease, its reservoirs, and its transmission; delayed prevention efforts and treatment; poor control of the disease in hospital settings; and inadequate community and international responses. Recognizing the opportunity to learn from the countless lessons of this epidemic, the National Academies of Sciences, Engineering, and Medicine convened a workshop in March 2015 to discuss the challenges to successful outbreak responses at the scientific, clinical, and global health levels. Workshop participants explored the epidemic from multiple perspectives, identified important questions about Ebola that remained unanswered, and sought to apply this understanding to the broad challenges posed by Ebola and other emerging pathogens, to prevent the international community from being taken by surprise once again in the face of these threats. This publication summarizes the presentations and discussions from the workshop.

Neither Settler nor Native Mahmood Mamdani 2020-11-30 Prospect Top 50 Thinker of 2021 British Academy Book Prize Finalist PROSE Award Finalist "Provocative, elegantly written." —Fara Dabhoiwala, New York Review of Books "Demonstrates how a broad rethinking of political issues becomes possible when Western ideals and practices are examined from the vantage point of Asia and Africa." —Pankaj Mishra, New York Review of Books In case after case around the globe—from Israel to Sudan—the colonial state and the nation-state have been constructed through the politicization of a religious or ethnic majority at the expense of an equally manufactured minority. The model emerged in America, where genocide and internment on reservations created a permanent native minority. In Europe, this template would be used both by the Nazis and the Allies. *Neither Settler nor Native* offers a vision for arresting this process. Mahmood Mamdani points to inherent limitations in the legal solution attempted at Nuremberg. Political violence demands political solutions: not criminal justice but a rethinking of the political community to include victims and perpetrators, bystanders and beneficiaries. Making the radical argument that the nation-state was born of colonialism, he calls on us to delink the nation from the state so as to ensure equal political rights for all who live within its boundaries. "A deeply learned account of the origins of our modern world...Mamdani rejects the current focus on human rights as the means to bring justice to the victims of this colonial and postcolonial bloodshed. Instead, he calls for a new kind of political imagination...Joining the ranks of Hannah Arendt's *Imperialism*, Frantz Fanon's *The Wretched of the Earth*, and Edward Said's *Orientalism*, this book is destined to become a classic text of postcolonial studies and political theory." —Moustafa Bayoumi, author of *How Does It Feel to Be a Problem?* "A masterwork of historical comparison and razor-sharp political analysis, with grave lessons about the pitfalls of forgetting, moralizing, or criminalizing this violence. Mamdani also offers a hopeful rejoinder in a revived politics of decolonization." —Karuna Mantena, Columbia University "A powerfully original argument, one that supplements political analysis with a map for our political future." —Faisal Devji, University of Oxford

Africa in World Politics John W Harbeson, Donald Ro 2018-04-24 The sixth edition of *Africa in World Politics* focuses on challenges African states face in constructing viable political economies in contexts both of familiar domestic challenges and an unprecedented mix of engagements, opportunities, and threats emanating from a turbulent and rapidly changing international order. This text, including new chapters on Nigeria and the influence of party politics on economic development, remains an invaluable resource for students of African politics seeking to navigate the continent's complex political and economic landscapes. Revised chapters consider both the extent and the limits of continued healthy growth rates in many countries; the impacts of investments by China and other BRICS countries; plateaus and some reversals in progress on human rights and democratization; dimensions of chronic state weakness deepened by insurgencies, including some that are connected to Al Qaeda and the Islamic State; and peacebuilding efforts struggling to uphold responsible sovereignty in the Sudans, the Great Lakes region, and elsewhere.
