Tarkovsky Andrey A. Tarkovsky 2019-02-14 Andrey Tarkovsky was the most important Russian filmmaker of the post-war era, and one of the world's most renowned cinematic geniuses. He directed the first five of his seven films - Ivan's Childhood, Andrei Rublev, Solaris, Mirror and Stalker - in the Soviet Union, but in 1982 defected to Italy, where he made Nostalgia. His final film, The Sacrifice, was produced in Sweden in 1985. Tarkovsky's films are characterized by metaphysical themes, extended takes, an absence of conventional dramatical structure and plot, and a dream-like, visionary style of cinematography. They achieve a spiritual intensity and transcendent beauty that many consider to be without parallel. This book presents extended sequences of stills from each of the films alongside synopses and cast and crew listings. It includes reflections on Tarkovsky's work from fellow artists and writers including Jean-Paul Sartre and Ingmar Bergman, for whom Tarkovsky was 'the greatest, the one who invented a new language.' Extracts from Tarkovsky's own writings and diaries offer a wealth of insights into his poetic and philosophical views on cinematography, which he described as 'sculpting in time'. The book also reproduces many personal Polaroid photographs that confirm the extraordinary poetic vision of a great artist who died aged only 54, but who remains a potent influence on artists and filmmakers today.

Postcards from Vogue 2012-11-21 A collection of 100 postcards, each featuring a striking cover from American Vogue. From early aspirational illustrations to modern celebrity photography, this is a stunning selection of Vogue's most dazzling images. Since its launch in 1892, Vogue has brought sophistication to its readers around the world. Early illustrations from artists including George Wolfe Plank, Olive Tilton, Pierre Brissaud, and Eduardo Garcia Benito saw ethereal figures of fantasy develop into red-lipped flappers, and as colour photographs began to appear, the women transformed again: from Surrealist images by Horst P. Horst to 'women in the life of the moment', captured by Irving Penn. From the fifties onwards, Vogue women became more accessible still, as models and stars like Elizabeth Taylor, Goldie Hawn, Cindy Crawford, and Cher, with their own distinct personalities, appeared through the lenses of Richard Avedon and Snowdon. Vogue covers now are the epitome of style and beauty, with such illustrious photographers as Mario Testino, Annie Leibovitz, Steven Klein, and Patrick Demarchelier photographing stars like Lady Gaga, Kirsten Dunst, and Kate Moss, celebrating female icons across modern culture.

The Biological Mind Alan Jasanoff 2018-03-13 A pioneering neuroscientist argues that we are more than our brains To many, the brain is the seat of personal identity and autonomy. But the way we talk about the brain is often rooted more in mystical conceptions of the soul than in scientific fact. This blinds us to the physical realities of mental function. We ignore bodily influences on our psychology, from chemicals in the blood to bacteria in the gut, and overlook the ways that the environment affects our behavior, via factors varying from subconscious sights and sounds to the weather. As a result, we alternately overestimate our capacity for free will or equate brains to inorganic machines like computers. But a brain is neither a soul nor an electrical network: it is a bodily organ, and it cannot be separated from its surroundings. Our selves aren't just inside our heads--they're spread throughout our bodies and beyond. Only once we come to terms with this can we grasp the true nature of our humanity.

They Drew As They Pleas Vol 4 Didier Ghez 2018-08-07 The 1950s and 1960s at The Walt Disney Studios marked unprecedented stylistic directions brought on by the mid-century modern and graphic sensibilities of a new wave of artists. This volume explores the contributions of these heroes with special emphasis on the art of Lee Blair, Mary Blair, Tom Oreb, John Dunn, and Walt Peregoy. It includes never-before-seen images from Cinderella, Alice in Wonderland, Peter Pan, and Sleeping Beauty and discusses Disney's first forays into television, commercials, space, and science projects—even the development of theme parks. Drawing on interviews and revealing hundreds of rediscovered images that inspired Disney's films during one of its most prolific eras, this volume captures the rich stories of the artists who brought the characters to life and helped shape the future of animation. The Psychosocial Implications of Disney Movies Lauren Dundes 2019-07-11 In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

Saul Bass Jan-Christopher Horak 2014-11-18 Iconic graphic designer and Academy Award-winning filmmaker Saul Bass (1920–1996) defined an innovative era in cinema. His title sequences for films such as Otto Preminger's *The Man with the Golden Arm* (1955) and *Anatomy of a Murder* (1959), Alfred Hitchcock's *Vertigo* (1958) and *North by Northwest* (1959), and Billy Wilder's *The Seven Year Itch* (1955) introduced the idea that opening credits could tell a story, setting the mood for the movie to follow. Bass's stylistic influence can be seen in popular Hollywood franchises from the *Pink Panther* to *James Bond*, as well as in more

contemporary works such as Steven Spielberg's *Catch Me If You Can* (2002) and television's *Mad Men*. The first book to examine the life and work of this fascinating figure, *Saul Bass: Anatomy of Film Design* explores the designer's revolutionary career and his lasting impact on the entertainment and advertising industries. Jan-Christopher Horak traces Bass from his humble beginnings as a self-taught artist to his professional peak, when auteur directors like Stanley Kubrick, Robert Aldrich, and Martin Scorsese sought him as a collaborator. He also discusses how Bass incorporated aesthetic concepts borrowed from modern art in his work, presenting them in a new way that made them easily recognizable to the public. This long-overdue book sheds light on the creative process of the undisputed master of film title design—a man whose multidimensional talents and unique ability to blend high art and commercial imperatives profoundly influenced generations of filmmakers, designers, and advertisers.

Overtourism Claudio Milano 2019-06-07 This book examines the evolution of the phenomenon and explores the genesis of overtourism and the system dynamics underlining it. The 'overtourism' phenomenon is defined as the excessive growth of visitors leading to overcrowding and the consequential suffering of residents, due to temporary and often seasonal tourism peaks, that lead to permanent changes in lifestyles, amenities and well-being. Enormous tensions in overtourism affected destinations have driven the intensification of policy making and scholarly attention toward seeking antidotes to an issue that is considered paradoxical and problematic. Moving beyond the 'top 10 things you can do about overtourism', this book examines the evolution of the phenomenon and explores the genesis of overtourism as well as the system dynamics underpinning it. With a rigorous scientific approach, the book uses systems-thinking and contemporary paradigms around sustainable development, resilience planning and degrowth; while considering global economic, socio-political, environmental discourses. Researchers, analysts, policy makers and industry stakeholders working within tourism as well as those within the private sector, community groups, civil society groups and NGOs will find this book an essential source of information.

Nothing Happened Susan A. Crane 2021-01-19 The past is what happened. History is what we remember and write about that past, the narratives we craft to make sense out of our memories and their sources. But what does it mean to look at the past and to remember that "nothing happened"? Why might we feel as if "nothing is the way it was"? This book transforms these utterly ordinary observations and redefines "Nothing" as something we have known and can remember. "Nothing" has been a catch-all term for everything that is supposedly uninteresting or is just not there. It will take some—possibly considerable—mental adjustment before we can see Nothing as Susan A. Crane does here, with a capital "n." But Nothing has actually been happening all along. As Crane shows in her witty and provocative discussion, Nothing is nothing less than fascinating. When Nothing has changed but we think that it should have, we might call that injustice; when Nothing has happened over a long, slow period of time, we might call that boring. Justice and boredom have histories. So too does being relieved or disappointed when Nothing happens—for instance, when a forecasted end of the world does not occur, and millennial movements have to regroup. By paying attention to how we understand Nothing to be happening in the present, what it means to "know Nothing" or to "do Nothing," we can begin to ask how those experiences will be remembered. Susan A. Crane moves effortlessly between different modes of seeing Nothing, drawing on visual analysis and cultural studies to suggest a new way of thinking about history. By remembering how Nothing happened, or how Nothing is the way it was, or how Nothing has changed, we can recover histories that were there all along.

Frame by Frame Hannah Frank 2019-04-09 At publication date, a free ebook version of this title will be available through Luminos, University of California Press's Open Access publishing program. Visit www.luminosoa.org to learn more. In this beautifully written and deeply researched study, Hannah Frank provides an original way to understand American animated cartoons from the Golden Age of animation (1920–1960). In the pre-digital age of the twentieth century, the making of cartoons was mechanized and standardized: thousands of drawings were inked and painted onto individual transparent celluloid sheets (called "cels") and then photographed in succession, a labor-intensive process that was divided across scores of artists and technicians. In order to see the art, labor, and technology of cel animation, Frank slows cartoons down to look frame by frame, finding hitherto unseen aspects of the animated image. What emerges is both a methodology and a highly original account of an art formed on the assembly line.

This media-archaeological excavation examines the nature of our sensual involvement with media and invites the reader to think about the touchscreen beyond its technological implications. In six chapters, the book questions and historicizes both aspects of the

touchscreen, considering "touch" as a media practice and "screen" as a touchable object.

Postcards from the New Yorker 2012-05-23 The New Yorker was launched in 1925, and offers reporting, criticism, essays, fiction, poetry, humour, and cartoons. From the very outset, the founders, Harold Ross and Jane Grant, declared that their sophisticated magazine was 'not edited for the old lady in Dubuque'. The New Yorker has also offered great literature in short stories from such acclaimed writers as John Cheever, Roald Dahl, Alice Munro, Haruki Murakami, Vladimir Nabokov, J. D. Salinger, and Shirley Jackson. From the very first issue, the now iconic monocled dandy Eustace Tilley made The New Yorker's covers unique and pointed. These signature traits have continued right up to the present day in the striking and sometimes controversial covers from such artists as Peter Arno, William Steig, Saul Steinberg, Jean-Jacques Sempé, and Art Spiegelman. Drawing Futures Bob Sheil 2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

They Drew as They Pleased Didier Ghez 2016-04-05 As the Walt Disney Studio entered its first decade and embarked on some of the most ambitious animated films of the time, Disney hired a group of "concept artists" whose sole mission was to explore ideas and inspire their fellow animators. *They Drew as They Pleased* showcases four of these early pioneers and features artwork developed by them for the Disney shorts from the 1930s, including many unproduced projects, as well as for Snow White and the Seven Dwarfs, Pinocchio, and some early work for later features such as Alice in Wonderland and Peter Pan. Introducing new biographical material about the artists and including largely unpublished artwork from the depths of the Walt Disney Archives and the Disney Animation Research Library, this ebook offers a window into the most inspiring work created by the best Disney artists during the studio's early golden age. *They Drew as They Pleased* is the first in what promises to be a revealing and fascinating series of books about Disney's largely unexamined concept artists, with six volumes spanning the decades between the 1930s and 1990s.
