Holocaust Education Stuart Foster 2020-07-06 Teaching and learning about the Holocaust is central to school curriculums in many parts of the world. As a field for discourse and a body of practice, it is rich, multidimensional and innovative. But the history of the Holocaust is complex and challenging, and can render teaching it a complex and daunting area of work. Drawing on landmark research into teaching practices and students' knowledge in English secondary schools, *Holocaust Education: Contemporary challenges and controversies* provides important knowledge about and insights into classroom teaching and learning. It sheds light on key challenges in Holocaust education, including the impact of misconceptions and misinformation, the dilemmas of using atrocity images in the classroom, and teaching in ethnically diverse environments. Overviews of the most significant debates in Holocaust education provide wider context for the classroom evidence, and contribute to a book that will act as a guide through some of the most vexed areas of Holocaust pedagogy for teachers, teacher educators, researchers and policymakers.

The Legacy of Mesopotamia Shillito Fellow in Assyriology at the Oriental Institute Senior Research Fellow Stephanie Dalley 1998 Influence from Mesopotamia on adjacent civilizations has often been proposed on the basis of scattered similarities. For the first time a wide-ranging assessment from 3000 BC to the Middle Ages investigates how similarities arose in Egypt, Palestine, Anatolia, and Greece. The development of writing for accountancy, astronomy, divination, and belles lettres emanated from Mesopotamians who took their academic traditions into countries beyond their political control. Each country soon transformed what it received into its own, individual culture. When cuneiform writing disappeared, Babylonian cults and literature, now in Aramaic and Greek, flourished during the Roman Empire. The Manichaeans adapted the old traditions which then perished under persecution, but traces persist in Hermetic works, court narratives and romances, and in the Arabian Nights. When ancient Mesopotamia was rediscovered in the last century, British scholars were at the forefront of international research. Public excitement has been reflected in pictures and poems, films and fashion.

What Should Schools Teach? Alka Sehgal Cuthbert 2021-01-07 The design of school curriculums involves deep thought about the nature of knowledge and its value to learners and society. It is a serious responsibility that raises a number of questions. What is knowledge for? What knowledge is important for children to learn? How do we decide what knowledge matters in each school subject? And how far should the knowledge we teach in school be related to academic disciplinary knowledge? These and many other questions are taken up in **What Should Schools Teach?** The blurring of distinctions between pedagogy and curriculum, and between experience and knowledge, has served up a confusing message for teachers about the part that each plays in the education of children. Schools teach through subjects, but there is little consensus about what constitutes a subject and what they are for. This book aims to dispel confusion through a robust rationale for what schools should teach that offers key understanding to teachers of the relationship between knowledge (what to teach) and their own pedagogy (how to teach), and how both need to be informed by values of intellectual freedom and autonomy. This second edition includes new chapters on Chemistry, Drama, Music and Religious Education, and an updated chapter on Biology. A revised introduction reflects on emerging discourse around decolonizing the curriculum, and on the relationship between the knowledge that children encounter at school and in their homes.

Philosophy in the Classroom Matthew Lipman 1980-05-15 This is a textbook for teachers that demonstrates how philosophical thinking can be used in teaching children. It begins with the assumption that what is taught in schools is not (and should not be) subject matter but rather ways of thinking. The main point is that the classroom should be converted into a community of inquiry, and that one can begin doing that with children. Based on the curriculum that Matt Lipman has developed at the Institute for the Advancement of Philosophy for Children, which he heads, this book describes the curriculum and explains its use. The text is self-contained, however. This revision is thorough-going and incorporates new chapters, as well as new material in old chapters. Part One focuses on the need of educational change and the importance of philosophical inquiry in developing new approaches. Part Two discusses curriculum and teaching methodology, including teacher behavior conducive to helping children. Part Three deals with developing logic skills and moral judgment. It concludes with a chapter on the sorts of philosophical themes pertinent to ethical inquiry for children: the right and the fair, perfect and right, free will and determinism, change and growth, truth, caring, standards and rules, thinking and thinking for oneself. Education, in this sense, is not a matter of dispensing information; it is the process of assisting in the growth of the whole individual.

The Encyclopedia of Jewish Symbols Ellen Frankel 1995-11-01 Jewish symbols reflect the interaction of word and image within Jewish culture. Jews have always studied, interpreted, and revered sacred texts; they have also adorned the settings and occasions of sacred acts. Calligraphy and ornamentation have transformed Hebrew letters into art; quotation, interpretation, legend, and wordplay have made ceremonial objects into narrative. This book represents just such a collaboration between art and language. Ellen Frankel and Betsy Platkin Teutsch, writer and artist, have brought their extensive knowledge and talents together to create The Encyclopedia of Jewish Symbols, the first reference guide of its kind, designed for use by educators, artists, rabbis, folklorists, feminists, Jewish and non-Jewish scholars, and lay readers.
