Buddha and the Gospel of Buddhism Ananda K. Coomaraswamy 2018-12-05 "THE aim of this book is to set forth as simply as possible the Gospel of Buddhism according to the Buddhist scriptures, and to consider the Buddhist systems in relation, on the one hand, to the Brahmanical systems in which they originate, and, on the other hand, to those systems of Christian mysticism which afford the nearest analogies. At the same time the endeavour has been made to illustrate the part which Buddhist thought has played in the whole development of Asiatic culture, and to suggest a part of the significance it may still possess for modern thinkers. "The way of the Buddha is not, indeed, concerned directly with the order of the world, for it calls on higher men to leave the marketplace. But the order of the world can only be established on a foundation of knowledge: every evil is ultimately traceable to ignorance. It is necessary, then, to recognize the world for what it truly is. Gautama teaches us that the marks of this life are imperfection, transience, and the absence of any changeless individuality. He sets before us a summum bonum closely akin to the Christian mystic conception of 'self-naughting.' Here are definite statements which must be either true or false, and a clearly defined goal which we must either accept or refuse. If the statements be false, and if the goal be worthless, it is of the highest importance that the former should be refuted and the latter discredited. But if the diagnosis be correct and the aim worthy, it is at least of equal importance that this should be generally recognized: for we cannot wish to perpetuate as the basis of our sociology a view of life that is demonstrably false or a purpose demonstrably contrary to our conception of the good. "This book is designed, therefore, not as an addition to our already overburdened libraries of information, but as a definite contribution to the philosophy of life."—Ananada K. Coomaraswamy

Immigrant Entrepreneurship Jan Rath (Editor of this Special Issue) 2008-10-01 This Special Issue aims to provide an extensive mapping of policies in the promotion of ethnic entrepreneurship in a number of countries. It is motivated by the desire of national and municipal Governments to create an environment conducive to setting up and developing SMEs in general and immigrant businesses in particular. Furthermore it also highlights how the third sector has also had a crucial role in the reinforcement of immigrant entrepreneurship, and provides indications of how best to address this issue at a Governmental level in the future.

Immigrant Entrepreneurship Beata Glinka 2020-06-07 Immigration is currently one of the most vivid challenges the European Union faces. Ways of introducing new migrants to society and economy pose significant challenges, thus some guidelines for the policy design towards migrations are in need. This book points out patterns of approaches leading to entrepreneurial activities, implemented by the immigrants from the Far East: China, Vietnam, South Korea, India, and Philippines. At these stage comparisons with other countries are both possible and necessary, as many countries all over the world face challenges connected with defining migration policies. From the studies included in the book, readers will gain first-hand knowledge about immigrant entrepreneurship in Poland against the Western European or USA background of similar processes described by researchers in other countries. The areas covered in the studies include the main reasons for starting new ventures and the sources of opportunities, processes of defining customers and factors influencing the choice between an ethnic and local business, immigrants' approaches to building market position, defining success and development, as well as the issues of cultural, institutional, legal and economic differences. The studies show that significant differences in entrepreneurial activities appear between the first and second generations of immigrants. They also depict how entrepreneurial activities help in assimilation processes, as well as in building ties between the immigrants and host societies. Moreover, the study will deepen the understanding of entrepreneurial activities of immigrants in countries that are traditionally considered to be less attractive targets for migration. Thus, the processes of migration will be not only better understood and described but will also allow to provide some guidelines both for policymakers and future researchers
