Social Cognition and Communication Joseph P. Forgas 2013-07-31 Language is the essence of interpersonal behavior and social relationships, and it is social cognitive processes that determine how we produce and understand language. However, there has been surprisingly little interest in the past linking social cognition and communication. This book presents the latest cutting-edge research from a select group of leading international scholars investigating the how language shapes our thinking, and how social cognitive processes in turn influence language production and communication. The chapters represent diverse perspectives of investigating the links between language and communication, including evolutionary, linguistic, cognitive and affective approaches as well as the empirical analysis of written and spoken narratives. New methodologies are presented including the latest techniques of text analysis to illuminate the psychology of individual language users, and entire cultures and societies. The chapters address such questions as how are cognitive and identity processes reflected in language? How do affective states influence language production? Are political correctness norms in language use effective? How do partners manage to accommodate to each other's communicative expectations? What is the role of language as a medium of interpersonal and intergroup influence? How are individual and cultural identities reflected in, and shaped by narratives in literature, school texts and the media? The book is aimed at all students, researchers and laypersons interested in the interplay between thinking and communication, and should be required reading for all professionals who use language in their everyday work to interact with people.

Introduction to Motivation John W. Atkinson 1978

Liberal Socialism Carlo Rosselli 2017-03-14 First published in 1930, amidst the collapse of socialist ideals and the onset of fascism throughout parts of Europe, *Liberal Socialism* is a powerful and timely document on the ethics of political action. During his confinement for his anti-fascist beliefs, the Italian political philosopher Carlo Rosselli (1899-1937) wrote this work not only as a critique of fascism, but also as an investigation into the history of Marxism and the need for a liberal reformulation of socialism. In this first English-language edition, Nadia Urbinati highlights both the historical and theoretical importance of *Liberal Socialism*, which continued to inspire the anti-fascist movement "Giustizia e Libertà" long after Rosselli's assassination by Mussolini's agents, and which outlines a possible rebirth of the socialist and democratic movements. Rosselli's analysis provides an illuminating interpretation of the ideological crisis of Marxism, in its positivistic version, during the late nineteenth century and exposes the intellectual weakness of revisionist efforts to delineate new versions of Marx's doctrine. He encourages readers to view socialism as an ethical ideal and to consider whether Marxist or liberal methods combine better with socialism to achieve that ideal. Rosselli opts for a liberal socialism that avoids the shortcomings of uncontrolled laissez-faire but favors state intervention to secure public services and social rights. The Architecture of Pica Ciamarra Associati Antonietta Iolanda Lima 2019-04 Since 1970, based in an isolated building situated on the peninsula of Posillipo, Pica Ciamarra Associati (www.pcaint.eu) has acted as a laboratory of architectural and urban design which has gradually

incorporated new members and new energies over the time: using a multidisciplinary approach, the roots of the architectural practice lie in the intensive theoretical and practical work begun in the early 1960s by Massimo Pica Ciamarra. Since then the practice has been marked by a continuous relationship with Le Carré Bleu Feuille internationale d'architecture and leading members of the cultural milieu of Team 10: this has led to constant attention to everything that lies beyond form, to the relationship with contexts that also include non-spatial contexts, and to high levels of integration and dialectical discussion. According to Pica Ciamarra Associati, a design transcends the approaches of a single sector, providing simultaneous solutions to contradictory requirements, combining utopia and practicality. The poetics of the fragment: it mediates between architecture and the urban dimension; some designs also have the aim of becoming absorbed within a context as 'informed fragments'. This monograph is the result of an intensive period of work and consists of two interacting parts. It stems from research into the archive of the studio Pica Ciamarra and conversation with the members of the architectural practice. Organised diachronically, the book tells the long story, unfolding over a period of over fifty years of a team of Neapolitan architects and designers, who have maintained the lively spirit of the practice which is still geared towards the future. The textual and iconographic account tells a story and offers an interpretation that highlights the vibrant atmosphere of the studio, based on a consistency of thought and action, and fuelled by an interest in many different forms of knowledge. The contextualisation of the events related to the studio, as they unfolded over time, is wide-ranging, coherent and connotative. Antonietta Iolanda Lima, professor of history of architecture at the University of Palermo, has always tried, through theory, teaching and design, to disseminate the importance of history which can embrace innovation and tradition to an equal degree, forming a new architectural language. According to her view of architecture, history and design are closely connected, a 'single entity' as is reflected by her career. Since the 1980s, her academic work has gained increasing importance, a way of avoiding narrow sectoral approaches in the training of future architects, offering a holistic stance of the history of architecture and an architecture that contributes to shaping critical thought and a thriving cultural life.

Exploring the City Ulf Hannerz 1980 Within a relatively short time, urban anthropology has emerged as one of the most vital fields of anthropology. During its formative period, however, it has lacked intellectual coherence. *Exploring the City* is a bold first attempt to provide just such a coherent and unified theoretical understanding of urbanism. Hannerz draws upon the urban perspectives of other disciplines as well, such as history, sociology, and geography, to bring intellectual unity to the history and development of urban anthropology.

Gender, War, and Conflict Laura Sjoberg 2014-07-17 From Pakistan to Chechnya, Sri Lanka to Canada, pioneering women are taking their places in formal and informal military structures previously reserved for, and assumed appropriate only for men. Women have fought in wars, either as women or covertly dressed as men, throughout the history of warfare, but only recently have they been allowed to join state militaries, insurgent groups, and terrorist organizations in unprecedented numbers. This begs the question - how useful are traditional gendered categories in understanding the dynamics of war and conflict? And why are our stories of gender roles in war typically so narrow? Who benefits from them? In this illuminating book, Laura Sjoberg explores how gender matters in war-making and war-fighting today. Drawing on a rich range of examples from conflicts around the world, she shows that both women and men play many more diverse roles in wars than either media or scholarly accounts convey. Gender, she argues, can be found at every turn in the practice of war; it is crucial to understanding not only 'what war is', but equally how it is caused, fought and experienced. With end of chapter questions for discussion and guides to further reading, this book provides the perfect introduction for students keen to understand the multi-faceted role of gender in warfare. *Gender, War and Conflict* will challenge and change the way we think about war and conflict in the modern world.

Venice and the Veneto during the Renaissance: the Legacy of Benjamin Kohl Knapton, Michael 2014 Benjamin G. Kohl (1938-2010) taught at Vassar College from 1966 till his retirement

as Andrew W. Mellon Professor of the Humanities in 2001. His doctoral research at The Johns Hopkins University was directed by Frederic C. Lane, and his principal historical interests focused on northern Italy during the Renaissance, especially on Padua and Venice. His scholarly production includes the volumes *Padua under the Carrara, 1318-1405* (1998), and *Culture and Politics in Early Renaissance Padua* (2001), and the online database *The Rulers of Venice, 1332-1524* (2009). The database is eloquent testimony of his priority attention to historical sources and to their accessibility, and also of his enthusiasm for collaboration and sharing among scholars.

Comparative legal systems Vincenzo Zeno-Zencovich 2019-03-01 La nuova edizione di questa Introduzione ai Sistemi giuridici comparati è stata aggiornata ed arricchita con una serie di illustrazioni seguendo il movimento del "Legal design". Nel volume i sistemi giuridici sono visti come un insieme in cui ogni parte di essi è in relazione con le altre ed in un contesto globale con il quale sono in osmosi. Il volume è suddiviso in otto capitoli dedicati a: 1. Sistemi democratici. 2. Valori. 3. Il governo. 4. La dimensione economica. 5. Il 'Welfare state'. 6. La repressione dei reati. 7. Giudici e giurisdizione. 8. Modelli per un mondo globalizzato.

Archives, Ancestors, Practices Nathan Schlanger 2008-06-30 In line with the resurgence of interest in the history of archaeology manifested over the past decade, this volume aims to highlight state-of-the-art research across several topics and areas, and to stimulate new approaches and studies in the field. With their shared historiographical commitment, the authors, leading scholars and emerging researchers, draw from a wide range of case studies to address major themes such as historical sources and methods; questions of archaeological practices and the practical aspects of knowledge production; 'visualizing archaeology' and the multiple roles of iconography and imagery; and 'questions of identity' at local, national and international levels.

Labour Law and Welfare Systems in an Era of Demographic, Technological, and Environmental Changes Anthony Forsyth 2019-06-19 The book discusses how labour law and welfare systems will be affected by the ongoing transformation of work. The first section considers demography from two different perspectives. On the one hand, it focuses on chronic diseases and their impact on work, emphasising the role and the regulation of welfare systems. On the other, attention is given to youth unemployment and to those forms of employment which might have an impact on young people. Section II touches upon the relationship between the environment and industrial relations, while the third part broaches the topic of the impact of technology in the context of the Fourth Industrial Revolution, also known as Industry 4.0. As such, this volume provides an exhaustive picture of the changes currently underway, considering all the aspects which will affect work now and in the future.

Counterfactual Thinking - Counterfactual Writing Dorothee Birke 2011-11-30 Counterfactuality is currently a hotly debated topic. While for some disciplines such as linguistics, cognitive science, or psychology counterfactual scenarios have been an important object of study for quite a while, counterfactual thinking has in recent years emerged as a method of study for other disciplines, most notably the social sciences. This volume provides an overview of the current definitions and uses of the concept of counterfactuality in philosophy, historiography, political sciences, psychology, linguistics, physics, and literary studies. The individual contributions not only engage the controversies that the deployment of counterfactual thinking as a method still generates, they also

highlight the concept's potential to promote interdisciplinary exchange without neglecting the limitations and pitfalls of such a project. Moreover, the essays from literary studies, which make up about half of the volume, provide both a historical and a systematic perspective on the manifold ways in which counterfactual scenarios can be incorporated into and deployed in literary texts.

The Swallows of Monte Cassino Frederika Randall 2013-10-14 The Strega Prize-winning author of *The Girl with a Leica* delivers a novel that hinges on one of the bloodiest World War II battles and those who fought it. In this highly original novel, Janeczek retells the four-month-long Battle of Monte Cassino from the point of view of the Maori, Gurkha, Polish, North African, small-town American and other Allied foot soldiers who fought and died under German fire near that 6th century Benedictine abbey. Twined through the battle is another story, a memory of the drowned and the saved in Janeczek's own family in wartime Eastern Europe, where Jews who did not go to Nazi death camps went to Soviet gulag camps, and sometimes survived, and even went on to fight at Monte Cassino. A powerful reflection on all the ways that rights can be taken from us. "Helena Janeczek's novel is this: a tattoo etched on the skin, and not painlessly. A vast design that brings together threads from all the various lives that converged in that legendary battle. The beauty of her tale lies in its structure, the way opposites converge: the chaos of battle and the silence of the defeated, ordinariness and the heroism of the powerless, carefully guarded memory and impetuous youth, the past perpetually intertwined with the present." —Roberto Saviano, author of *Gomorrah*

Preparing Teachers for a Changing World Linda Darling-Hammond 2017-07-27 Based on rapid advances in what is known about how people learn and how to teach effectively, this important book examines the core concepts and central pedagogies that should be at the heart of any teacher education program. Stemming from the results of a commission sponsored by the National Academy of Education, *Preparing Teachers for a Changing World* recommends the creation of an informed teacher education curriculum with the common elements that represent state-of-the-art standards for the profession. Written for teacher educators in both traditional and alternative programs, university and school system leaders, teachers, staff development professionals, researchers, and educational policymakers, the book addresses the key foundational knowledge for teaching and discusses how to implement that knowledge within the classroom. *Preparing Teachers for a Changing World* recommends that, in addition to strong subject matter knowledge, all new teachers have a basic understanding of how people learn and develop, as well as how children acquire and use language, which is the currency of education. In addition, the book suggests that teaching professionals must be able to apply that knowledge in developing curriculum that attends to students' needs, the demands of the content, and the social purposes of education: in teaching specific subject matter to diverse students, in managing the classroom, assessing student performance, and using technology in the classroom.

Labour Mobility in the EU Kristina Toplak 2018-09-01 V šestih prispevkih monografije so analizirani obstoječi in porajajoči se izzivi na področju delovne mobilnosti v Evropski uniji, pri čemer jih avtorji obravnavajo skozi prizmo mobilnih delavcev v različnih poklicih. Z večdisciplinarnim pristopom in uporabo različnih metodoloških prijemov so avtorji ustvarili ogrodje za analitične diskusije o učinkih mobilnosti v EU, učinkovitosti in pravičnosti prostega pretoka oseb znotraj EU ter večplastnosti posledic za posameznike, države članice in nacionalne politike. Prvi prispevek je teoretski uvod v tematiko, ki mobilnost izčrpno predstavi kot teoretski koncept, politično agendo in temeljno evropsko vrednoto. Kompleksni preplet mnogoterih učinkov delovne mobilnosti, ki se pojavljajo na več ravneh, je v nadaljevanju obravnavan v petih študijah primera. Le-te osvetljujejo dileme, paradokse, učinke in posledice notranje mobilnosti v EU na primerih mobilnih zdravstvenih delavcev, umetnikov in kulturnih delavcev, napotnih delavcev, skrbstvenih delavk in visoko izobraženih delavcev. Vsi predstavljeni primeri so rezultat večletnih znanstvenoraziskovalnih prizadevanj in aktivnega delovanja avtorjev v različnih projektih s področja mobilnosti.

History Made, History Imagined David Walter Price 1999 In this provocative and original study, David Price investigates history as a form of poiesis -- the act of making in language -- and suggests that certain novels can provide the best means of engaging in historical interpretation. Contending

that the fundamental act of narration itself, including the narration of history, expresses a system of values, Price explores the work of seven contemporary novelists who share a commitment to reexamining history as idea and a refusal to accept history as given. Within a theoretical framework based on Friedrich Nietzsche and Giambattista Vico, Price investigates how these writers -- Carlos Fuentes, Susan Daitch, Salman Rushdie, Michel Tournier, Ishmael Reed, Graham Swift, and Mario Vargas Llosa -- create a discursive space between history and literature, a space within which history can be questioned and the making of history explored. Through their novels, these writers replace the univocal expression of history as a description of "what really happened" with a polyvocality of competing discourses, languages, and points of view. Price's investigation of three modalities of the poietic novel -- the history of forgotten possibilities, the construction of countermemory and cultural critique, and history as myth -- has far-reaching implications for how we read and question the narratives we understand as history. By treating the past as a dynamic flow of values, rather than a fixed collection of facts, *History Made, History Imagined* fosters a deeper understanding not only of literature and philosophy but also of history and our relationship to it.

Social Psychology and Politics Joseph P. Forgas 2015-04-17 Social psychology and politics are intricately related, and understanding how humans manage power and govern themselves is one of the key issues in psychology. This volume surveys the latest theoretical and empirical work on the social psychology of politics, featuring cutting-edge research from a stellar group of international researchers. It is organized into four main sections that deal with political attitudes and values; political communication and perceptions; social cognitive processes in political decisions; and the politics of intergroup behavior and social identity. The contributions address such exciting questions as how do political attitudes and values develop and change? What role do emotions and moral values play in political behavior? How do political messages and the media influence political perceptions? What are the psychological requirements of effective democratic decision making, and why do democracies sometimes fail? How can intergroup harmony be developed, and what is the role of social identity in political processes? As such, this volume integrates the role of cognitive, affective, social and cultural influences on political perception and behavior, offering an overview of the psychological mechanisms underlying political processes. It provides essential reading for teachers, students, researchers and practitioners in areas related to power, social influence and political behavior.

The Psychology of Counterfactual Thinking David R. Mandel 2007-05-07 This book provides a critical overview of significant developments in research and theory on counterfactual thinking that have emerged in recent years and spotlights exciting new directions for future research in this area. Key issues considered include the relations between counterfactual and casual reasoning, the functional bases of counterfactual thinking, the role of counterfactual thinking in the experience of emotion and the importance of counterfactual thinking in the context of crime and justice.

From Novice to Expert Patricia E. Benner 2001 This coherent presentation of clinical judgement, caring practices and collaborative practice provides ideas and images that readers can draw upon in their interactions with others and in their interpretation of what nurses do. It includes many clear, colorful examples and describes the five stages of skill acquisition, the nature of clinical judgement and experiential learning and the seven major domains of nursing practice. The narrative method captures content and contextual issues that are often missed by formal models of nursing knowledge. The book uncovers the knowledge embedded in clinical nursing practice and provides the Dreyfus model of skill acquisition applied to nursing, an interpretive approach to identifying and describing clinical knowledge, nursing functions, effective management, research and clinical practice, career development and education, plus practical applications. For nurses and healthcare professionals.

An Essay on the Tragic Peter Szondi 2002 This is a succinct and elegant argument for the specificity of a philosophy of tragedy, as opposed to a poetics of tragedy espoused by Aristotle.

Motivation And Personality A H Maslow 1981-01-01 I have tried in this revision to incorporate the

main lessons of the last sixteen years. These lessons have been considerable. I consider it a real and extensive revision-even though I had to do only a moderate amount of rewriting-because the main thrust of the book has been modified in important ways which I shall detail below.

Affect and Mathematical Problem Solving Douglas B. McLeod 2012-12-06 Research on cognitive aspects of mathematical problem solving has made great progress in recent years, but the relationship of affective factors to problem-solving performance has been a neglected research area. The purpose of *Affect and Mathematical Problem Solving: A New Perspective* is to show how the theories and methods of cognitive science can be extended to include the role of affect in mathematical problem solving. The book presents Mandler's theory of emotion and explores its implications for the learning and teaching of mathematical problem solving. Also, leading researchers from mathematics, education, and psychology report how they have integrated affect into their own cognitive research. The studies focus on metacognitive processes, aesthetic influences on expert problem solvers, teacher decision-making, technology and teaching problem solving, and beliefs about mathematics. The results suggest how emotional factors like anxiety, frustration, joy, and satisfaction can help or hinder performance in problem solving.

Making Multicultural Education Work Stephen May 1994 Addresses the issue of the efficacy of multicultural education. May advocates the need for a more critically conceived approach to multicultural education. A case study - of Richmond Road School in Auckland, New Zealand - illustrates what can be achieved when this is effectively implemented.

Calvino and the Age of Neorealism 1990-08 Italo Calvino's reputation as one of the great writers of our century rests chiefly on his allegorical fables and fantastic narratives, whose inventiveness, irreverence, and elegant style are universally admired. In this study, the author focuses on Calvino's first novel, *The Path to the Nest of Spiders* (1947), because in it she discerns a critical point of origin for Calvino's entire 'ethics' of writing. She shows how, in *The Path*, he challenges the poetics of objectivity of the Italian neorealists movement and offers a complex and ironic representation of the anti-Fascist armed resistance in Italy. Situating Calvino's early work in its historical and cultural context, the author reassesses Italian neorealism in terms of the theories and critical debates about realism of such critics as Lukacs, Sartre, Brecht, Adorno, and Barthes. She analyzes neorealism's narrative practices and cultural and political implications, while setting neorealism in the context of the resistance and the postwar Reconstruction in Italy and giving readings of major neorealist texts (novels by Pavese and Vittorini, films by Rossellini, Visconti, and others) as well as relatively obscure minor ones. The heart of the book consists of readings of *The Path* from four different but intersecting critical perspectives: formalist-narratological, sociohistorical, psychoanalytic, and Bakhtinian. The readings assess the importance of Calvino's beginnings for the body of his work and incorporate relevant references to his later fiction and critical essays. Out of these multiple readings, the ironic estrangement of the real through the act of writing itself emerges as his key narratological strategy.

Handbook on Restorative Justice Programmes Yvon Dandurand 2006 The present handbook offers, in a quick reference format, an overview of key considerations in the implementation of participatory responses to crime based on a restorative justice approach. Its focus is on a range of measures and programmes, inspired by restorative justice values, that are flexible in their adaptation to criminal justice systems and that complement them while taking into account varying legal, social and cultural circumstances. It was prepared for the use of criminal justice officials, non-governmental organizations and community groups who are working together to improve current responses to crime and conflict in their community

Active Ageing and Healthy Living G. Riva 2014-08-21 Increased life expectancy and the ageing of

the population have been the subject of attention in Western countries, and particularly in Europe, for some years now. The challenge of 'squaring the circle' between ends and means - as well as between personal aspirations and systemic constraints - in health and social care continues to be a major concern for policymakers and all those involved in the delivery of services. This book, *Active Ageing and Healthy Living: A Human Centered Approach in Research and Innovation as Source of Quality of Life*, presents the results of a number of research projects from the Università Cattolica del Sacro Cuore - the largest private university in Italy and in Europe - with a strong commitment to the areas of medicine and health sciences, economics, business, international relations, political science, psychology and communications. Visions and research directions for the future are also presented and discussed. The introduction to the book addresses the challenges posed by an increasingly ageing population and the way in which multidisciplinary research can contribute to positive outcomes. The remainder of the book is divided into two sections. The first proposes promising research directions for future focus, and includes papers on demographic change; frailty in the elderly; the role of diet in healthy ageing; active ageing; and positive technology. The second section deals with recent developments in research into active ageing and healthy living (AA&HL). It addresses numerous topics, including: mechanisms to shift the balance from unhealthy to healthy ageing; nutrition; the role of ICTs for older people; work, retirement and health; and empowering skills for AA&HL.

The Philosophy of the Imagination in Vico and Malebranche Paolo Fabiani 2009 This book is a retrospective view of modern philosophical anthropology through the works of two of its greatest exponents. The author demonstrates how mythology, the philosophy of history and language and Vico's concept of man had as a constant referral point Malebranche's psychology with its Cartesian formulation. The idolatrous and mythopoietic imagination that is described in *La Scienza Nuova* (New Science) has much in common with the "pagan" mind (that is to say the mind subjugated to passions, sensitivity and fantasy that is described in *La Recherche* (The Search after Truth)). Some of the themes discussed here are myth, the metaphoric nature of thought, idolatry, the formation of mentality, the relationships which bind passions and representations and the association of ideas through iconic images. Also discussed are other themes such as the structure of society and imagination, imitation, persuasion and social relationships, communication within society between illustrious imaginations. Moreover in Malebranche has been found a complex and complete theory of imaginative universals (*universali fantastici*). The philosophy of the imagination in Vico and Malebranche is translated and edited by Giorgio A. Pinton.

The Spirit of Utopia 2000-08 I am. We are. That is enough. Now we have to start. These are the opening words of Ernst Bloch's first major work, *The Spirit of Utopia*, written mostly in 1915-16, published in its first version just after the First World War, republished five years later, 1923, in the version here presented for the first time in English translation. *The Spirit of Utopia* is one of the great historic books from the beginning of the century, but it is not an obsolete one. In its style of thinking, a peculiar amalgam of biblical, Marxist, and Expressionist turns, in its analytical skills deeply informed by Simmel, taking its information from both Hegel and Schopenhauer for the groundwork of its metaphysics of music but consistently interpreting the cultural legacy in the light of a certain Marxism, Bloch's *Spirit of Utopia* is a unique attempt to rethink the history of Western civilizations as a process of revolutionary disruptions and to reread the artworks, religions, and philosophies of this tradition as incentives to continue disrupting. The alliance between messianism and Marxism, which was proclaimed in this book for the first time with epic breadth, has met with more critique than acclaim. The expressive and baroque diction of the book was considered as offensive as its stubborn disregard for the limits of disciplines. Yet there is hardly a discipline that didn't adopt, however unknowingly, some of Bloch's insights, and his provocative associations often proved more productive than the statistical account of social shifts. The first part of this philosophical meditation--which is also a narrative, an analysis, a rhapsody, and a manifesto--concerns a mode of self-encounter that presents itself in the history of music from Mozart through

Mahler as an encounter with the problem of a community to come. This we-problem is worked out by Bloch in terms of a philosophy of the history of music. The self-encounter, however, has to be conceived as self-invention, as the active, affirmative fight for freedom and social justice, under the sign of Marx. The second part of the book is entitled Karl Marx, Death and the Apocalypse. I am. We are. That's hardly anything. But enough to start.

Managing Brand Equity David A. Aaker 2009-12-01 The most important assets of any business are intangible: its company name, brands, symbols, and slogans, and their underlying associations, perceived quality, name awareness, customer base, and proprietary resources such as patents, trademarks, and channel relationships. These assets, which comprise brand equity, are a primary source of competitive advantage and future earnings, contends David Aaker, a national authority on branding. Yet, research shows that managers cannot identify with confidence their brand associations, levels of consumer awareness, or degree of customer loyalty. Moreover in the last decade, managers desperate for short-term financial results have often unwittingly damaged their brands through price promotions and unwise brand extensions, causing irreversible deterioration of the value of the brand name. Although several companies, such as Canada Dry and Colgate-Palmolive, have recently created an equity management position to be guardian of the value of brand names, far too few managers, Aaker concludes, really understand the concept of brand equity and how it must be implemented. In a fascinating and insightful examination of the phenomenon of brand equity, Aaker provides a clear and well-defined structure of the relationship between a brand and its symbol and slogan, as well as each of the five underlying assets, which will clarify for managers exactly how brand equity does contribute value. The author opens each chapter with a historical analysis of either the success or failure of a particular company's attempt at building brand equity: the fascinating Ivory soap story; the transformation of Datsun to Nissan; the decline of Schlitz beer; the making of the Ford Taurus; and others. Finally, citing examples from many other companies, Aaker shows how to avoid the temptation to place short-term performance before the health of the brand and, instead, to manage brands strategically by creating, developing, and exploiting each of the five assets in turn

Elements of board governance in banking and financial companies Federico Arcelli This book represents a collection of articles and papers by selected participants to the first Banking Board Academy, seminar jointly organized by Università G. Marconi and Oliver Wyman SPP. Today's environment puts unprecedented demands on board members in financial services firms and beyond. Geopolitical, secular and macro-economic trends pose shift towards a new normal. We have initiated The Banking Board Academy to provide an instructive and informative forum to allow private and public sector stakeholders to connect and discuss how this changing order impacts their role and position within the bank.

Controversies in the Contemporary World Adriano Fabris 2019-08-07 Inspired by Marcelo Dascal's theory of controversies, this volume includes studies in the theory of controversies, studies of the history of controversy forms and their evolution, and case-studies of particular historical and current controversies. The purpose of this volume is to identify a taxonomy of controversies and also to sense a line of development for the phenomenon of controversies itself. At the same time, we want to ask ourselves about the impact and the spread of controversies in the contemporary world, eminently intended as a heuristic element facilitating knowledge. For all these reasons, the fundamental aim of the volume is to provide the reader with a selection of current theoretical and practical perspectives on controversies, and to offer a broad picture of the complex range of definitions, meanings and practices connected to them.

Strangers at Our Door Zygmunt Bauman 2016-06-20 Refugees from the violence of wars and the brutality of famished lives have knocked on other people's doors since the beginning of time. For the people behind the doors, these uninvited guests were always strangers, and strangers tend to generate fear and anxiety precisely because they are unknown. Today we find ourselves confronted with an extreme form of this historical dynamic, as our TV screens and newspapers are filled with accounts of a 'migration crisis', ostensibly overwhelming Europe and portending the collapse of our

way of life. This anxious debate has given rise to a veritable 'moral panic' - a feeling of fear spreading among a large number of people that some evil threatens the well-being of society. In this short book Zygmunt Bauman analyses the origins, contours and impact of this moral panic - he dissects, in short, the present-day migration panic. He shows how politicians have exploited fears and anxieties that have become widespread, especially among those who have already lost so much - the disinherited and the poor. But he argues that the policy of mutual separation, of building walls rather than bridges, is misguided. It may bring some short-term reassurance but it is doomed to fail in the long run. We are faced with a crisis of humanity, and the only exit from this crisis is to recognize our growing interdependence as a species and to find new ways to live together in solidarity and cooperation, amidst strangers who may hold opinions and preferences different from our own.

Values and Norms in Sport Johan Steenbergen 2001 This book is accessible to a wide range of teachers, researchers and students in the world of sport. The central research question in the book is how values and norms manifest themselves in sport and what societal meanings they have. Different contributions provide a number of different perspectives.

Understanding Luniversit Di Fronte Al Cambiamento Realizzazioni Problemi Prospettive Prismi

Before you embark on your journey to find Luniversit Di Fronte Al Cambiamento Realizzazioni Problemi Prospettive Prismi online, it's essential to grasp the concept of Luniversit Di Fronte Al Cambiamento Realizzazioni Problemi Prospettive Prismi eBook formats. Luniversit Di Fronte Al Cambiamento Realizzazioni Problemi Prospettive Prismi come in various formats, each with its own unique features and compatibility. Understanding these formats will help you choose the right one for your device and preferences.

Different Luniversit Di Fronte Al Cambiamento Realizzazioni Problemi Prospettive Prismi eBook Formats Explained

1. EPUB (Electronic Publication):

EPUB is one of the most common eBook formats, known for its versatility and compatibility across a wide range of eReaders and devices.

Features include reflowable text, adjustable font sizes, and support for images and multimedia.

EPUB3, an updated version, offers enhanced interactivity and multimedia support.

2. MOBI (Mobipocket):

MOBI was originally developed for Mobipocket Reader but is also supported by Amazon Kindle devices.

It features a proprietary format and may have limitations compared to EPUB, such as fewer font options.

3. PDF (Portable Document Format):

PDFs are a popular format for eBooks, known for their fixed layout, preserving the book's original design and formatting.

While great for textbooks and graphic-heavy books, PDFs may not be as adaptable to various screen sizes.

4. AZW/AZW3 (Amazon Kindle):

These formats are exclusive to Amazon Kindle devices and apps.

AZW3, also known as KF8, is an enhanced version that supports advanced formatting and features.

5. HTML (Hypertext Markup Language):

HTML eBooks are essentially web pages formatted for reading.

They offer interactivity, multimedia support, and the ability to access online content, making them suitable for textbooks and reference materials.

6. TXT (Plain Text):

Plain text eBooks are the simplest format, containing only unformatted text.

They are highly compatible but lack advanced formatting features.

Choosing the right Luniversit Di Fronte Al Cambiamento Realizzazioni Problemi Prospettive Prismi eBook format is crucial for a seamless reading experience on your device. Here's a quick guide to format compatibility with popular eReaders:

EPUB: Compatible with most eReaders, except for some Amazon Kindle devices. Also suitable for reading on smartphones and tablets using dedicated apps.

MOBI: Primarily compatible with Amazon Kindle devices and apps.

PDF: Readable on almost all devices, but may require zooming and scrolling on smaller screens.

AZW/AZW3: Exclusive to Amazon Kindle devices and apps.

HTML: Requires a web browser or specialized eBook reader with HTML support.

TXT: Universally compatible with nearly all eReaders and devices.
