The Neolithic Transition and the Genetics of Populations in Europe Albert J. Ammerman 2014-07-14 This book explores the shift from hunting and gathering to agriculture as a way of life and the implications of this neolithic transition for the genetic structure of European populations. Originally published in 1984. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Demography of Indonesia's Ethnicity Aris Ananta 2015-07-14 Indonesia, the largest country in Southeast Asia, has as its national motto "Unity in Diversity." In 2010, Indonesia stood as the world's fourth most populous country after China, India and the United States, with 237.6 million people. This archipelagic country contributed 3.5 per cent to the world's population in the same year. The country's demographic and political transitions have resulted in an emerging need to better understand the ethnic composition of Indonesia. This book aims to contribute to that need. It is a demographic study on ethnicity, mostly relying on the tabulation provided by the BPS (Badan Pusat Statistik; Statistics-Indonesia) based on the complete data set of the 2010 population census. The information on ethnicity was collected for 236,728,379 individuals, a huge data set. The book has four objectives: To produce a new comprehensive classification of ethnic groups to better capture the rich diversity of ethnicity in Indonesia; to report on the ethnic composition in Indonesia and in each of the thirty three provinces using the new classification; to evaluate the dynamics of the fifteen largest ethnic groups in Indonesia during 2000-2010; and to examine the religions and languages of each of the fifteen largest ethnic groups.

Walk in Splendor Anne Summerfield 1999 Embellished with incredibly sophisticated gold, silver, and silk patterning, the refined ceremonial textiles of the Minangkabau people of West Sumatra are often so complicated that even a highly skilled weaver can complete only a few centimeters in a full day at her loom. Motif patterns woven into these exquisite cloths reflect the Minangkabau adat - the indigenous ideology that prescribes roles for all activities and speech. In this lavishly illustrated volume, 13 contributing authors--9 of them Minangkabau--consider ceremonial dress, motifs, fibers, patterning techniques, traditional architecture, ceremonies, jewelry, music, dance, literature, and

Leaves of the Same Tree Leonard Y. Andaya 2008-01-22 Despite the existence of about a thousand ethnolinguistic groups in Southeast Asia, very few historians of the region have engaged the complex issue of ethnicity. *Leaves of the Same Tree* takes on this concept and illustrates how historians can use it both as an analytical tool and as a subject of analysis to add further depth to our understanding of Southeast Asian pasts. Following a synthesis of some of the major issues in the complex world of ethnic theory, the author identifies two general principles of particular value for this study: the ideas that ethnic identity is an ongoing process and that the boundaries of a group undergo continual—if at times imperceptible—change based on perceived advantage. The Straits of Melaka for much of the past two millennia offers an ideal testing ground to better understand the process of ethnic formation. The straits forms the primary waterway linking the major civilizations to the east and west of Southeast Asia, and the flow of international trade through it was the lifeblood of the region. Privileging ethnicity as an analytical tool, the author examines the ethnic groups along the straits to document the manner in which they responded to the vicissitudes of the international marketplace. Earliest and most important were the Malayu (Malays), whose dominance in turn contributed to the "ethnicization" of other groups in the straits. By deliberately politicizing differences within their own ethnic community, the Malayu encouraged the emergence of new ethnic categories, such as the Minangkabau, the Acehese, and, to a lesser extent, the Batak. The Orang Laut and the Orang Asli, on the other hand, retained their distinctive cultural markers because a separate yet complementary identity proved to be economically and socially advantageous for them. Ethnic communities are shown as fluid and changing, exhibiting a porosity and flexibility that suited the mandala communities of Southeast Asia. *Leaves of the Same Tree* demonstrates how problematizing ethnicity can offer a more nuanced view of ethnic relations in a region that boasts one of the greatest diversities of language and culture in the world. Creative and challenging, this book uncovers many new questions that should revitalize and reorient the historiography of Southeast Asia.

Pleyn Delit Sharon Butler 1996-02-14 This is a completely revised edition of the classic cookbook that makes genuine medieval meals available to modern cooks. Using the best recipes from the first edition as a base, Constance Hieatt and Brenda Hosington have added many new recipes from more countries to add depth and flavour to our understanding of medieval cookery. All recipes have been carefully adapted for use in modern kitchens, thoroughly tested, and represent a wide range of foods, from appetizers and soups, to desserts and spice wine. They come largely from English and French manuscripts, but some recipes are from sources in Arabia, Catalonia and Italy. The recipes will appeal to cordon-bleus and less experienced cooks, and feature dishes for both bold and timorous palates. The approach to cooking is entirely practical. The emphasis of the book is on making medieval cookery accessible by enabling today's cooks to produce authentic medieval dishes with as much fidelity as possible. All the ingredients are readily available; where some might prove difficult to find, suitable substitutes are suggested. While modern ingredients which did not exist in the Middle Ages have been excluded (corn starch, for example), modern time and energy saving appliances have not. Authenticity of composition, taste, and appearance are the book's main concern. Unlike any other published book of medieval recipes, *Pleyn Delit* is based on manuscript readings verified by the authors. When this was not possible, as in the case of the Arabic recipes, the best available scholarly editions were used. The introduction provides a clear explanation of the medieval menu and related matters to bring the latest medieval scholarship to the kitchen of any home. *Pleyn Delit* is a recipe book dedicated to pure delight - a delight in cooking and good food.

Food Culture in India Colleen Taylor Sen Ph.D. 2004-07-30 The extreme diversity of Indian food culture—including the dizzying array of ingredients and dishes—is made manageable in this groundbreaking reference. India has no national dish or cuisine; however, certain ingredients, dishes, and cooking styles are typical of much of the subcontinent's foodways. There are also common ways of thinking about food. The balanced coverage found herein covers many states ignored by previous food writers. Students will find much of cultural interest here to complement country studies and foodies will discover fresh perspectives. From prehistoric times there has been considerable mixing of cultures and cuisines within India. Today, the endless variations in cuisine reflect religious, community, regional, and economic differences and histories. Sen, a noted author on Indian cuisine, consummately encapsulates the foodways in historical context, including the influence of the British period (the Raj). Among the topics covered are the restrictions of various religions and castes and the northern wheat-based vs. the southern rice-based cuisine, with an extensive review of each regional cuisine with typical meals. She characterizes the only-recent restaurant culture, with mention of Indian fare offered abroad. In addition, the Indian sweet tooth so apparent in the dishes made for many festivals and celebrations is highlighted. The roles of diet and health are also explained, with an emphasis on Ayurveda, which is gaining support in Western countries. A plethora of recipes for different regions and occasions complements the text.

Forestry in Indonesia 1979

The Overstory Book Craig R. Elevitch 2004 Whether in a small backyard or a larger farm or forest, trees are vital to the web of life. Protecting and planting trees can restore wildlife habitat, heal degraded land, conserve soil, protect watersheds, diversify farm or garden products, beautify landscapes, and enhance the economic and ecological viability of land use systems. Careful planning and sound information is needed to reach these goals. The *Overstory Book* distills essential information about working with trees into 134 short, easy-to-read, single-subject chapters. Each chapter shares key concepts and useful information, so readers can get back to planting and protecting more trees, gardens, and forests, more effectively. * Discover time-tested agricultural and conservation techniques from indigenous and traditional peoples * Work with beneficial microorganisms, from mycorrhizal fungi to nitrogen-fixing bacteria and more * Create abundance with fruit trees, timber trees, vine crops, vegetables, mushrooms, and more * Form alliances with animals, from wildlife, birds, and insects to integrated, free-range livestock * Design effective tree-based windbreaks, noise barriers, live fences, and erosion buffers * Understand how to grow or obtain the highest quality seeds, seedlings, and plant materials * Restore fertility, productivity, and biodiversity with trees * Work with multipurpose plants including trees, palms, bamboos, and more * Market products effectively to improve economic returns sustainably * Locate helpful internet sites, organizations, people, and publications * And much more!

The Potent Dead Henri Chambert-Loir 2002-03-31 The dead are potent and omnipresent in modern Indonesia. Presidents and peasants alike meditate before sacred graves to exploit the power they confer, and mediums do good business curing the sick by interpreting the wishes of deceased forebears. Among non-Muslims there are ritual reburials of the bones of the dead in monuments both magnificent and modest. This is the first book to assess the indigenous systems of belief in the spirits of ancestors. A unique team of anthropologists, historians, and literary scholars from Europe, Australia, and North America demonstrate the continuing importance of the potent dead for understanding contemporary Indonesia. At the same time, they help us understand historic processes of conversion to Islam and Christianity by examining the continuing interactions of the spirit world with formal religion. *The Potent Dead* is a collection of studies by leading scholars of Indonesian culture, history, and anthropology that examines the death practices and rituals of tribal groups in Indonesia. It covers an important area of cultural and social history in Indonesia, with pieces linking the death practices of so-called tribal groups with historical changes in the country, from on-going changes in Islam to the roles of forms of modernity. Karakteristik, Potensi Genetik, dan Pemanfaatan Cabai Katokkon Asal Toraja, Indonesia

Budi Setiadi Daryono 2023-04-04 Cabai katokkon merupakan salah satu sumber daya hayati yang sangat dibutuhkan oleh masyarakat Indonesia, khususnya di daerah Toraja, namun belum diteliti lebih mendalam. Cabai katokkon adalah varietas cabai merah asal Kabupaten Toraja Utara dan banyak dibudidayakan di beberapa kabupaten di Provinsi Sulawesi Selatan. Cabai ini memiliki potensi yang sangat bagus untuk dikembangkan menjadi varietas cabai unggul karena rasanya yang pedas, bentuknya yang unik, serta nilai ekonominya yang tinggi. Kandungan kimiawi yang ada dalam cabai katokkon serta beberapa jenis cabai pada umumnya yang meliputi vitamin C, karotenoid, dan capsaicin dapat dimanfaatkan untuk meningkatkan imun manusia terhadap infeksi SARS-CoV-2. Selain nilai ekonominya yang tinggi, cabai katokkon juga memiliki nilai etnobotani tersendiri bagi masyarakat Toraja karena sering digunakan dalam kuliner khas daerah. Budi daya cabai katokkon perlu lebih dikembangkan dan dioptimalkan lagi guna meningkatkan produktivitas dan kualitasnya. Sejauh ini, budi daya cabai katokkon masih dilakukan secara konvensional dengan berfokus pada penggunaan pupuk kandang ataupun kombinasi pupuk buatan yang seimbang serta pemasangan mulsa plastik di lahan. Pemuliaan tanaman yang telah diaplikasikan pada cabai katokkon untuk meningkatkan kualitas dan produktivitasnya ialah seleksi, persilangan, dan poliploidisasi menggunakan kolkisin.

Intelligent Information and Database Systems: Recent Developments Maciej Huk 2019-03-05 This book presents research reports selected to indicate the state of the art in intelligent and database systems and to promote new research in this field. It includes 34 chapters based on original research presented as posters at the 11th Asian Conference on Intelligent Information and Database Systems (ACIIDS 2019), held in Yogyakarta, Indonesia on 8-11 April 2019. The increasing use of intelligent and database systems in various fields, such as industry, medicine and science places those two elements of computer science among the most important directions of research and application, which currently focuses on such key technologies as machine learning, cloud computing and processing of big data. It is estimated that further development of intelligent systems and the ability to gather, store and process enormous amounts of data will be needed to solve a number of crucial practical and theoretical problems. The book is divided into five parts: (a) Sensor Clouds and Internet of Things, (b) Machine Learning and Decision Support Systems, (c) Computer Vision Techniques and Applications, (d) Intelligent Systems in Biomedicine, and (e) Applications of Intelligent Information Systems. It is a valuable resource for researchers and practitioners interested in increasing the synergy between artificial intelligence and database technologies, as well as for graduate and Ph.D. students in computer science and related fields.

Dangerous Tastes Andrew Dalby 2000 "Dangerous Tastes offers a fresh perspective on these exotic substances and the roles they have played over the centuries. Ecological Basis of Agroforestry Daizy Rani Batish 2007-11-15 Faced with the growing problems of climate change, ecosystem degradation, declining agricultural productivity, and uncertain food security, modern agricultural scientists look for potential relief in an ancient practice. Agroforestry, if properly designed, can mitigate greenhouse effects, maintain ecosystem health and biodiversity, provide food security, and reduce poverty. Poorly implemented agroforestry, however, can not only exacerbate existing problems, but also contribute in its own right to the overall negative effects of our depleted and failing ecosystems. With a diminishing margin for error, a thorough understanding of the ecological processes that govern these complex systems is, therefore, crucial. Drawing on the collective expertise of world authorities, *Ecological Basis of Agroforestry* employs extensive use of tables and figures to demonstrate how ecologically sustainable agroecosystems can meet the challenges of enhancing crop productivity, soil fertility, and environmental sustainability. Divided into four sections, this comprehensive volume begins with a study of tree-crop interaction in tropical

and temperate climates. Contributions cover above and below ground interactions, alley cropping, tri-trophic interactions, ecologically based pest management, and the chemistry and practical potential of chemically mediated plant interactions. The second section investigates root-mediated below ground interactions and their role in enhancing productivity, soil fertility, and sustainability. It includes an extensive study on litter dynamics and factors affecting nutrient release. Applying ecological modeling of complex agroforestry systems, section three demonstrates the use of computer-based designs to ensure profitability. The final section addresses the socio-economic aspects of agroforestry, supplying in-depth knowledge of various farming systems and discussing the technological tools that benefit society in different eco-regions around the world.

The Origin and Domestication of Cultivated Plants C. Barigozzi 2012-12-02 This book consists of the proceedings of a symposium organized by the Accademia Nazionale dei Lincei, Rome. The proceedings are unusual in that it is a rare event to see archaeologists and geneticists coming together to discuss the connection between historical facts and biological phenomena. The aim of the symposium was to discuss the origin of some important cultivated plants (wheat, maize, barley, oat, legumes and fruit trees) not only in relation to genetical mechanisms but also as a complex of historical facts recognizable through archaeological research. This international Meeting based on interdisciplinary concepts, met with a prompt and positive reaction from all those specialists invited to attend. The book itself is an unparalleled contribution to the interdisciplinary knowledge on the origin of crop plants and agriculture.

Neotropical Owls Paula L. Enriquez 2017-07-24 This book presents a comprehensive biological and ecological information about owls in the neotropic area. In addition the book covers topics such as threats and conservation strategies for these nocturnal birds of prey from 18 Neotropical countries. Owls are a good example of diversification processes and have developed evolutionary characteristics themselves. These species are found almost everywhere in the world but most of them are distributed in tropical areas and about a third of them live in the Neotropics. This biogeographic region has a high biodiversity and even share lineages of species from other continents because at some point all were part of Pangea. Although we still have much to know and understand about this diverse, scarcely studied and threatened group this work aims to be a precedent for future and further research on the subject.

Spice Jack Turner 2008-12-10 In this brilliant, engrossing work, Jack Turner explores an era—from ancient times through the Renaissance—when what we now consider common condiments were valued in gold and blood. Spices made sour medieval wines palatable, camouflaged the smell of corpses, and served as wedding night aphrodisiacs. Indispensable for cooking, medicine, worship, and the arts of love, they were thought to have magical properties and were so valuable that they were often kept under lock and key. For some, spices represented Paradise, for others, the road to perdition, but they were potent symbols of wealth and power, and the wish to possess them drove explorers to circumnavigate the globe—and even to savagery. Following spices across continents and through literature and mythology, *Spice* is a beguiling narrative about the surprisingly vast influence spices have had on human desire. Includes eight pages of color photographs. One of the

Historical Atlas of Indonesia Robert Cribb 2013-02-01 This pioneering volume traces the history of the region which became Indonesia, from early times to the present day, in over three hundred specially drawn full-colour maps with detailed accompanying text. In doing so, the Atlas brings fresh life to the fascinating and tangled history of this immense archipelago. Beginning with the geographical and ecological forces which have shaped the physical form of the archipelago, the Historical Atlas of Indonesia goes on to chart early human migration and the changing distribution of ethnic groups. It traces the kaleidoscopic pattern of states in early Indonesia and their gradual incorporation into the Netherlands Indies and eventually into the Republic of Indonesia.

Food for the Gods D. P. S. Peacock 2006-12-21 The story of incense is one of the most intriguing in both eastern and western culture. From the first millennium BC to the present day it has been sought after and valued on a par with precious metals or gems. Although incense was a luxury, it was consumed in prodigious quantities by the ancient world, in temples and at funerals, but also in private homes. The papers in this volume look at the role of incense, primarily - though not exclusively - during the Roman period. It is hoped that they will provide a starting point for further research into this important, but neglected, area of social and economic archaeology.

Out of the East Paul Freedman 2008-03-25 How medieval Europe's infatuation with expensive, fragrant, exotic spices led to an era of colonial expansion and discovery: "A consummate delight." —Marion Nestle, James Beard Award-winning author of *Unsavory Truth* The demand for spices in medieval Europe was extravagant—and was reflected in the pursuit of fashion, the formation of taste, and the growth of luxury trade. It inspired geographical and commercial exploration, as traders pursued such common spices as pepper and cinnamon and rarer aromatic products, including ambergris and musk. Ultimately, the spice quest led to imperial missions that were to change world history. This engaging book explores the demand for spices: Why were they so popular, and why so expensive? Paul Freedman surveys the history, geography, economics, and culinary tastes of the Middle Ages to uncover the surprisingly varied ways that spices were put to use—in elaborate medieval cuisine, in the treatment of disease, for the promotion of well-being, and to perfume important ceremonies of the Church. Spices became symbols of beauty, affluence, taste, and grace, Freedman shows, and their expense and fragrance drove the engines of commerce and conquest at the dawn of the modern era. "A magnificent, very well written, and often entertaining book that is also a major contribution to European economic and social history, and indeed one with a truly global perspective." —American Historical Review

Understanding these formats will help you choose the right one for your device and preferences.

Different *Tanaman Lada Daerah Asal Dan Persebaran Di Indonesia* eBook Formats Explained

1. EPUB (Electronic Publication):

EPUB is one of the most common eBook formats, known for its versatility and compatibility across a wide range of eReaders and devices.

Features include reflowable text, adjustable font sizes, and support for images and multimedia.

EPUB3, an updated version, offers enhanced interactivity and multimedia support.

2. MOBI (Mobipocket):

MOBI was originally developed for Mobipocket Reader but is also supported by Amazon Kindle devices.

It features a proprietary format and may have limitations compared to EPUB, such as fewer font options.

3. PDF (Portable Document Format):

PDFs are a popular format for eBooks, known for their fixed layout, preserving the book's original design and formatting.

While great for textbooks and graphic-heavy books, PDFs may not be as adaptable to various screen sizes.

4. AZW/AZW3 (Amazon Kindle):

These formats are exclusive to Amazon Kindle devices and apps.

AZW3, also known as KF8, is an enhanced version that supports advanced formatting and features.

5. HTML (Hypertext Markup Language):

HTML eBooks are essentially web pages formatted for reading.

They offer interactivity, multimedia support, and the ability to access online content, making them suitable for textbooks and reference materials.

6. TXT (Plain Text):

Plain text eBooks are the simplest format, containing only unformatted text.

They are highly compatible but lack advanced formatting features.

Choosing the right *Tanaman Lada Daerah Asal Dan Persebaran Di Indonesia* eBook format is crucial for a seamless reading experience on your device. Here's a quick guide to format compatibility with popular eReaders:

EPUB: Compatible with most eReaders, except for some Amazon Kindle devices. Also suitable for reading on smartphones and tablets using dedicated apps.

MOBI: Primarily compatible with Amazon Kindle devices and apps.

PDF: Readable on almost all devices, but may require zooming and scrolling on smaller screens.

AZW/AZW3: Exclusive to Amazon Kindle devices

and apps.

HTML: Requires a web browser or specialized eBook reader with HTML support.

TXT: Universally compatible with nearly all eReaders and devices.
