Accountability in the European Union Carol Harlow 2002 The debate over the democratic deficit of the European Union tends to focus on the legitimacy of the European Parliament. This work approaches the issue from the angle of accountability an essential element of democratic government.

Soft Law in European Community Law Linda Senden 2004-09-28 This book offers the first systematic investigation of the phenomenon of soft law within the framework of the EC (the first pillar of the EU), and its use by the European Commission and Council of Ministers. It focusses upon how soft law fits into the Community legal system, and how it is used, and, in particular, how it relates to Community legislation. Differentiation of the Community instruments, including the instruments of soft law, is often thought to enhance the effectiveness, legitimacy and transparency of the Community. This book asks whether soft law indeed provides a satisfactory alternative to legislation from this perspective and, if so, in what cases and under what conditions. Furthermore, the author asks to what extent the use of soft law implies good governance, and throws fresh light on this very heterogenous phenomenon, by looking at frequently used instruments in many different areas of Community law, such as competition law, state aid, environment, social policy etc., in the process identifying their different characteristics, aims, functions and legal effects. What emerges is that the conditions under which soft law is used may be problematic in relation to increasing the legitimacy, effectiveness and transparency of Community action. This is a work which will interest legal practitioners confronted with the use of soft law and the question of its possible legal effect in an increasing number of sectors and academics interested in the vexed question of how the increased use of soft law can be justified in a Community legal order built upon the rule of law. It is also

critical of developments taking place within the framework of the European Convention and the proposed European Constitution, and goes beyond the immediate problems of soft law to touch upon issues such as competence, legal protection, division of powers between the EC and the Member States, institutional balance, lawmaking by the Community Courts, the scope of Community legal principles and the influence of soft law on the progressive development of both Community and national law.

Environmentally Harmful Subsidies 2005-08-15 Subsidies are pervasive throughout OECD countries and worldwide. Every year, OECD countries transfer at least USD 400 billion to different economic sectors. Much of this support is potentially environmentally harmful. Reforming environmentally harmful subsidies is a significant policy challenge facing OECD countries. However, untangling and assessing the effects of subsidies on the environment is a complex task. A systematic approach is required to ensure that appropriate policies are developed and the benefits of reform fully realised. This report presents sectoral analyses on agriculture, fisheries, water, energy and transport. It proposes a checklist approach to identifying and assessing environmentally harmful subsidies. It also identifies the key tensions and conflicts that are likely to influence subsidy policy making. Can the political and economic impediments to subsidy reform be overcome? This book concludes with a discussion of politically feasible subsidy reform strategies. FURTHER READING Environmentally Harmful Subsidies: Policy Issues and Challenges (OECD, 2003)

Marketing Renewable Energy Carsten Herbes 2017-06-23 This book answers questions such as: How do you market green electricity or bio-methane? What is the right price for renewable energy? How do the legal framework and customer preferences influence marketing strategies? Is direct marketing or online marketing the key to success? Answers to these and many other questions can be found in this volume, which gathers contributions from leading researchers and respected practitioners. Employing an easy-to-follow, clearly structured format, it combines the latest research results and concrete case studies to help readers understand the fundamentals of marketing for renewable energies and new business models from different countries.

The Routledge Handbook of Museums, Media and Communication Kirsten Drotner 2018-12-07 Museums today find themselves within a mediatised society, where everyday life is conducted in a data-full and technology-rich context. In fact, museums are themselves mediatised: they present a uniquely media-centred environment, in which communicative media is a constitutive property of their organisation and of the visitor experience. The Routledge Handbook of Museums, Media and Communication explores what it means to take mediated communication as a key concept for museum studies and as a sensitising lens for media-related museum practice on the ground. Including contributions from experts around the world, this original and innovative Handbook shares a nuanced and precise understanding of media, media concepts and media terminology, rehearsing new locations for writing on museum media and giving voice to new subject alignments. As a whole, the volume breaks new ground by reframing mediated museum communication as a resource for an inclusive understanding of current museum developments. The Routledge Handbook of Museums, Media and Communication will appeal to both students and scholars, as well as to practitioners involved in the visioning, design and delivery of mediated communication in the museum. It teaches

us not just how to study museums, but how to go about being a museum in today's world. The book is available for free in PDF format as Open Access at www.taylorfrancis.com. It has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license *Soft Law and Public Authorities* Greg Weeks 2016-02-25 This book considers the phenomenon of soft law employed by domestic public authorities. Lawyers have long understood that public authorities are able to issue certain communications in a way that causes them to be treated like law, even though these are neither legislation nor subordinate legislation. Importantly for soft law as a regulatory tool, people tend to treat soft law as binding even though public authorities know that it is not. It follows that soft law's 'binding' effects do not apply equally between the public authority and those to whom it is directed. Consequently, soft law is both highly effective as a means of regulation, and inherently risky for those who are regulated by it. Rather than considering soft law as a form of regulation, this book examines the possible remedies when a public authority breaches its own soft law upon which people have relied, thereby suffering loss. It considers judicial review remedies, modes of compensation which are not based upon a finding of invalidity, namely tort and equity, and 'soft' challenges outside the scope of the courts, such as through the Ombudsman or by seeking an ex gratia payment.

History of the Italian Agricultural Landscape Emilio Sereni 2014-07-14 Emilio Sereni's classic work is now available in an English language edition. History of the Italian Agricultural Landscape is a

synthesis of the agricultural history of Italy in its economic, social, and ecological context, from antiquity to the mid-twentieth century. From his perspective in the Italian tradition of cultural Marxism, Sereni guides the reader through the millennial changes that have affected the agriculture and ecology of the regions of Italy, as well as through the successes and failures of farmers and technicians in antiquity, the middle ages, the Renaissance, and the Industrial Revolution. In this sweeping historical survey, he describes attempts by successive generations to adapt Italy's natural environment for the purposes of agriculture and to respond to its changing ecological problems. *History of the Italian Agricultural Landscape* first appeared in 1961. At the time of its publication it was a pathbreaking work, parallel in its importance for Italy to Marc Bloc's masterwork of 1931, *The Original Characteristics of French Rural History*. Sereni invented the concept of the historical "agricultural landscape": an interdisciplinary characterization of rural life involving economic and social history, linguistics, archeology, art history, and ecological studies. Originally published in 1997. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Automate This Christopher Steiner 2012-08-30 The rousing story of the last gasp of human agency and how today's best and brightest minds are endeavoring to put an end to it. It used to be that to diagnose an illness, interpret legal documents, analyze foreign policy, or write a newspaper article you needed a human being with specific skills—and maybe an advanced degree or two. These days, high-level tasks are increasingly being handled by algorithms that can do precise work not only with speed but also with nuance. These “bots” started with human programming and logic, but now their reach extends beyond what their creators ever expected. In this fascinating, frightening book, Christopher Steiner tells the story of how algorithms took over—and shows why the “bot revolution” is about to spill into every aspect of our lives, often silently, without our knowledge. The May 2010 “Flash Crash” exposed Wall Street’s reliance on trading bots to the tune of a 998-point market drop and \$1 trillion in vanished market value. But that was just the beginning. In Automate This, we meet bots that are driving cars, penning haiku, and writing music mistaken for Bach’s. They listen in on our customer service calls and figure out what Iran would do in the event of a nuclear standoff.

There are algorithms that can pick out the most cohesive crew of astronauts for a space mission or identify the next Jeremy Lin. Some can even ingest statistics from baseball games and spit out pitch-perfect sports journalism indistinguishable from that produced by humans. The interaction of man and machine can make our lives easier. But what will the world look like when algorithms control our hospitals, our roads, our culture, and our national security? What happens to businesses when we automate judgment and eliminate human instinct? And what role will be left for doctors, lawyers, writers, truck drivers, and many others? Who knows—maybe there's a bot learning to do your job this minute.

The Age of Aging George Magnus 2012-11-27 The year 2008 marks the beginning of the baby boomer retirementavalanche just as the different demographics in advanced and mostdeveloping countries are becoming more pronounced. People areworrying again that developments in global population trends, foodsupply, natural resource availability and climate change raise thequestion as to whether Malthus was right after all. The Age of Aging explores a unique phenomenon for mankind and,therefore, one that takes us into uncharted territory. Low birthrates and rising life expectancy are leading to rapid aging and astagnation or fall in the number of people of working age inWestern societies. Japan is in pole position but will be joinedsoon by other Western countries, and some emerging marketsincluding China. The book examines the economic effects of aging,the main proposals for addressing the implications, and how agingsocieties will affect family and social structures, and the type ofenvironment in which the baby-boomers' children will grow up. The contrast between the expected old age bulge in Western nationsand the youth bulge in developing countries has importantimplications for globalization, and for immigration in Westerncountries - two topics already characterized by rising discontentor opposition. But we have to find ways of making

both globalization and immigration work for all, for fear that failure may lead us down much darker paths. Aging also brings new challenges for the world to address in two sensitive areas, the politicization of religion and the management of international security. Governments and global institutions will have to take greater responsibilities to ensure that public policy responses are appropriate and measured. The challenges arising within aging societies, and the demographic contrasts between Western and developing countries make for a fractious world - one that is in line with the much-debated 'decline of the West'. The book doesn't flinch from recognizing the ways in which this could become more visible, but also asserts that we can address demographic change effectively if governments and strengthened international institutions are permitted a larger role in managing change.

Macroeconomic Imbalances European Commission. Directorate-General for Economic and Financial Affairs 2012 On 14 February 2012, the European Commission presented its first Alert Mechanism Report (AMR), prepared in accordance with Article 3 of Regulation (EU) No 1176/2011 on the prevention and correction of macroeconomic imbalances. The AMR serves as an initial screening device, helping to identify Member States that warrant further in-depth analysis to determine whether imbalances exist or risk emerging. According to Article 5 of Regulation No. 1176/2011, these country-specific in-depth reviews should examine the nature, origin and severity of macroeconomic developments in the Member State concerned which constitute, or could lead to, imbalances. On the basis of this analysis, the Commission will establish whether it considers that an imbalance exists and what type of policy follow-up it will recommend to the Council. For Slovenia, the AMR noted that two indicators in the scoreboard exceeded their thresholds in 2010 and

suggested the need to assess the development and drivers of potential imbalances. The AMR explained that in the years before the crisis, Slovenia enjoyed strong growth and domestic demand conditions, coupled with some losses in price competitiveness and a gradual widening of the current account deficit. It identified signs that overheating occurred, particularly as regards private sector credit growth, construction value added and property prices. The Slovenian economy was hit hard by the global crisis and the AMR noted that this has brought some, perhaps temporary, adjustment in the external balance but this is still at an early stage. Against this background, Section 2 examines the external and internal dimensions of imbalances including developments in competitiveness, private sector indebtedness and in asset markets. This is followed by a closer look at the implications of indebtedness of non-financial corporations for the banking sector in Section 3. Section 4 presents possible policy considerations.

Hospital-Based Health Technology Assessment Laura Sampietro-Colom 2017-01-23 A timely work

describing how localized hospital-based health technology assessment (HB-HTA) complements general, 'arms-length' HTA agency efforts, and what has been the collective global impact of HB-HTA across the globe. While HB-HTA has gained significant momentum over the past few years, expertise in the field, and information on the operation and organization of HB-HTA, has been scattered. This book serves to bring this information together to inform those who are currently working in the field of HTA at the hospital, regional, national or global level. In addition, this book is intended for decision-makers and policy-makers with a stake in determining the uptake and decommissioning of new and established technologies in the hospital setting. HTA has traditionally been performed at the National/Regional level by HTA Agencies, typically linked to governments. Yet hospitals are the main entry door for most health technologies (HTs). Hospital decision-makers must undertake multiple high stakes investment and disinvestment decisions annually for innovative HTs, usually without adequate information. Despite the existence of arms-length HTA Agencies, inadequate information is available to hospital decision-makers either because relevant HTA reports are not yet released at the time of entry of new technologies to the field, or because even when the report exists, the information contained is insufficient to clarify the contextualized informational needs of hospital decision makers. Therefore, there has recently been a rising trend toward hospital-based HTA units and programs. These units/programs complement the work of National/Regional HTA Agencies by providing the key and relevant evidence needed by hospital decision makers in their specific hospital context, and within required decision-making timelines. The emergence of HB-HTA is creating a comprehensive HTA ecosystem across health care levels, which creates better bridges for knowledge translation through relevance and timeliness.

Corruption Susan Rose-Ackerman 2013-10-22 *Corruption: A Study in Political Economy* focuses on the problem of corruptions in political economy and functional bribery. This book is organized into four parts encompassing 11 chapters. Chapters 2 to 4 deal with the fundamental relationship among voters, legislators, and interest groups, as well as the role of the government bureaucracy in shaping legislative choices. Chapter 5 illustrates the basic relationships with an analysis of a monopolistic government official charged with allocating a benefit through a queuing system, while Chapter 6 retains the assumption of a single official with monopoly power but moves beyond the queuing model to consider alternative sanctioning strategies, a wider variety of bureaucratic tasks, and bribers who may be competitively or monopolistically organized. Chapters 7 and 8 explore the potential of a system where officials are permitted to compete with one another in processing applications for governmental benefits. Under this system, an individual or firm rejected by one official can seek the benefit from other bureaucrats. Chapter 9 introduces a final administrative variable into the analysis, while Chapter 10 discusses the governmental corruption to analogous corrupt activities entirely within the private sector. Lastly, Chapter 11 looks into the relation between corruption and democratic theory, the possibility of reforming corrupt bureaucracies, and the link between economics and morality. This book will be of value to public servants, legislators, economists, sociologists, and researchers.

Microeconomics Michael L. Katz 1998 This text emphasizes a modern approach to microeconomics by integrating new topics in microeconomic theory and making them accessible to students. These topics include risk and uncertainty, asymmetric information and game theory. Traditional topics are also treated in a clear way with solid applications. Modifications have been made to the text in this edition, these include new information on the theory of the firm, specifically the coverage of cost,

and examples are included throughout the text to reinforce the material presented.

The Right to Strike Bernd Waas 2014 The present volume is an outcome of the proceedings of the World Congress of the International Society for Labour and Social Security Law which took place in Santiago, Chile, in September 2012. The country reports submitted at that time have been modified and updated, and more country reports have been added. Each chapter covers the following specific topics: legal definitions; the legal basis of the right to strike; the right to call a strike; the right to participate in a strike; lawful strikes according to their purpose; procedural requirements; peace obligations; other limitations to strikes; the public sector and 'essential services'; specific emanations of strikes and other forms of industrial action; legal consequences of lawful strikes; legal consequences of unlawful strikes; dispute resolution; support of strikers; parity of parties and neutrality of the state; and strikes in practice.

Russian Cultural Anthropology After the Collapse of Communism Альберт Кашфуллович Байбурын 2012 In Soviet times, anthropologists in the Soviet Union were closely involved in the state's work of nation building. They helped define official nationalities, and gathered material about

traditional customs and suitably heroic folklore, whilst at the same time refraining from work on the reality of contemporary Soviet life. Since the end of the Soviet Union anthropology in Russia has been transformed. International research standards have been adopted, and the focus of research has shifted to include urban culture and difficult subjects, such as xenophobia. However, this transformation has been, and continues to be, controversial, with, for example, strongly contested debates about the relevance of Western anthropology and cultural theory to post-Soviet reality. This book presents an overview of how anthropology in Russia has changed since Soviet times, and showcases examples of important Russian anthropological work. As such, the book will be of great interest not just to Russian specialists, but also to anthropologists more widely, and to all those interested in the way academic study is related to prevailing political and social conditions.

Ethics and Economic Affairs Alan Lewis 2002-01-08 There has been a remarkable growth of interest in the ethical dimension of economic affairs. Whilst the interest in business ethics has been long-standing, it has been given renewed emphasis by high profile scandals in the world of business and finance. At the same time many economists, dissatisfied with the discipline's emphasis on self-interest and individualism, and by the asocial nature of much economic theory, have sought to enlarge the scope of economics by looking at ethical questions. In this volume a group of interdisciplinary scholars provide contributions which include evaluations of work in business ethics, empirical studies of such issues as social and ethical investing, the place of ethics in the new economics and perspectives from other disciplines.

Criminal Justice in Islam Kate Daniels 2018-07-30 A formidable array of judicial talent considers all aspects of Islamic criminal procedure with the firm emphasis on its practical application today in

modern states. Where do Islamic courts operate in the modern world? What training does an Islamic judge receive? How does an Islamic court deal with a criminal case? What proof and evidence does it accept? What law and practice do the Islamic judges apply to transgressions by Westerners in Saudi Arabia, whether they be accused of murder, adultery or drinking alcohol? This book attempts to answer all these and many more crucial questions of Islamic law as they affect the different nations of the Islamic World.
