Christus Vivit Pope Francis 2019-04-04 To young Christians of the world, Pope Francis has a message for you: "Christ is alive, and he wants you to be alive!" Pope Francis has always had a special relationship with young people, and in his fatherly love for you he shows that: You can relate to young people in Scripture who made a difference You identify with the Christ who is always young You face difficult issues in the world today You yearn for the truth of the Gospel You are capable of amazing things when you respond to the Gospel You learn and grow with help from the faithful of all generations You need bold and creative youth ministry You can discover who God made you to be You are urged to pray for discernment *Christus Vivit* is written for and to young people, but Pope Francis also wrote it for the entire Church, because, as he says, reflecting on our young people inspires us all. "May the Holy Spirit urge you on as you run this race. The Church needs your momentum, your intuitions, your faith. We need them! And when you arrive where we have not yet reached, have the patience to wait for us."

Heroes of the Valley Jonathan Stroud 2010 YA. Adventure fiction. Fantasy fiction. Listen then, and I'll tell you again of the Battle of the Rock. But none of your usual wriggling, or I'll stop before I've begun . . . Halli loves the old stories from when the valley was a wild and dangerous place - when the twelve legendary heroes stood together to defeat the ancient enemy, the bloodthirsty Trows. Halli longs for adventure but these days the most dangerous thing in the valley is boredom. He tries to liven things up by playing practical jokes. But when one of his jokes goes too far, he reawakens an old blood feud and finds himself on a hero's quest after all. Along the way he meets a ruthless thief, a murderous rival, and a girl who may just be as fearless as he is . Jonathan Stroud has created an epic saga with a funny, unique spin, and an unforgettable anti-hero.

The Virgin of Chartres Margot Elsbeth Fassler 2010-01-01 Medieval Christians knew the past primarily through what they saw and heard. History was reenacted every year in ritual observances particular to each place and region and rooted in the legends of local saints. This richly illustrated book explores the layers of history found in the cult of the Virgin of Chartres as it developed in the eleventh and twelfth centuries. Focusing on the major relic of Chartres Cathedral, the Virgin's gown, and the Feast of Mary's Nativity, Margot Fassler employs a wide range of historical evidence including local histories, letters, obituaries, chants, liturgical sources, and reports of miracles, leading to a detailed reading of the cathedral's west façade. This interdisciplinary volume will prove invaluable to historians who work in religion, politics, music, and art but will also serve as a guidebook for all interested in the history of Chartres Cathedral.

Privacy-Aware Knowledge Discovery Francesco Bonchi 2010-12-02 Covering research at the frontier of this field, *Privacy-Aware Knowledge Discovery: Novel Applications and New Techniques* presents state-of-the-art privacy-preserving data mining techniques for application domains, such as medicine and social networks, that face the increasing heterogeneity and complexity of new forms of data. Renowned authorities from prominent organizations not only cover well-established results—they also explore complex domains where privacy issues are generally clear and well defined, but the solutions are still preliminary and in continuous development. Divided into seven parts, the book provides in-depth coverage of the most novel reference scenarios for privacy-preserving techniques. The first part gives general techniques that can be applied to various applications discussed in the rest of the book. The second section focuses on the sanitization of network traces and privacy in data stream mining. After the third part on privacy in spatio-temporal data mining and mobility data analysis, the book examines time series analysis in the fourth section, explaining how a perturbation method and a segment-based method can tackle privacy issues of time series data. The fifth section on biomedical data addresses

genomic data as well as the problem of privacy-aware information sharing of health data. In the sixth section on web applications, the book deals with query log mining and web recommender systems. The final part on social networks analyzes privacy issues related to the management of social network data under different perspectives. While several new results have recently occurred in the privacy, database, and data mining research communities, a uniform presentation of up-to-date techniques and applications is lacking. Filling this void, *Privacy-Aware Knowledge Discovery* presents novel algorithms, patterns, and models, along with a significant collection of open problems for future investigation.

Forgotten Children Linda A. Pollock 1983-11-24 'The history of childhood is an area so full of errors, distortion and misinterpretation that I thought it vital, if progress were to be made, to supply a clear review of the information on childhood contained in such sources as diaries and autobiographies.' Dr Pollock's statement in her Preface will startle readers who have not questioned the validity of recent theories on the evolution of childhood and the treatment of children, theories which see a movement from a situation where the concept of childhood was almost absent, and children were cruelly treated, to our present western recognition that children are different and should be treated with love and affection. Linda examines this thesis particularly through the close and careful analysis of some hundreds of English and American primary sources. Through these sources, she has been able to reconstruct, probably for the first time, a genuine picture of childhood in the past, and it is a much more humane and optimistic picture than the current stereotype. Her book contains a mass of novel and original material on child-rearing practices and the relations of parents and children, and sets this in the wider framework of developmental psychology, socio-biology and social anthropology. *Forgotten Children* admirably fulfils the aim of its author. In the face of this scholarly and elegant account of the continuity of parental care, few will now be able to argue for dramatic transformations in the twentieth century.
