Hitler's Professors Max Weinreich 1999-01-01 This classic book examines the role of leading scholars, philosophers, historians, and scientists—in Hitler's rise to power and eventual war of extermination against the Jews. Written in 1946 by one of the greatest scholars of European Jewish history and culture, it is now reissued with a new introduction by the prominent historian Martin Gilbert. "Dr. Weinreich's main thesis is that 'German scholarship provided the ideas and techniques that led to and justified unparalleled slaughter.' . . . In its implications and honest presentation of the facts [this book] constitutes the best guide to the nature of Nazi terror that I have read so far."—Hannah Arendt, *Commentary* "Mr. Weinreich's book, by the wealth of its material and by its intelligent approach, offers the reader—in addition to a thorough treatment of the Jewish aspect—many opportunities to think about the role of scholarship in a totalitarian society."—Hans Kohn, *New York Times Book Review* "Building, in the immediate aftermath of the war, on a formidable bibliography of books, pamphlets, and articles, Weinreich provides erudite evidence of the scale and ramifications of Nazi support in German intellectual life."—Martin Gilbert, from the introduction.

The Getty Bronze Jiří Frel 1982-01-01 Released from his prison of incrustation, having rested on the ocean floor for thousands of years, the bronze statue of an athlete stands in a quietly arrogant pose, having just placed an olive crown—the symbol of victory in the Olympic Games—on his head. In this monograph devoted to the Getty Bronze, Dr. Frel analyzes the technique and style that point to its attribution to the great fourth-century Greek sculptor Lysippos. The conservation of the bronze, its possible identity as a Hellenistic prince, and its place in Lysippos's oeuvre are discussed.

I "primati" della scienza Giovanni Paoloni 2018-12-20T00:00:00+01:00 Il volume raccoglie i risultati delle ricerche condotte sulla 'Raccolta Documentaria dei Primati Scientifici e Tecnici Italiani': documenti, oggetti, materiale bibliografico e giornalistico raccolti dal Consiglio Nazionale delle Ricerche per la partecipazione dell'Italia all'Esposizione Universale di Chicago A Century of Progress del 1933. Questa raccolta, voluta da Mussolini e Guglielmo Marconi, rappresenta, per l'importanza dei protagonisti coinvolti, il contributo ideale della scienza e della tecnica italiane nel mondo e il loro ruolo durante il regime fascista. Un'occasione importante per il governo del tempo, impegnato a promuovere il CNR come soggetto coordinatore della politica della ricerca scientifico-tecnologica, al servizio della modernizzazione. Le vicende storiche della 'Raccolta Documentaria' restituiscono l'immagine di un Paese ossessionato dalla modernità e dal progresso tecnologico come strumento di una politica di potenza ritenuta fondamentale in quegli anni così tormentati. Questa volontà propagandistica che coniuga divulgazione e rivendicazione dei 'primati scientifici italiani' si declina però anche attraverso una serie di esposizioni che lasciano in eredità importanti realtà museali. La stessa 'Raccolta Documentaria' dà origine nel 1937 a un Museo delle Scienze all'interno del nuovo palazzo del CNR a Roma e trova infine la sua definitiva collocazione, a partire dagli anni Cinquanta, nel Museo della Scienza e della Tecnica di Milano, dove perde la connotazione originale e assume nuovi significati. Riflettere sulle vicende di questo patrimonio e sull'immagine pubblica della scienza nel Ventennio può contribuire a guardare a questa rappresentazione in senso meno retorico e più storico, con una prospettiva che vada oltre le categorie autocelebrative dei 'primati nazionali' o del 'pantheon della scienza' e abbracci nuovi percorsi interpretativi.

Garibaldi Lucy Riall 2008-10-20 Giuseppe Garibaldi, the Italian revolutionary leader and popular hero, was among the best-known figures of the nineteenth century. This book seeks to examine his life and the making of his cult, to assess its impact, and understand its surprising success. For thirty years Garibaldi was involved in every combative event in Italy. His greatest moment came in 1860, when he defended a revolution in Sicily and provoked the collapse of the Bourbon monarchy, the

overthrow of papal power in central Italy, and the creation of the Italian nation state. It made him a global icon, representing strength, bravery, manliness, saintliness, and a spirit of adventure. Handsome, flamboyant, and sexually attractive, he was worshiped in life and became a cult figure after his death in 1882. Lucy Riall shows that the emerging cult of Garibaldi was initially conceived by revolutionaries intent on overthrowing the status quo, that it was also the result of a collaborative effort involving writers, artists, actors, and publishers, and that it became genuinely and enduringly popular among a broad public. The book demonstrates that Garibaldi played an integral part in fashioning and promoting himself as a new kind of "charismatic" political hero. It analyzes the way the Garibaldi myth has been harnessed both to legitimize and to challenge national political structures. And it identifies elements of Garibaldi's political style appropriated by political leaders around the world, including Mussolini and Che Guevara.

Mussolini and Fascism John Patrick Diggins 2015-03-08 Mussolini, in the thousand guises he projected and the press picked up, fascinated Americans in the 1920s and the early '30s. John Diggins' analysis of America's reaction to an ideological phenomenon abroad reveals, he proposes, the darker side of American political values and assumptions. Originally published in 1972. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. Excavating Modernity Joshua Arthurs 2013-09-20 The cultural and material legacies of the Roman Republic and Empire in evidence throughout Rome have made it the "Eternal City." Too often, however, this patrimony has caused Rome to be seen as static and antique, insulated from the transformations of the modern world. In *Excavating Modernity*, Joshua Arthurs dramatically revises this perception, arguing that as both place and idea, Rome was strongly shaped by a radical vision of modernity imposed by Mussolini's regime between the two world wars. Italian Fascism's appropriation of the Roman past—the idea of Rome, or *romanità*—encapsulated the Fascist virtues of discipline, hierarchy, and order; the Fascist "new man" was modeled on the Roman legionary, the epitome of the virile citizen-soldier. This vision of modernity also transcended Italy's borders, with the Roman Empire providing a foundation for Fascism's own vision of Mediterranean domination and a European New Order. At the same time, *romanità* also served as a vocabulary of anxiety about modernity. Fears of population decline, racial degeneration and revolution were mapped onto the barbarian invasions and the fall of Rome. Offering a critical assessment of *romanità* and its effects, Arthurs explores the ways in which academics, officials, and ideologues approached Rome not as a site of distant glories but as a blueprint for contemporary life, a source of dynamic values to shape the present and future.

Writing Architectural History Aggregate Architectural History Collective 2021-12-14 Over the past two decades, scholarship in architectural history has transformed, moving away from design studio pedagogy and postmodern historicism to draw instead from trends in critical theory focusing on gender, race, the environment, and more recently global history, connecting to revisionist trends in other fields. With examples across space and time—from medieval European coin trials and eighteenth-century Haitian revolutionary buildings to Weimar German construction firms and

present-day African refugee camps—Writing Architectural History considers the impact of these shifting institutional landscapes and disciplinary positionings for architectural history. Contributors reveal how new methodological approaches have developed interdisciplinary research beyond the traditional boundaries of art history departments and architecture schools, and explore the challenges and opportunities presented by conventional and unorthodox forms of evidence and narrative, the tools used to write history.

The Pantheon Tod A. Marder 2015-06-17 The Pantheon is one of the most important architectural monuments of all time. Thought to have been built by Emperor Hadrian in approximately AD 125 on the site of an earlier, Agrippan-era monument, it brilliantly displays the spatial pyrotechnics emblematic of Roman architecture and engineering. The Pantheon gives an up-to-date account of recent research on the best preserved building in the corpus of ancient Roman architecture from the time of its construction to the twenty-first century. Each chapter addresses a specific fundamental issue or period pertaining to the building; together, the essays in this volume shed light on all aspects of the Pantheon's creation, and establish the importance of the history of the building to an understanding of its ancient fabric and heritage, its present state, and its special role in the survival and evolution of ancient architecture in modern Rome.

Capolavori a Villa La Quiete Cristiano Giometti 2016-07-21 La mostra e il relativo catalogo illustrano uno dei più importanti nuclei di dipinti, oggi facenti parte del patrimonio artistico dell'Università degli Studi di Firenze, ospitati all'interno di Villa La Quiete, l'antico conservatorio fiorentino delle Montalve. Di queste opere d'arte, di Ridolfo del Ghirlandaio, di Botticelli, dei Della Robbia, si indagano in maniera approfondita, anche grazie all'apporto di nuove acquisizioni documentarie e attributive, le complesse vicende storico-artistiche e gli originari contesti di provenienza: il fiorentino monastero domenicano di San Jacopo di Ripoli e la chiesa di San Francesco a Monteverchi.

Mussolini and the British Richard Lamb 1997 Besides throwing favourable light on the dictator himself, this account of Mussolini's relations with Britain shows that Italy was ready to become Britain's ally until Britain felt obliged to take a lead in economic sanctions against Italy for its invasion of Abyssinia in 1935.

Italian Fascism's Empire Cinema Ruth Ben-Ghiat 2015-02-11 Ruth Ben-Ghiat provides the first in-depth study of feature and documentary films produced under the auspices of Mussolini's government that took as their subjects or settings Italy's African and Balkan colonies. These "empire films" were Italy's entry into an international market for the exotic. The films engaged its most experienced and cosmopolitan directors (Augusto Genina, Mario Camerini) as well as new filmmakers (Roberto Rossellini) who would make their marks in the postwar years. Ben-Ghiat sees these films as part of the aesthetic development that would lead to neo-realism. Shot in Libya, Somalia, and Ethiopia, these movies reinforced Fascist racial and labor policies and were largely forgotten after the war. Ben-Ghiat restores them to Italian and international film history in this gripping account of empire, war, and the cinema of dictatorship.

Animality in Contemporary Italian Philosophy Felice Cimatti 2020-09-03 This volume provides an overview of contemporary Italian philosophy from the perspective of animality. Its rationale rests on two main premises: the great topicality of both Italian contemporary philosophy (the so-called "Italian Theory") and of the animal question (the so-called "animal turn" in the humanities and the social sciences) in the contemporary philosophical panorama. The volume not only intersects these two axes, illuminating Italian Theory through the animal question, but also proposes an original thesis: that the animal question is a central and founding issue of contemporary Italian philosophy. It combines historical-descriptive chapters with analyses of the theme in several philosophical branches, such as biopolitics, Posthumanism, Marxism, Feminism, Antispeciesism and Theology, and

with original contributions by renowned authors of contemporary Italian (animal) philosophy. The volume is both historical-descriptive and speculative and is intended for a broad academic audience, embracing both Italian studies and Animal studies at all levels.

Europe and Empire Massimo Cacciari 2016-01-04 The European Union and the single currency have given Europe more stability than it has known in the past thousand years, yet Europe seems to be in perpetual crisis about its global role. The many European empires are now reduced to a multiplicity of ethnicities, traditions, and civilizations. Europe will never be One, but to survive as a union it will have to become a federation of "islands" both distinct and connected. Though drawing on philosophers of Europe's past, Cacciari calls not to resist Europe's sunset but to embrace it. Europe will have to open up to the possibility that in few generations new exiles and an unpredictable cultural hybridism will again change all we know about the European legacy. Though scarcely alive in today's politics, the political unity of Europe is still a necessity, however impossible it seems to achieve.

Football and Fascism Simon Martin 2004-09 This is a cultural history of Italian Fascism viewed through the lens of soccer. The 1930s were the zenith of achievement for Italian football--Italy hosted and won the 1934 World Cup and retained the trophy in 1938. At club level, Calcio was reorganized into a national league, after which the first Italian club teams emerged to dominate European competition. It was at this time that Mussolini's party institutionalized soccer as a fascist game. Italian Fascism fully exploited the opportunities football provided to shape public opinion, penetrate daily life, and reinforce conformity. By politicizing the game, Fascism also sought to enhance the regime's international prestige and inculcate nationalist values. Football and Fascism is an original look at the appropriation of sport to serve political ends during a dark period of Italian history.

Synthesis of the Doctrine of Race 2022-11-14 In this book Evola set out his own racial doctrine on the premise of the traditional tripartition of the human being into body, soul, spirit. In the first part, race is presented as a revolutionary idea. The three degrees of race are defined in the second part and elaborated upon in the third part. The fourth part begins with a clear definition of the term "Aryan" and ends with considerations on the racial issue from the point of view of law. Finally, the problem of racial rectification is discussed thoroughly.

Dilettanti Bruce Redford 2008-08-07 Bruce Redford re-creates the vibrant culture of connoisseurship in Enlightenment England by investigating the multifaceted activities and achievements of the Society of Dilettanti. Elegantly and wittily he dissects the British connoisseurs whose expeditions, collections, and publications laid the groundwork for the Neoclassical revival and for the scholarly study of Graeco-Roman antiquity. After the foundation of the society in 1732, the Dilettanti commissioned portraits of the members. Including a striking group of mock-classical and mock-religious representations, these portraits were painted by George Knapp, Sir Joshua Reynolds, and Sir Thomas Lawrence. During the second half of the century, the society's expeditions to the Levant yielded a series of pioneering architectural folios, beginning with the first volume *The Antiquities of Athens* in 1762. These monumental volumes aspired to empirical exactitude in text and image alike. They prepared the way for *Specimens of Ancient Sculpture* (1809), which combines the didactic (detailed investigations into technique, condition, restoration, and provenance) with the connoisseurial (plates that bring the illustration of ancient sculpture to new artistic heights). The Society of Dilettanti's projects and publications exemplify the Enlightenment ideal of the gentleman

amateur, which is linked in turn to a culture of wide-ranging curiosity.

History of Law and Other Humanities. Views of the legal world across the time Valerio Massimo Minale 2019-07-09 The collection of essays presented here examines the links forged through the ages between the realm of law and the expressions of the humanistic culture. We collected thirty-five essays by international scholars and organized them into sections of ten chapters based around ten different themes. Two main perspectives emerged: in some articles the topic relates to the conventional approach of law and/in humanities (iconography, literature, architecture, cinema, music), other articles are about more traditional connections between fields of knowledge (in particular, philosophy, political experiences, didactics). We decided not to confine authors to one particular methodological framework, preferring instead to promote historiographical openness. Our intention was to create a patchwork of different approaches, with each article drawing on a different area of culture to provide a new angle to the history being told. The variety of authorial nationalities gives the collection a multicultural character and the breadth of the chronological period it deals with from antiquity to the contemporary age adds further depth of insight. As the element that unites the collection is historiographical interpretation, we wanted to bring to the fore its historical depth. Thus for every chapter we organized the articles in chronological order according to the historical context covered. Looking at the final outcome, it was interesting to learn that more often than not the connection between law and humanities is not simply a relation between a specific branch of the law and a single field of the humanities, but rather a relation that could be developed in many directions at once, involving different fields of knowledge, and of arts and popular culture. We are grateful to Luigi Lacchè for his contribution to this collection. His essay outlines the coordinates of the law and humanities world, laying out the instruments necessary for an understanding of the origins of a complex methodology and the different approaches that exist within it. This project is the result of discussions that took place during the XXIII Forum of the Association of Young Legal Historians held in Naples in the spring of 2017. The book was made possible thanks to the advice and support of Cristina Vano. The Editors

Through the Periscope Martino Marazzi 2022-06-01 The constant dialogue between literary forms of the Old and the New World is the core concern of the essays in *Through the Periscope*, which examine these ever-changing historical, intellectual, and psychological landscapes through the lens of Italian American culture. Moving beyond Little Italy, the book widens the spectrum of "pure" immigrant studies. It analyzes the *longue durée* of the revolutionary energies of 1848, an arc that leads from Margaret Fuller to Bob Dylan via the Great Migration of European peoples and languages, as well as the merging of various immigrant voices in the "changing culture" of turn-of-the-century New York. It reclaims the importance of Dante for Italian American writers and follows the metamorphosis of a Romance language dense in masterworks and oral nuances through the multiple signs of a new "illiterature." Points of arrival are both the majestic proletarian novels of the 1930s and a contemporary poem like Robert Viscusi's *Ellis Island*. Martino Marazzi's volume underlines the richness of such an epic cultural transformation and its fundamental importance for a more thorough understanding of Euro-American relations.

Modernism in Italian Architecture, 1890-1940 Richard A. Etlin 1991 Winner, category of Architecture and Urban Studies in the 1991 Professional/Scholarly Publishing Annual Awards Competition presented by the Association of American Publishers, Inc. and Winner, Alice Davis Hitchcock Award, Society of Architectural Historians. Richard Etlin's sweeping, generously illustrated study explores the changing idea of modernism in Italian architecture over the five crucial decades that saw the birth and crystallization of modern architecture. Systematically treating the major architects and movements of the period - such as Raimondo D'Aronco and Art Nouveau, Antonio Sant'Elia and Futurism, Marcello Piacentini and the modern vernacular, Giovanni Muzio and the Novecento, Giuseppe Terragni and Italian Rationalism - this book also explores the ways in which the original ideals of the various movements were transformed by working for the Fascist state. *Modernism in Italian Architecture* examines the legacy of the romantic revolution, which confronted architects with the dilemma of how to create an architecture that was both modern and national. It challenges accepted opinion on a variety of issues. Etlin argues against too close an association of Sant'Elia's architecture and manifesto with Futurism by demonstrating a broader context for its themes. His study of Novecento architecture chronicles a movement whose use of classical detailing created a "postmodernism" contemporaneous with the pioneering buildings of the International Style elsewhere in Europe and preceding its arrival in Italy. Etlin undermines the notion that the architects of Italian Rationalism blindly followed an antihistorical credo, by bringing to light the profoundly contextual nature of the abstract geometries of the best Rationalist architecture. The final section, devoted to Fascism, focuses on Terragni's famous Casa del Fascio in Como and the Danteurn project by Terragni and Lingeri. Etlin concludes with a consideration of the anti-Semitic attacks on modern architecture during the Fascist racial campaign of 1938. Richard Etlin is Professor in the School of Architecture at the University of Maryland.

The Architecture of Modern Italy Terry Kirk 2005-06-02 "Modern Italy" may sound like an oxymoron. For Western civilization, Italian culture represents the classical past and the continuity of canonical tradition, while modernity is understood in contrary terms of rupture and rapid innovation. Charting the evolution of a culture renowned for its historical past into the 10 modern era challenges our understanding of both the resilience of tradition and the elasticity of modernity. We have a tendency when imagining Italy to look to a rather distant and definitely premodern setting. The ancient forum, medieval cloisters, baroque piazzas, and papal palaces constitute our ideal itinerary of Italian civilization. The Campo of Siena, Saint Peter's, all of Venice and San Gimignano satisfy us with their seemingly unbroken panoramas onto historical moments untouched by time; but elsewhere modern intrusions alter and obstruct the view to the landscapes of our expectations. As

seasonal tourist or seasoned historian, we edit the encroachments time and change have wrought on our image of Italy. The learning of history is always a complex task, one that in the Italian environment is complicated by the changes wrought everywhere over the past 250 years. Culture on the peninsula continues to evolve with characteristic vibrancy. Italy is not a museum. To think of it as such—as a disorganized yet phenomenally rich museum unchanging in its exhibits—is to misunderstand the nature of the Italian cultural condition and the writing of history itself.

Hidden Histories D. Medina Lasansky 2018-01-10 Tuscany is a landscape whose cultural construction is complicated and multi-layered. It is this very complexity that this book seeks to untangle. By revealing hidden histories, we learn how food, landscape and architecture are intertwined, as well as the extent to which Italian design and contemporary consumption patterns form a legacy that draws upon the Romantic longings of a century before. In the process, this book reveals the extent to which Tuscany has been constructed by Anglos — and what has been distorted, idealized and even overlooked in the process.

Historical Dictionary of Italian Cinema Gino Moliterno 2020-12-08 Italian cinema is now regarded as one of the great cinemas of the world. Historically, however, its fortunes have varied. Following a brief moment of glory in the early silent era, Italian cinema appeared to descend almost into irrelevance in the early 1920s. A strong revival of the industry which gathered pace during the 1930s was abruptly truncated by the advent of World War II. The end of the war, however, initiated a renewal as films such as *Roma città aperta* (Rome Open City), *Sciuscià* (Shoeshine, 1946), and *Ladri di biciclette* (Bicycle Thieves, 1948), flagbearers of what soon came to be known as Neorealism, attracted unprecedented international acclaim and a reputation that only continued to grow in the following years as Italian films were feted worldwide. Ironically, they were celebrated nowhere more than in the United States, where Italian films consistently garnered the lion's share of the Oscars, with Lina Wertmüller becoming the first woman to ever be nominated for the Best Director award. This second edition of *Historical Dictionary of Italian Cinema* contains a chronology, an introduction, and an extensive bibliography. The dictionary section has over 400 cross-referenced entries on major movements, directors, actors, actresses, film genres, producers, industry organizations and key films. This book is an excellent resource for students, researchers, and anyone wanting to know more about Italian Cinema.

History and Memory Jacques Le Goff 1992 In this brilliant meditation on conceptions of history, Le Goff traces the evolution of the historian's craft. Examining real and imagined oppositions between past and present, ancient and modern, oral and written history, *History and Memory* reveals the strands of continuity that have characterized historiography from ancient Mesopotamia to modern

Europe.
