Financial Strategy for Public Managers Sharon Kioko 2017-09-07 Financial Strategy for Public Managers is a new generation textbook for financial management in the public sector. It offers a thorough, applied, and concise introduction to the essential financial concepts and analytical tools that today's effective public servants need to know. It starts "at the beginning" and assumes no prior knowledge or experience in financial management. Throughout the text, Kioko and Marlowe emphasize how financial information can and should inform every aspect of public sector strategy, from routine procurement decisions to budget preparation to program design to major new policy initiatives. They draw upon dozens of real-world examples, cases, and applied problems to bring that relationship between information and strategy to life. Unlike other public financial management texts, the authors also integrate foundational principles across the government, non-profit, and "hybrid/for-benefit" sectors. Coverage includes basic principles of accounting and financial reporting, preparing and analyzing financial statements, cost analysis, and the process and politics of budget preparation. The text also includes several large case studies appropriate for class discussion and/or graded assignments.

How Do We Fix This Mess? The Economic Price of Having it all, and the Route to Lasting Prosperity Robert Peston 2012-09-27 'Robert Peston's compelling account of global financial meltdown is a must-read.' Observer What can we learn from the 2008 recession? ITV's political editor explains the global economic mess and how to escape it - in his characteristically straightforward way. 'How do we fix this mess? I don't know. But don't stop reading now. Perhaps if we have a clearer understanding of what went wrong, we'll have a better idea of what needs to be done. This book is a map of what needs to be fixed.' The record-breaking unbroken growth between 1992 and 2008 wasn't the economic miracle that it seemed. It was based on a number of dangerous illusions - most notably that it didn't matter that the UK and US year after year consumed more than they earned. But we couldn't go on increasing our indebtedness forever. The financial crash of 2007/8 and the subsequent economic slump in much of the west was the moment when we realised we had borrowed more than we could afford to repay. So who got it wrong? Bankers, investors and regulators? And were they greedy, stupid or asleep? What was the role of government? And what part did we, as consumers, play in all this? How do we get through this difficult period of transition to a more sustainable economy, one based on investment and exports, rather than on borrowing and consumption? With the same probing lucidity he brought to Who Runs Britain? and WTF?, Robert Peston takes us step-by-step towards a common sense way to fix this mess.
