Greek to GCSE: Part 1 John Taylor 2016-09-08 First written in response to a JACT survey of over 100 schools, and now endorsed by OCR, this textbook has become a standard resource for students in the UK and for readers across the world who are looking for a clear and thorough introduction to the language of the ancient Greeks. Revised throughout and enhanced by coloured artwork and text features, this edition will support the new OCR specification for Classical Greek (first teaching 2016). Part 1 covers the basics and is self-contained, with its own reference section. It covers the main declensions, a range of active tenses and a vocabulary of 250 Greek words to be learned. Pupil confidence is built up by constant consolidation of the material covered. After the preliminaries, each chapter concentrates on stories with one source or subject: Aesop, Homer's Odyssey and Alexander the Great, providing an excellent introduction to Greek culture alongside the language study. Written by a long-time school teacher and examiner, this two-part course is based on experience of what pupils find difficult, concentrating on the essentials and on the understanding of principles in both accidence and syntax: minor irregularities are postponed and subordinated so that the need for rote learning is reduced. It aims to be user-friendly, but also to give pupils a firm foundation for further study.

Africa Speaks, America Answers Robin D. G. Kelley 2012-03-13 In Bedford-Stuyvesant, Brooklyn, pianist Randy Weston and bassist Ahmed Abdul-Malik celebrated with song the revolutions spreading across Africa. In Ghana and South Africa, drummer Guy Warren and vocalist Sathima Bea Benjamin fused local musical forms with the dizzying innovations of modern jazz. These four were among hundreds of musicians in the 1950's and '60's who forged connections between jazz and

Africa that definitively reshaped both their music and the world. Each artist identified in particular ways with Africa's struggle for liberation and made music dedicated to, or inspired by, demands for independence and self-determination. That music was the wild, boundary-breaking exultation of modern jazz. The result was an abundance of conversation, collaboration, and tension between African and African American musicians during the era of decolonization. This collective biography demonstrates how modern Africa reshaped jazz, how modern jazz helped form a new African identity, and how musical convergences and crossings altered politics and culture on both continents. In a crucial moment when freedom electrified the African diaspora, these black artists sought one another out to create new modes of expression. Documenting individuals and places, from Lagos to Chicago, from New York to Cape Town, Robin Kelley gives us a meditation on modernity: we see innovation not as an imposition from the West but rather as indigenous, multilingual, and messy, the result of innumerable exchanges across a breadth of cultures.

Latin to GCSE Part 1 Henry Cullen 2016-04-28 A companion to Bloomsbury's popular two-volume Greek to GCSE, this is the first course for Latin students that directly reflects the curriculum in a clear, concise and accessible way. Enhanced by colour artwork and text features, the books support the new OCR specification for Latin (first teaching 2016) as well as meeting the needs of later students, both at university and beyond. Written by two experienced school teachers, one also an examiner, the course is based on a keen understanding of what pupils find difficult, concentrating on the essentials and on the explanation of principles in both accidence and syntax: minor irregularities are postponed and subordinated so that the need for rote learning is reduced. User-friendly, it also gives pupils a firm foundation for further study. Part 1 covers the basics and is self-contained, with its own reference section. It outlines the main declensions, a range of active tenses and a vocabulary of 275 Latin words to be learned. Pupil confidence is built up by constant consolidation of the material covered. After the preliminaries, each chapter concentrates on stories with one source or subject: the Fall of Troy, the journeys of Aeneas, the founding of Rome and the early kings, providing an excellent introduction to Roman culture alongside the language study.

Mathematics for Machine Learning Marc Peter Deisenroth 2020-04-23 The fundamental mathematical tools needed to understand machine learning include linear algebra, analytic geometry, matrix decompositions, vector calculus, optimization, probability and statistics. These topics are traditionally taught in disparate courses, making it hard for data science or computer science students, or professionals, to efficiently learn the mathematics. This self-contained textbook bridges the gap between mathematical and machine learning texts, introducing the mathematical concepts with a minimum of prerequisites. It uses these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support vector machines. For students and others with a mathematical background, these derivations provide a starting point to machine learning texts. For those learning the mathematics for the first time, the methods help build intuition and practical experience with applying mathematical concepts. Every chapter includes worked examples and exercises to test understanding. Programming tutorials are offered on the book's web site.

Latin for the New Millennium: Level 2: student text Milena Minkova 2009-10-15 "Latin for the New Millennium, Levels 1 and 2 is a complete introductory course to the Latin language, suitable for both high school and college students, consisting of two volumes, each accompanied by a teacher's manual and students' workbooks. The strategy employed for teaching and learning incorporates the best of both the reading approach and the more abstract grammatical method. The choice of vocabulary in each chapter reflects ancient authors commonly studied for the AP Latin examinations. There are exercises designed for oral use, as well as a substantial core of more conventional exercises in each chapter. The readings, pictures, and supplementary inserts on cultural information illuminate Roman life, civilization, Roman history, and mythology, as well as the continuing use of Latin after antiquity and its vigorous literary tradition in such periods as the Middle Ages and Renaissance. Each chapter also includes derivatives, the influence of Latin vocabulary on English, and selected proverbs or common Latin sayings. Latin for the New Millennium Level 3 builds on the strong foundation of Levels 1 and 2 and provides students an in-depth experience of Caesar, Catullus, Cicero, Horace, Ovid, and Vergil as well as of the Renaissance writer Erasmus. This text provides students an introduction to unadapted Latin literature and builds their literary analysis skills."--adapted from publisher website.
