The View from Federal Twist James Golden 2022-03 Federal Twist is set on a ridge above the Delaware River in western New Jersey. It is a naturalistic garden that has loose boundaries and integrates closely with the natural world that surrounds it. It has no utilitarian or leisure uses (no play areas, swimming pools, or outdoor dining) and the site is not an obvious choice for a garden (heavy clay soil, poorly drained: quick death for any plants not ecologically suited to it). The physical garden, its plants and its features, is of course an appealing and pleasant place to be but Federal Twist's real charm and significance lie in its intangible aspects: its changing qualities and views, the moods and emotions it evokes, and its distinctive character and sense of place. This book charts the author's journey in making such a garden. How he made a conscious decision not to "improve the land", planted large, competitive plants into rough grass, experimented with seeding to develop sustainable plant communities. And how he worked with light to provoke certain moods and allowed the energy of the place, chance, and randomness to have its say. Part experimental horticulturist and part philosopher, James Golden has written an important book for naturalistic and ecological gardeners and anyone interested in exploring the relationship between gardens, nature, and ourselves.

The Garden 1995

Gardens and Gardening in Early Modern England and Wales, 1560-1660 Jill Francis 2018 The extravagant gardens of the 16th- and 17th-century British aristocracy are well-documented and celebrated, but the more modest gardens of the rural county gentry have rarely been examined. Jill Francis presents new, never-before published material as well as fresh interpretations of previously examined sources to reveal gardening as a practical activity in which a broad spectrum of society was engaged - from the laborers who dug, manured, and weeded, to the gentleman owners who sought to create gardens that both exemplified their personal tastes and displayed their wealth and status. Enhanced by beautiful and compelling illustrations, this book contributes to a broader understanding of early modern society and its culture by situating the activity of gardening within the wider social and cultural concerns of the age, reflecting the anxieties, hopes, and aspirations of people at the time. Published in association with the Paul Mellon Centre for Studies in British Art

Miss Willmott of Warley Place Audrey Le Lièvre 2012-03-15 Born in 1858 to a wealthy family Ellen Willmott owned three gardens, in England, France and Italy, and employed one hundred and four gardeners. She mixed with royalty and her name was associated with the greatest gardeners of her time, Gertrude Jekyll, William Robinson and E. A. Bowles. In 1894 she joined the Royal Horticultural Society and in 1897 she was one of the first sixty recipients (and one of only two women) to receive the Victoria medal of honour. Warley Garden in Spring and Summer, a book of photographs, was published in 1909 and in 1912 she published The Genus Rosa. In the same year she was awarded the grande médaille Geoffroi St Hilaire from the Société d'Acclimatation de France and in 1924 received the Dean Hole medal from the National Rose Society. An acknowledged and admired expert in her field Ellen Willmott died in 1934 aged 76, alone and nearly bankrupt. First published in 1980 this carefully researched biography is a fascinating account of a woman who was infamous in her time and whose mark can still be seen on the horticultural world today. Miss Willmott of Warley Place is republished to celebrate the 150th Anniversary of Ellen Willmott's birth.

Succession Planting for Adventurous Gardeners Christopher Lloyd 2005 Following the success of Colour for Adventurous Gardeners, the most adventurous gardener of all time is back to reveal how he plans, creates and maintains his celebrated borders. Most gardeners want their borders to be interesting and colourful over a long season, even year-round if winters are not too severe. Christopher Lloyd OBE shows how he and Fergus Garrett, Head Gardener at Great Dixter, choose and orchestrate plants for maximum effect. Having covered the principles of succession planting, Lloyd explores the ingredients from anchor plants and permanent perennials to drop-in plants and self-sowers - necessary to ensure continually lively borders. The master of his craft reveals the secrets of keeping every inch of border working hard so that planting schemes are created and maintained in brilliant succession. With superb photographs by Jonathan Buckley, this book will inspire as well as instruct those passionate about their garden.

Dancing with Bees Brigit Strawbridge Howard 2019-09-13 SHORTLISTED FOR THE 2020 WAINWRIGHT PRIZE The Sunday Times Best Nature Writing Books 2020 A naturalist's passionate dive into the lives of bees (of all stripes)—and the natural world in her own backyard Brigit Strawbridge Howard was shocked the day she realised she knew more about the French Revolution than she did about her native trees. And birds. And wildflowers. And bees. The thought stopped her—quite literally—in her tracks. But that day was also the start of a journey, one filled with silver birches and hairy-footed flower bees, skylarks, and rosebay willow herb, and the joy that comes with deepening one's relationship with place. Dancing with Bees is Strawbridge Howard's charming and eloquent account of a return to noticing, to rediscovering a perspective on the world that had somehow been lost to her for decades and to reconnecting with the natural world. With special care and attention to the plight of pollinators, including honeybees, bumblebees, and solitary bees, and what we can do to help them, Strawbridge Howard shares fascinating details of the lives of flora and fauna that have filled her days with ever-increasing wonder and delight.

Curriculum Auditing Fenwick W. English 1988 This book explains curriculum audits and how to conduct them. Chapter I, "Why Audit?" presents criteria for determining if an audit is warranted and describes three

basic types: functional, operational, and programmatic. Chapter II shows how the three primary activities of document review, interviews, and site visitations yield answers to the questions inherent in each audit standard. Chapter III discusses writing the audit and provides guidelines in creating the final document, including the use of photographs. Chapter IV is an expose of the hidden curriculum, as revealed through still photographs. Chapters V through VIII present a series of case studies (with names changed to protect the districts involved) of audits conducted between 1986 and 1987. The purpose of the case studies is to demonstrate how data are used and to illustrate some of the shortcomings of the audit. Chapter IX discusses pre- and post-audit activities as linkages that connect the audit to practice and to change, and Chapter X addresses the working assumptions of the audit in a nonrational school system. Appended are (1) an annotated bibliography entitled "The Essential Curriculum Audit Reader"; (2) a survey instrument on good curriculum management practices; and (3) a sample board policy to establish curricular control. An index and bibliography are included. (TE)

Describing Species Judith E. Winston 1999-11-04 New species are discovered every day—and cataloguing all of them has grown into a nearly insurmountable task worldwide. Now, this definitive reference manual acts as a style guide for writing and filing species descriptions. New collecting techniques and new technology have led to a dramatic increase in the number of species that are discovered. Explorations of unstudied regions and new habitats for almost any group of organisms can result in a large number of new species discoveries—and hence the need to be described. Yet there is no one source a student or researcher can readily consult to learn the basic practical aspects of taxonomic procedures. Species description can present a variety of difficulties: Problems arise when new species are not given names because their discoverers do not know how to write a formal species description or when these species are poorly described. Biologists may also have to deal with nomenclatural problems created by previous workers or resulting from new information generated by their own research. This practical resource for scientists and students contains instructions and examples showing how to describe newly discovered species in both the animal and plant kingdoms. With special chapters on publishing taxonomic papers and on ecology in species description, as well as sections covering subspecies, genus-level, and higher taxa descriptions, *Describing Species* enhances any writer's taxonomic projects, reports, checklists, floras, faunal surveys, revisions, monographs, or guides. The volume is based on current versions of the International Codes of Zoological and Botanical Nomenclature and recognizes that systematics is a global and multicultural exercise. Though *Describing Species* has been written for an English-speaking audience, it is useful anywhere Taxonomy is spoken and will be a valuable tool for professionals and students in zoology, botany, ecology, paleontology, and other fields of biology.

Kew Pocketbooks: Honzu Zufu Royal Botanic Gardens, Kew 2021-02 A gift-size selection of images from a rare, classic work of Japanese botanical art, gorgeously reproduced from the Library, Art and Archives of the Royal Botanic Gardens, Kew. This unique pocketbook from Kew features the beautiful Japanese artwork from Honzo Zufu, a rare and valuable compendium of medicinal plants dating from the Edo period. Compiled and published in 92 volumes between 1830 and 1844, it is the work of Tsunemasa Iwasaki, better known as Kan-en, a sobriquet that translates to "irrigation of a garden for plants". Kan-en was a servant of the Tokugawa Shogunate, a born naturalist, and Honzo Zufu is his magnum opus, comprising annotated illustrations of some 2,920 plants. Some volumes were printed using woodblocks and hand-colored, while others are manuscripts, transcribed from the first original set by hand, and distributed one by one to subscribers. Only six original sets exist in Japan. The work held at Kew, one of the most extensive botanical libraries in the world, is also original. Forty images selected from this unrivaled work are reproduced here along with an introduction by contemporary botanical artist Masumi Yamanaka and botanist Martyn Rix, telling the story of Honzo Zufu and the set given to Kew--making this gift book a truly singular keepsake for fans of Japanese art as well as plant lovers.

Another Science is Possible Isabelle Stengers 2018-03-16 Like fast food, fast science is quickly prepared, not particularly good, and it clogs up the system. Efforts to tackle our most pressing issues have been stymied by conflict within the scientific community and mixed messages symptomatic of a rushed approach. What is more, scientific research is being shaped by the bubbles and crashes associated with economic speculation and the market. A focus on conformism, competitiveness, opportunism and flexibility has made it extremely difficult to present cases of failure to the public, for fear that it will lose confidence in science altogether. In this bold new book, distinguished philosopher Isabelle Stengers shows that research is deeply intertwined with broader social interests, which means that science cannot race ahead in isolation but must learn instead to slow down. Stengers offers a path to an alternative science, arguing that researchers should stop seeing themselves as the 'thinking, rational brain of humanity' and refuse to allow their expertise to be used to shut down the concerns of the public, or to spread the belief that scientific progress is inevitable and will resolve all of society's problems. Rather, science must engage openly and honestly with an intelligent public and be clear about the kind of knowledge it is capable of producing. This timely and accessible book will be of great interest to students, scholars and policymakers in a wide range of fields, as well anyone concerned with the role of science and its future.
