Post-conflict Justice M. Cherif Bassiouni 2002 Thirty scholars and experts discuss and provide wide-ranging views on a variety of accountability measures: the establishment of ad hoc criminal tribunals for the Former Yugoslavia and Rwanda; truth commissions in South Africa and El Salvador; and lustration laws for the former Czechoslovakia and Germany after its reunification. Also discussed are amnesty for previous crimes and accountability, post-conflict justice involving issues pertaining to the restoration of law and order, and the rebuilding of failed national justice systems. In addition, the book also contains an important set of guidelines designed to achieve accountability and eliminate impunity. The guidelines with commentaries have been prepared by a distinguished group of experts, many of whom have also contributed articles to this volume. Published under the Transnational Publishers imprint.

Reparations Alfred L. Brophy 2006-09-14 Today, the debate over reparations--whether African-Americans should be compensated for decades of racial subjugation--stands as the most racially divisive issue in American politics. In this short, definitive work, Alfred L. Brophy, a leading expert on racial violence, traces the reparations issue from the 1820s to the present in order to assess the arguments on both sides of the current debate. Taking us inside litigation and legislatures past and present; examining failed and successful lawsuits; and exploring reparations actions by legislatures, newspapers, schools, businesses, and truth commissions, this book offers a valuable historical and legal perspective for reparations advocates and critics alike. "A book about reparations and its contentious qualities that is a must-read for all. If you want to know the essence of the debate, this book is for you." --Charles K. Ogletree, Jr., Harvard Law School

International White Collar Crime Bruce Zagaris 2015-08-10 Contemporary transnational criminals take advantage of globalization, trade liberalization, and emerging new technologies to commit a diverse range of crimes. By moving money, goods, services, and people instantaneously they are able to serve purposes of pure economic gain or political violence. This book examines the rise of international economic crime and recent strategies to combat it in the United States and abroad. Focusing on the role of international relations, it draws from case studies in a diverse range of criminality from money laundering to tax evasion. Newly revised and expanded, the second edition of International White Collar Crime incorporates recent developments and updated case studies. New chapters on environmental crimes and securities enforcement under the Dodd-Frank Act continue to make it an essential tool for practicing business, law, and law enforcement.

Daily Life in Japan Louis Frederic 2010-11-01 From the tenth century onwards the emperors of Japan gradually lost power. The local lords or clan chiefs waged ceaseless war against each other, while the court, wholly steeped in Chinese culture, seemed to take no further interest in the affairs of the nation. In 1191 the Minamoto clan mastered the disturbances and finally imposed its rule. Hard work, respect for the hierarchy, the cult of nationalism, a sense of self-sacrifice and duty - such was the new trend. The Buddhist doctrine of Zen made its appearance. It gave mystical support to the samurai, and the Japanese spirit was henceforth directed towards a political and religious asceticism which had an enormous influence on all aspects of art, thought and daily life. An acknowledged authority on the 'classical' period of Japanese history, the author reveals what the life of the Japanese people was like during these five centuries, and shows how a transformation of heart and mind produced a civilization as original as it was profound.

Anthropology and Development Jean-Pierre Oliver De-Sardan 2013-07-18 This book re-establishes the relevance of mainstream anthropological (and sociological) approaches to development processes and simultaneously recognizes that contemporary development ought to be anthropology's principal area of study. Professor de Sardan argues for a socio-anthropology of change and development that is a deeply empirical, multidimensional, diachronic study of social groups and their interactions. The Introduction provides a thought-provoking examination of the principal new approaches that have emerged in the discipline during the 1990s. Part I then makes clear the complexity of social change and development, and the ways in which socio-anthropology can measure up to the challenge of this complexity. Part II looks more closely at some of the leading variables involved in the development process, including relations of production; the logics of social action; the nature of knowledge; forms of mediation; and 'political' strategies.

Restorative Justice Realities Inge Vanfraechem 2010 Restorative justice - as an innovative approach to crime and criminal justice - has been growing constantly over the past twenty years. Its practices seem to hold great promise for victims, offenders, local communities, and the criminal justice system. Research has been set up in many countries to assess and explore restorative justice processes and outcomes. In spite of many program evaluations showing positive results, risks have been identified as well. Moreover, critics have depicted research in the field of restorative justice as 'a mile wide but only an inch deep.' In response to the criticism, this book takes up the challenge to examine restorative justice research as it is undertaken in nine European countries during last twenty years. The book provides an overview of empirical research on victim-offender mediation and conferencing. The research deals with a variety of topics and many of the findings have never been published in English before. The book presents research approaches and results in various countries in order to enhance comparison and to allow further reflection on the possibilities and limits of undertaking European research in this field. This work is the result of the EU funded COST (European Cooperation in Science and Technology) Action A21 on 'Restorative Justice Developments in Europe, ' and includes contributions by researchers with broad experience in the restorative justice field, supported by policy makers and practitioners

Auditor Going Concern Reporting Marshall A. Geiger 2021-06-09 Auditor reporting on going-concern-related uncertainties remains one of the most challenging issues faced by external auditors. Business owners, market participants and audit regulators want an early warning of impending business failure. However, companies typically do not welcome audit opinions indicating uncertainty regarding their future viability. Thus, the auditor's decision to issue a "going concern opinion" (GCO) is a complex and multi-layered one, facing a great deal of tension. Given such a rich context, academic researchers have examined many facets related to an auditor's decision to issue a GCO. This monograph reviews and synthesizes 182 recent GCO studies that have appeared since the last significant review published in 2013 through the end of 2019. The authors categorize studies into the three broad areas of GCO: (1) determinants, (2) accuracy and (3) consequences. As an integral part of their synthesis, they summarize the details of each study in several user-friendly tables. After discussing and synthesizing the research, they present a discussion of opportunities for future research, including issues created or exacerbated as a result of the global COVID-19 pandemic. This monograph will be of assistance to researchers interested in exploring this area of auditor responsibility. It will also be of interest to auditing firms and individual

practitioners wanting to learn what academic research has examined and found regarding this challenging aspect of audit practice. Auditing standard-setters and regulators will find it of interest as the authors review numerous studies examining issues related to audit policy and regulation, and their effects on GCO decisions. The examination of GCO research is extremely timely given the financial and business disruption caused by the worldwide COVID-19 pandemic. This unprecedented global event has caused companies, auditors and professional bodies to revisit and reassess their approach to going concern, and to think even more deeply about this fundamental business imperative.

Rebuilding Community Connections - Mediation and Restorative Justice in Europe Ivo Aertsen 2004-01-01 Rebuilding community connections outlines the main features of restorative justice, including different models and research findings, and proposes guidelines for setting up programmes. It also identifies problems and ways of dealing with them. This guide provides essential information for those planning to introduce restorative justice, in particular countries in central and eastern Europe. For countries that have already done so, it offers an opportunity to review practice in the light of experience and research elsewhere. -- Council of Europe.

The Cambridge Companion to Ancient Greek Law Michael Gagarin 2005-09-12 This Companion volume provides a comprehensive overview of the major themes and topics pertinent to ancient Greek law. A substantial introduction establishes the recent historiography on this topic and its development over the last 30 years. Many of the 22 essays, written by an international team of experts, deal with procedural and substantive law in classical Athens, but significant attention is also paid to legal practice in the archaic and Hellenistic eras; areas that offer substantial evidence for legal practice, such as Crete and Egypt; the intersection of law with religion, philosophy, political theory, rhetoric, and drama, as well as the unity of Greek law and the role of writing in law. The volume is intended to introduce non-specialists to the field as well as to stimulate new thinking among specialists.

Tattoo Manuel Vazquez Montalban 2013-07-30 Only Pepe Carvalho could use a tattoo saying "Born to Raise Hell in Hell" as evidence that the police are, once again, dead wrong In a Spain still stifled under the rule of Franco, former CIA operative--and former Communist--Pepe Carvalho has become so cynical he seems to care about nothing except food and sex. He's even taken to burning the occasional book in his Barcelona apartment, just so he can have a fire going in the fireplace when he eats some bacalhao. But when he sees the cops bungling a case he's hired to investigate--that of a body pulled out of the sea--he's roused by a sense of injustice. The cops think the murder was connected to local drug dealers and brothels, and they begin raiding bars and harassing Barcelona's women of the night. But Carvalho's gut tells him something else is going on, and the cops are wrong once again. As the cops stir up more and more trouble, and Carvalho gets more and more entwined, he's only got one clue: a tattoo on the dead man's body, one which reads: "Born to Raise Hell in Hell."

Dominion Over Demons H. A. Maxwell Whyte 2013-04-01 You Have Authority over the Devil! What are demons, and what is their connection with drugs, lust, pornography, crime, and mental illness? H. A. Maxwell Whyte vividly describes his experiences with the demon oppressed and the demon possessed. He provides fascinating information on how to recognize the power of the devil. While curiosity about the occult and the supernatural pervades our society, the devil's best defense has been successfully deluding mankind into thinking that he does not exist. Whyte addresses such subjects as: The strange world of spirits The personification of demons The snare of deceptions Understanding your authority The force of the bloodline

Restorative Justice in Practice Joanna Shapland 2011-07-15 Restorative justice has made significant progress in recent years and now plays an increasingly important role in and alongside the criminal justice systems of a number of countries in different parts of the world. In many cases, however, successes and failures, strengths and weaknesses have not been evaluated sufficiently systematically and comprehensively, and it has been difficult to gain an accurate picture of its implementation and the lessons to be drawn from this. Restorative Justice in Practice addresses this need, analyzing the results of the implementation of three restorative justice schemes in England and Wales in the largest and most complete trial of restorative justice with adult offenders worldwide. It aims to bring out the practicalities of setting up and running restorative justice schemes in connection with criminal justice, the costs of doing so and the key professional and ethical issues involved. At the same time the book situates these findings within the growing international academic and policy debates about restorative justice, addressing a number of key issues for criminal justice and penology, including: how far victim expectations of justice are and can be met by restorative justice aligned with criminal justice whether 'community' is involved in restorative justice for adult offenders and how this relates to social capital how far restorative justice events relate to processes of desistance (giving up crime), promote reductions in reoffending and link to resettlement what stages of criminal justice may be most suitable for restorative justice and how this relates to victim and offender needs the usefulness of conferencing and mediation as forms of restorative justice with adults. Restorative Justice in Practice will be essential reading for both students and practitioners, and a key contribution to the restorative justice debate.

Can Might Make Rights? Jane Stromseth 2006-09-25 This book looks at why it's so difficult to create 'the rule of law' in post-conflict societies such as Iraq and Afghanistan, and offers critical insights into how policy-makers and field-workers can improve future rule of law efforts. A must-read for policy-makers, field-workers, journalists and students trying to make sense of the international community's problems in Iraq and elsewhere, this book shows how a narrow focus on building institutions such as courts and legislatures misses the more complex cultural issues that affect societal commitment to the values associated with the rule of law. The authors place the rule of law in context, showing the interconnectedness between the rule of law and other post-conflict priorities, such as reestablishing security. The authors outline a pragmatic, synergistic approach to the rule of law which promises to reinvigorate debates about transitions to democracy and post-conflict reconstruction.

What is a Just Peace? Alexis Keller 2006-01-26 Just War has attracted considerable attention. The words peace and justice are often used together. Surprisingly, however, little conceptual thinking has gone into what constitutes a Just Peace. This book, which includes some of the world's leading scholars, debates and develops the concept of Just Peace. The problem with the idea of a Just Peace is that striving for justice may imply a Just War. In other words, peace and justice clash at times. Therefore, one often starts from a given view of what constitutes justice, but this a priori approach leads - especially when imposed from the outside - straight into discord. This book presents conflicting viewpoints on this question from political, historical, and legal perspectives as well as from a policy perspective. The book also argues that Just Peace should be defined as a process resting on four necessary and sufficient conditions: thin recognition whereby the other is accepted as autonomous; thick recognition whereby identities need to be accounted for; renouncement, requiring significant sacrifices from all parties; and finally, rule, the objectification of a Just Peace by a "text" requiring a common language respecting the identities of each, and defining their rights and duties. This approach based on a language-oriented process amongst directly concerned parties, goes beyond liberal and culturalist perspectives. Throughout the process, negotiators need to build a novel shared reality as well as a new common language allowing for an enduring harmony between previously clashing peoples. It challenges a liberal view of peace founded on norms claiming universal scope. The liberal conception has difficulty in solving conflicts such as civil wars characterized typically by fundamental disagreements between different communities. Cultures make demands that are identity-defining, and some of these defy the "cultural neutrality" that is one of the foundations of liberalism. Therefore, the concept of Just Peace cannot be solved within the liberal tradition.

Global Perspectives on the Rule of Law James J. Heckman 2013-03-01 Global Perspectives on the Rule of Law is a collection of original research on the rule of law from a panel of leading economists, political scientists, legal scholars, sociologists and historians. The chapters critically analyze the meaning and foundations of the rule of law and its relationship to economic and democratic development, challenging many of the underlying assumptions guiding the burgeoning field of rule of law development. The combination of jurisprudential, quantitative, historical/comparative, and theoretical analyses seeks to chart a new course in scholarship on the rule of law: the volume as a whole takes seriously the role of law in pursuing global justice, while confronting the complexity of instituting the rule of law and delivering its promised benefits. Written for scholars, practitioners, and policy-makers, Global Perspectives on the Rule of Law offers a unique combination of jurisprudential and empirical research that will be provocative and relevant to those who are attempting to understand and advance the rule of law globally. The chapters progress from broad questions regarding current rule of development efforts and the concept of rule of law to more specific issues pertaining to economic and democratic development. Specific countries, such as China, India, and seventeenth century England and the Netherlands, serve as case studies in some chapters, while broad global surveys feature in other chapters. Indeed, this impressive scope of research ushers in the next generation of scholarship in this area.

Married Life David Vogel 2013-09-26 David Vogel has long been regarded as a leading figure of Hebrew literature, and his work has been compared to that of Joseph Roth, Thomas Mann, and Franz Kafka. *Married Life*, which was first published in 1929, is Vogel's magnum opus — a sweeping portrait of a doomed marriage and a doomed city. Set in Vienna, the novel tells of the relationship between the penniless writer Rudolf Gurdweill and Baroness Thea von Takow, who treats her husband with cruelty and disdain. In spite of this, Gurdweill struggles to find the will to leave his wife, even when the devoted Lotte Bondheim offers him the prospect of true happiness. Yet this is no mere story of a love triangle. In astonishingly vivid detail, Vogel evokes the atmosphere of 1920s Vienna, taking us from fashionable cafés and aristocratic estates to the shoemaker's workshop and the almshouse. With decadence and poverty existing side by side, Vienna is depicted as a city on the brink of collapse — a haunting prefiguration of the horrors to come. With its rich, vital prose, and its profound insight into the human condition, *Married Life* is truly a modern classic.

The Invention of Law in the West Aldo Schiavone 2012-01-01 Law is a specific form of social regulation distinct from religion, ethics, and even politics, and endowed with a strong and autonomous rationality. Its invention, a crucial aspect of Western history, took place in ancient Rome. Aldo Schiavone, a world-renowned classicist, reconstructs this development with clear-eyed passion, following its course over the centuries, setting out from the earliest origins and moving up to the threshold of Late Antiquity. The invention of Western law occurred against the backdrop of the Roman Empire's gradual consolidation — an age of unprecedented accumulation of power which transformed an archaic predisposition to ritual into an unrivaled technology for the control of human dealings. Schiavone offers us a closely reasoned interpretation that returns us to the primal origins of Western legal machinery and the discourse that was constructed around it — formalism, the pretense of neutrality, the relationship with political power. This is a landmark work of scholarship whose influence will be felt by classicists, historians, and legal scholars for decades.

The Oxford Handbook of White-Collar Crime Shanna R. Van Slyke 2016-03-01 Although white-collar crime has caused a substantial amount of damage on both the individual and societal levels, it often ranks below street crime as a matter of public concern. Thus, white-collar crime remains an ambiguous and even controversial topic among academics, with a relative dearth of scholarly focus on the issue. The Oxford Handbook of White-Collar Crime offers a comprehensive treatment of the most up-to-date theories and research regarding white-collar crime. Contributors tackle a vast range of topics, including the impact of white-collar crime, the contexts in which white-collar crime occurs, current crime policies and debates, and examinations of the criminals themselves. The volume concludes with a set of essays that discuss potential responses for controlling white-collar crime, as well as promising new avenues for future research. Uniting conceptual theories, empirical research, and ethnographic data, the Handbook provides the first unified analytic framework on white-collar crime. Given the astronomical aggregate losses to victims, building a more nuanced understanding of the dynamics of white-collar crime is a topic of immediate social concern. The definitive resource on white-collar crime, this Handbook will be a valuable resource for developing both intellectual and policy-related solutions.

Accountability for Atrocities Jane E. Stromseth 2003 This book examines critical challenges in achieving accountability for genocide, crimes against humanity, and war crimes, focussing in particular on the relationship between national and international accountability mechanisms in pursuing key goals over the past decade. The essays in this volume provide an in-depth look at the goals and mechanisms of accountability in a variety of cases: the former Yugoslavia; Rwanda; Sierra Leone; Cambodia; Argentina and El Salvador; East Timor and Indonesia; and Belgium's prosecution of war crimes under its universal jurisdiction law. By analyzing the goals pursued in each case, the relationship between domestic and international mechanisms, the relative emphasis on criminal and non-criminal forms of accountability, and the effectiveness of the chosen approaches, this volume offers important lessons for the ICC and highlights the continuing need for innovative forms of international assistance to advance specific accountability goals in particular countries. Published under the Transnational Publishers imprint.

Translating Cultures David Katan 2014-06-03 As the 21st century gets into stride so does the call for a discipline combining culture and translation. This second edition of *Translating Cultures* retains its original aim of putting some rigour and coherence into these fashionable words and lays the foundation for such a discipline. This edition has not only been thoroughly revised, but it has also been expanded. In particular, a new chapter has been added which focuses specifically on training translators for translational and intercultural competencies. The core of the book provides a model for teaching culture to translators, interpreters and other mediators. It introduces the reader to current understanding about culture and aims to raise awareness of the fundamental role of culture in constructing, perceiving and translating reality. Culture is perceived throughout as a system for orienting experience, and a basic presupposition is that the organization of experience is not 'reality', but rather a simplified model and a 'distortion' which varies from culture to culture. Each culture acts as a frame within which external signs or 'reality' are interpreted. The approach is interdisciplinary, taking ideas from contemporary translation theory, anthropology, Bateson's logical typing and metamessage theories, Bandler and Grinder's NLP meta-model theory, and Hallidayan functional grammar. Authentic texts and translations are offered to illustrate the various strategies that a cultural mediator can adopt in order to make the different cultural frames he or she is mediating between more explicit.
