surpassing my expectations. The exam presented a mix of

question difficulties, with prominent topics being Kinesis, Lakeformation, Big Data tools, and S3. Given the declining cybersecurity job market in Europe post-2021, I'm contemplating a transition to cloud engineering. For preparation, I leveraged Stephane Mareek's course, Tutorialdojo's practice tests, and flashcards. My manager also shared his AWS skill builder account. Post evaluation, I found Mareek's practice tests to be outdated and more challenging than required, with his course delving too deeply into some areas. In contrast, Tutorialdojo's materials were simpler. My scores ranged from 65% on Mareek's tests to 75-80% on Tutorialdojo, with a 740 on the official AWS practice test. Sharing this for those on a similar journey. Get your copy now and clear the exam at your first attempt.
