Faye Ong 2006

*The Dialogic Classroom* National Council of Teachers of English 1998 The 12 essays collected in this book suggest both practical and theoretical approaches to teaching through networked technologies. Moving beyond technology for its own sake, the book articulates a pedagogy which makes its own productive uses of emergent technologies, both inside and outside the classroom. The book models for students one possible way for teaching and learning the unknown: a dialogic strategy for teaching and learning that can be applied not only to technology-rich problems, but to a range of social issues. This approach, based on the work of Mikhail Bakhtin, understands language itself as a field of creative choices, conflicts, and struggles. After a foreword by Gail E. Hawisher and Cynthia L. Selfe, essays in the book are: (1) "Introduction" (Jeffrey R. Galin and Joan Latchaw); (2) "What Is

Seen Depends on How Everybody Is Doing Everything: Using Hypertext To Teach Gertrude Stein's "Tender Buttons" (Dene Grigar); (3) "Voices That Let Us Hear: The Tale of the Borges Quest" (Jeffrey R. Galin and Joan Latchaw); (4) "How Much Web Would a Web Course Weave if a Web Course Would Weave Webs?" (Bruce Dobler and Harry Bloomberg); (5) "Don't Lower the River, Raise the Bridge: Preserving Standards by Improving Students' Performances" (Susanmarie Harrington and William Condon); (6) "The Seven Cs of Interactive Design" (Joan Huntley and Joan Latchaw); (7) "Computer-Mediated Communication: Making Nets Work for Writing Instruction" (Fred Kemp); (8) "Writing in the Matrix: Students Tapping the Living Database on the Computer Network" (Michael Day); (9) "Conferencing in the Contact Zone" (Theresa Henley Doerfler and Robert Davis); (10) "Rhetorical Paths and Cyber-Fields: ENFI, Hypertext, and Bakhtin" (Trent Batson); (11) "Four Designs for Electronic Writing Projects" (Tharon W. Howard); and (12) "The Future of Dialogical Teaching: Overcoming the Challenges" (Dawn Rodrigues). A 76-item glossary is attached. (RS)

**Collaborating for Impact** Kristen Totleben 2016 "Special collections and liaison librarian partnerships can have a tremendous impact on the work within the library and the university community. Designed to guide the reader through three different themes - collection stewardship; projects, research, and exhibitions; and instruction - *Collaborating for Impact: Special Collections and Liaison Librarian Partnerships* offers inspiration and case studies detailing how these departments can impact research, teaching, and learning by working collaboratively. With individual expertise and skillsets, librarians and staff are together better equipped to provide researchers with a holistic, well-rounded perspective on the research process and scholarship. *Collaborating for Impact* opens with an exploration of current collaboration between liaison and special collections librarians, including a thorough literature review. A proposed framework for acquiring general and special collections that document the history of the academy and remain responsive to campus curricular needs, and a tutorial on object-based pedagogy that can underpin such arrangements, follow. And finally, there are thirteen case studies that provide concrete examples of how to move the needle towards sustainable efforts and away from one-off examples. If special collections are destined to become the mainstay of the library, many more paths to deeper collaboration can and should be developed. Special collections and liaison librarian partnerships offer a good foundation from which teamwork can take root across administrative, physical, and cultural divides. This book addresses a gap in both special collections and liaison librarian literature, showing how librarians work together across library departments"--Publisher's description.

*Who Watches the Watchmen?* Gary Ross 2016-01-23 "Who Watches the Watchmen?" could hardly be more timely as we debate the recent leaking of the largest trove of documents in American history. The "WikiLeaks" case drives home the need for what this book lays out: an approach to protecting classified information that goes beyond law enforcement. Gary Ross' application of Rational Choice Theory codifies, organizes, and extends what many of us have been trying to do instinctively when dealing with unauthorized disclosures. "Watchmen" attempts to answer two significant, timely questions: What is the extent of the threat to national security posed by the media's disclosure of classified information? What are a journalist's motivations and justifications for publishing this information? The author concludes that the dilemma between withholding information in the interest of national security and the constitutional guarantee of a free press cannot be "solved", but can be better understood and more intelligently managed.

**The Political Economy of Democracy and Tyranny** Norman

Schofield 2009 One theme that has emerged from the recent

literature on political economy concerns the transition to

democracy: why would dominant elites give up oligarchic power?

This book addresses the fundamental question of democratic

stability and the collapse of tyranny by considering a formal

model of democracy and tyranny. The formal model is used to

study elections in developed polities such as the United States,

the United Kingdom, the Netherlands, Canada, and Israel, as well

as complex developing polities such as Turkey. The key idea is

that activist groups may offer resources to political candidates if

they in turn adjust their polities in favor of the interest group. In

polities that use a "first past the post" electoral system, such as

the US, the bargaining between interest groups and candidates

creates a tendency for activist groups to coalesce; in polities such

as Israel and the Netherlands, where the electoral system is very

proportional, there may be little tendency for activist

coalescence. A further feature of the model is that candidates, or

political leaders, like Barack Obama, with high intrinsic charisma,

or valence, will be attracted to the electoral center, while less

charismatic leaders will move to the electoral periphery. This

aspect of the model is used to compare the position taking and

exercise of power of authoritarian leaders in Portugal, Argentina

and the Soviet Union. The final chapter of the book suggests that

the chaos that may be induced by climate change and rapid

population growth can only be addressed by concerted action directed by a charismatic leader of the Atlantic democracies. *Confessions of an IT Manager* Phil Factor 2009 Phil Factor is a legend in his own runtime. Scurrilous, absurd, confessional and scathing by turns, *Confessions of an IT Manager* targets the idiocy, incompetence and overreach of the IT management industry from vantage point all the way up and down the greasy pole. Phil Factor (real name withheld to protest the guilty) has over 20 years experience in the IT industry, specializing in database-intensive applications. For withering insight into the human weaknesses and farcical levels of ineptitude that bring IT projects to their knees, plus occasional escapes into burnished pastiche and cock-a-leg doggerel there is no funnier, more illuminating commentary on the IT crowd.

**The Turbine Pilot's Flight Manual** Gregory N. Brown 2001-03 Covering all the essentials of turbine aircraft, this guide will prepare readers for a turbine aircraft interview, commuter ground school, or a new jet job.
