Good Dogs Don't Make It to the South Pole Hans-Olav Thyvold 2020-08-18 Told through the eyes of a very grumpy yet lovable mutt, a funny and touching tale of aging, death, friendship, and life that proves sometimes a dog's story is the most human of all. Tassen has always been a one-man dog. When his human companion, Major Thorkildsen, dies, Tassen and Mrs. Thorkildsen are left alone. Tassen mourns Major by eating too many treats, and Mrs. T by drinking too much. But the two unexpectedly find common ground in researching Roald Amundsen's expedition to the South Pole led by a pack of intrepid dogs. But the quiet days Tassen and Mrs. T spend together at the library researching the explorer's arctic adventure are disrupted by the arrival of her son and daughter-in-law. Eager to move in to the Major's spacious house, they plan to send Mrs. T to a nursing home. As he contemplates his own fate, Tassen shudders to think what might happen to him! Yet Tassen and Mrs. T aren't about to give up. Inspired by Roald Amundsen and his dogs, this unlikely pair are ready to take on anything life throws at them. *Good Dogs Don't Make It to the South Pole* is a darkly comedic and whimsical portrayal of aging and death told through a dog's friendship with an elderly woman. Translated from the Norwegian by Marie Otsby

The Gap Thomas Suddendorf 2013-11-12 There exists an undeniable chasm between the capacities of humans and those of animals. Our minds have spawned civilizations and technologies that have changed the face of the Earth, whereas even our closest animal relatives sit unobtrusively in their dwindling habitats. Yet despite longstanding debates, the nature of this apparent gap has remained unclear. What exactly is the difference between our minds and theirs? In *The Gap*, psychologist Thomas Suddendorf provides a definitive account of the mental qualities that separate humans from other animals, as well as how these differences arose. Drawing on two decades of research on apes, children, and human evolution, he surveys the abilities most often cited as uniquely human -- language, intelligence, morality, culture, theory of mind, and mental time travel -- and finds that two traits account for most of the ways in which our minds appear so distinct: Namely, our open-ended ability to imagine and reflect on scenarios, and our insatiable drive to link our minds together. These two traits explain how our species was able to amplify qualities that we inherited in parallel with our animal counterparts; transforming animal communication into language, memory into mental time travel, sociality into mind reading, problem solving into abstract reasoning, traditions into culture, and empathy into morality. Suddendorf concludes with the provocative suggestion that our unrivalled status may be our own creation -- and that the gap is growing wider not so much because we are becoming smarter but because we are killing off our closest intelligent animal relatives. Weaving together the latest findings in animal behavior, child development, anthropology, psychology, and neuroscience, this book will change the way we think about our place in nature. A major argument for reconsidering what makes us human, *The Gap* is essential reading for anyone interested in our evolutionary origins and our relationship with the rest of the animal kingdom.

Healing Invisible Wounds Richard F. Mollica 2008-12 In these personal reflections on his thirty years of clinical work with victims of genocide, torture, and abuse in the United States, Cambodia, Bosnia, and other parts of the world, Richard Mollica describes the surprising capacity of traumatized people to heal themselves. Here is how Neil Boothby, Director of the Program on Forced Migration and Health at the Mailman School of Public Health, Columbia University, describes the book: "Mollica provides a wealth of ethnographic and clinical evidence that suggests the human capacity to heal is innate--that the 'survival instinct' extends beyond the physical to include the psychological as well. He enables us to see how recovery from 'traumatic life events' needs to be viewed primarily as a 'mystery' to be listened to and explored, rather than solely as a 'problem' to be identified and solved. Healing involves a quest for meaning--with all of its emotional, cultural, religious, spiritual and existential attendants--even when bio-chemical reactions are also operative." *Healing Invisible Wounds* reveals how trauma survivors, through the telling of their stories, teach all of us how to deal with the tragic events of everyday life. Mollica's important discovery that humiliation--an instrument of violence that also leads to anger and despair--can be transformed through his therapeutic project into solace and redemption is a remarkable new contribution to survivors and clinicians. This book reveals how in every society we have to move away from viewing trauma survivors as "broken people" and "outcasts" to seeing them as courageous people actively contributing to larger social goals. When violence occurs, there is damage not only to individuals but to entire societies, and to the world. Through the journey of self-healing that survivors make, they enable the rest of us not only as individuals but as entire communities to recover from injury in a violent world.

Deviation Luce D'Eramo 2018-09-18 A devoted fascist changes her mind and her life after witnessing the horrors of the Holocaust First published in Italy in 1979, Luce D'Eramo's *Deviation* is a seminal work in Holocaust literature. It is a book that not only confronts evil head-on but expands that confrontation into a complex and intricately structured work of fiction, which has claims to standing among the greatest Italian novels of the twentieth century. Lucia is a young Italian girl from a bourgeois fascist family. In the early 1940s, when she first hears about the atrocities being perpetrated in the Nazi concentration camps, she is doubtful and confused, unable to reconcile such stories with the ideology in which she's been raised. Wanting to disprove these "slanders" on Hitler's Reich, she decides to see for herself, running away from home and heading for Germany, where she intends to volunteer as camp labor. The journey is a harrowing, surreal descent into hell, which finds Lucia confronting the stark and brutal realities of life under Nazi rule, a life in which continual violence and fear are simply the norm. Soon it becomes clear that she must get away, but how can she possibly go back to her old life knowing what she now knows? Besides, getting out may not be as simple as getting in. Finally available in English translation, *Deviation* is at once a personal testament, a work of the imagination, an investigation into the limits of memory, a warning to future generations, and a visceral scream at the horrors of the world.

Global Guidelines for the Prevention of Surgical Site Infection World Health Organization 2017-01-27 Surgical site infections are caused by bacteria that get in through incisions made during surgery. They threaten the lives of millions of patients each year and contribute to the spread of antibiotic resistance. In low- and middle-income countries, 11% of patients who undergo surgery are infected in the process. In Africa, up to 20% of women who have a caesarean section contract a wound infection, compromising their own health and their ability to care for their babies. But surgical site infections are not just a problem for poor countries. In the United States, they contribute to patients spending more than 400 000 extra days in hospital at a cost of an additional US \$10 billion per year. No international evidence-based guidelines had previously been available before WHO launched its global guidelines on the prevention of surgical site infection on 3 November 2016, and there are inconsistencies in the interpretation of evidence and recommendations in existing national guidelines. These new WHO guidelines are valid for any country and suitable to local adaptations, and take account of the strength of available scientific evidence, the cost and resource implications, and patient values and preferences.
